# NordicTrack Commercial 1750 Treadmill Safety Key User Manual

Model: NTL140101 | Part: 303713

## INTRODUCTION

This manual provides essential information for the proper use and maintenance of your NordicTrack Commercial 1750 Treadmill Safety Key. The safety key is a critical component designed to ensure user safety by immediately stopping the treadmill in case of an emergency or if the user falls. It is specifically compatible with NordicTrack Commercial 1750 treadmills, model NTL140101, and is identified by part number 303713.

Always ensure the safety key is properly engaged before operating your treadmill.

## PRODUCT OVERVIEW

**Figure 1:** NordicTrack Commercial 1750 Treadmill Safety Key.

This image displays the NordicTrack treadmill safety key, featuring a prominent red, oval-shaped magnetic component designed to attach to the treadmill's console, and a black rectangular clip intended to be fastened to the user's clothing. Both parts are securely connected by

a durable black cord.

The safety key consists of two main parts: a magnetic component that attaches to the treadmill's console and a clip that attaches to the user's clothing. The cord connects these two parts, ensuring that if the user moves too far from the console or falls, the magnetic component detaches, and the treadmill immediately stops.

## SETUP INSTRUCTIONS

1. **Locate the Safety Key Receptacle:** On your NordicTrack Commercial 1750 treadmill, identify the designated slot or magnetic area on the console where the safety key is inserted. This is typically a red or clearly marked area.
2. **Insert the Magnetic Component:** Gently place the red magnetic end of the safety key into its receptacle on the treadmill console. Ensure it is firmly seated and makes full contact. The treadmill will not start if the key is not properly engaged.
3. **Attach the Clip to Clothing:** Securely attach the black clip on the other end of the safety key cord to your clothing. It is recommended to attach it to a waistband, shirt, or shorts, ensuring it is positioned so that it will easily detach if you move away from the console or lose balance.
4. **Verify Connection:** Before starting your workout, give a gentle tug on the cord to ensure the clip is securely attached to your clothing and the magnetic component is firmly in place on the console.

***Important:** Never operate the treadmill without the safety key properly installed and attached to your person. This is a crucial safety feature.*

## OPERATING INSTRUCTIONS

Once the safety key is properly set up as described in the "Setup Instructions" section, you can proceed with operating your treadmill.

- **Starting the Treadmill:** With the safety key in place and attached to your clothing, you can now power on your treadmill and select your desired workout program or manual settings. The treadmill will only begin operation once the safety key is detected.
- **Emergency Stop:** In the event of an emergency, or if you feel you are losing control or falling, simply pull the safety key from the console. This action will immediately cut power to the treadmill belt, bringing it to a rapid stop.
- **Pausing/Stopping Workout:** To pause or stop your workout normally, use the designated pause or stop buttons on the treadmill console. Removing the safety key is primarily for emergency stops.

## MAINTENANCE

Proper care of your safety key ensures its longevity and continued effectiveness as a safety device.

- **Regular Inspection:** Periodically inspect the safety key for any signs of wear, tear, or damage to the cord, magnetic component, or clip. Look for fraying, cracks, or deformation.
- **Cleaning:** If necessary, gently wipe the safety key with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the material.
- **Storage:** When not in use, store the safety key in a safe place where it will not be lost or damaged. Avoid extreme temperatures or direct sunlight.
- **Replacement:** If the safety key shows any signs of damage or malfunction, replace it immediately with an authentic NordicTrack replacement part to ensure continued safety.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Treadmill will not start.	Safety key not properly inserted.	Ensure the red magnetic end of the safety key is fully seated in its receptacle on the console. The treadmill will not operate without it.
Treadmill stops unexpectedly during use.	Safety key detached from console.	Re-insert the safety key. If this happens frequently without intentional detachment, check the key and receptacle for damage or wear. Ensure the clip is securely attached to your clothing to prevent accidental detachment.
Safety key clip is broken or cord is frayed.	Wear and tear or physical damage.	Replace the safety key immediately. A damaged safety key compromises the safety features of your treadmill.

## SPECIFICATIONS

- **Brand:** NordicTrack
- **Model Compatibility:** NordicTrack Commercial 1750 (NTL140101)
- **Part Number:** 303713
- **Material:** Rubber
- **Compatible Devices:** Treadmill
- **Item Weight:** 0.01 Kilograms (approximately 0.49 ounces)
- **Package Dimensions:** 3.54 x 2.99 x 0.67 inches
- **Manufacturer:** NordicTrack
- **Date First Available:** January 3, 2013

## WARRANTY AND SUPPORT

For specific warranty information regarding your NordicTrack Commercial 1750 Treadmill Safety Key, please refer to the documentation that came with your original treadmill purchase or visit the official NordicTrack website. As a replacement part, its warranty may be subject to different terms than the full treadmill unit.

If you require further assistance, have questions about compatibility, or need to purchase replacement parts, please contact NordicTrack Customer Support directly. You can typically find their contact information on their official website or in your treadmill's main user manual.
