## 2. IMPORTANT SAFETY INSTRUCTIONS

**WARNING: To reduce the risk of death, injury, or property damage, always follow basic safety precautions when using electrical appliances.**

- Do not use near water (e.g., in a bathtub, shower, or sink).
- Always unplug the appliance immediately after use.
- Do not reach for an appliance that has fallen into water; unplug it immediately.
- Keep the cord away from heated surfaces.
- Never block the air openings of the appliance or place it on a soft surface where the air openings may be blocked.
- Never use while sleeping.
- Never drop or insert any object into any opening.
- Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.
- Do not use an extension cord with this appliance.
- This appliance is for household use only.

## 3. PRODUCT FEATURES

- **Nano Titanium Technology:** Provides excellent heat conductivity for stable temperatures and even heat distribution, promoting healthy-looking hair.
- **Rotating Barrel:** The 2-inch barrel rotates in both forward and reverse directions, allowing for versatile styling options such as curling under, flipping out, or creating soft waves.
- **Anti-static Bristles:** A specialized bristle mix helps to reduce frizz and enhance shine, contributing to a smooth finish.
- **Ionic Generator:** Emits negative ions to further reduce frizz and static, sealing the hair cuticle for a smoother, shinier result.
- **Temperature Settings:** Features two heat settings (low/warm, high/hot) and a cool setting to dry, style, and set your hair.
- **Ergonomic Design:** The well-shaped handle and conveniently located controls ensure comfortable handling and precise styling.

## 4. SETUP

1. **Unpack:** Carefully remove the hot air brush and all accessories from the packaging.
2. **Inspect:** Check the appliance for any signs of damage. Do not use if damaged.
3. **Power Connection:** Ensure your hands are dry, then plug the appliance into a standard electrical outlet (120V AC).
4. **Initial Heat-up:** Allow the brush to heat up for approximately 30-60 seconds before use.

## 5. OPERATING INSTRUCTIONS

For optimal results, ensure your hair is approximately 80% dry before using the rotating hot air brush. You can achieve this by towel-drying and then blow-drying with a regular hairdryer or by using the hot air brush with the rotating feature deactivated.

1. **Prepare Hair:** Section your hair into manageable portions.
2. **Select Temperature:** Choose the appropriate heat setting (low or high) based on your hair type. Use the cool setting to set your style.
3. **Position the Brush:** Place the hot air brush under a section of hair, close to the roots.
4. **Brush Through:** Brush the section of hair almost to the ends without activating the rotation.
5. **Activate Rotation:** Once near the ends, press the desired rotation button (forward or reverse) to gently wrap the hair around the barrel.
6. **Style:** Slowly glide the brush through the hair, allowing the rotating barrel to smooth and shape. For volume, lift

the brush at the roots. For curls or flips, hold the brush at the ends for a few seconds before releasing.

7. **Repeat:** Continue with remaining sections until desired style is achieved.

## 6. MAINTENANCE

1. **Cleaning:** Ensure the appliance is unplugged and completely cool before cleaning. Use a soft, damp cloth to wipe down the exterior. Remove any hair tangled in the bristles using a comb or brush cleaning tool.
2. **Storage:** Store the appliance in a cool, dry place, away from moisture. Do not wrap the cord around the appliance, as this can cause damage. Use the provided plastic slip-on cover for the brush portion to protect the bristles.
3. **Cord Care:** Regularly inspect the power cord for damage. If the cord is damaged, do not use the appliance and contact customer support.

## 7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Appliance does not turn on.	Not plugged in, power outlet issue, or internal fault.	Ensure the appliance is securely plugged into a working outlet. Check the circuit breaker. If the issue persists, contact customer support.
Brush is not rotating.	Rotation feature not activated, or hair is tangled.	Ensure the rotation button is pressed. Check for any hair or debris obstructing the barrel's movement. Ensure hair is not too wet.
Hair gets tangled in the brush.	Hair sections are too large, or rotation is used continuously.	Use smaller sections of hair. Use the rotation in short bursts, releasing the hair as you style, rather than continuous rotation. Ensure hair is not excessively wet.
Insufficient volume or shine.	Hair is too wet, or incorrect technique.	Ensure hair is 80% dry before styling. Experiment with lifting hair at the roots and holding the brush for a few seconds to build volume.
