ASSEMBLY INSTRUCTIONS

Assembly of the Falk F2050C pedal tractor is straightforward. Please follow these steps carefully. A Phillips head screwdriver and a wrench may be required.

1. **Attach the Front Axle:** Secure the front axle to the tractor's main body using the provided hardware. Ensure it is firmly attached to allow for proper steering.
2. **Install the Front Wheels:** Slide the front wheels onto the axle and secure them with the appropriate caps or fasteners.
3. **Install the Rear Axle and Wheels:** Insert the rear axle through the designated slots in the tractor body. Attach the rear wheels, ensuring they are securely fastened and allow for free rotation.
4. **Connect the Pedal Assembly:** Insert the pedal assembly into the tractor body, ensuring the chain mechanism aligns correctly with the rear axle sprocket. Test the pedals for smooth rotation.
5. **Attach the Steering Wheel:** Connect the steering rod to the front axle mechanism, then attach the steering wheel to the top of the rod. Ensure the steering operates smoothly from left to right.
6. **Mount the Seat:** Position the seat on the tractor body and secure it with the provided screws. Note that pilot holes for the seat screws may not be pre-drilled, requiring firm pressure during installation.
7. **Attach the Trailer Hitch:** Secure the trailer hitch mechanism to the rear of the tractor.
8. **Final Check:** Before first use, inspect all connections and moving parts to ensure they are secure and functioning correctly.

OPERATING INSTRUCTIONS

Pedaling

The tractor features a chain pedal drive mechanism. To move forward, the child should push the pedals in a circular motion. The heavy-treaded wheels provide good traction on various surfaces.

Steering

The tractor is designed with easy steering for young children. To turn, simply rotate the steering wheel in the desired direction. Ensure the child understands how to steer before independent use.

Attaching and Detaching the Trailer

The included trailer is detachable. To attach, align the trailer hitch with the connector on the back of the tractor and secure it. To detach, reverse the process. Ensure the trailer is securely connected before use to prevent accidental detachment.

MAINTENANCE

Regular maintenance will extend the life of your pedal tractor.

- **Cleaning:** Wipe the tractor clean with a damp cloth and mild soap. Do not use abrasive cleaners or solvents.
- **Inspection:** Periodically check all screws, nuts, and bolts to ensure they are tight. Inspect the wheels, pedals, and steering mechanism for any signs of wear or damage.

- **Lubrication:** The chain drive mechanism may benefit from occasional light lubrication with a bicycle chain lubricant to ensure smooth operation.
- **Storage:** Store the tractor in a dry, sheltered area away from direct sunlight and extreme temperatures to prevent material degradation.

TROUBLESHOOTING

If you encounter any issues with your pedal tractor, refer to the following table:

Problem	Possible Cause	Solution
Pedals are stiff or not moving	Chain is dry or misaligned; debris in mechanism.	Lubricate the chain; check for and remove any obstructions; ensure chain is properly seated on sprockets.
Steering is difficult or loose	Steering rod connection is loose or damaged.	Check and tighten all connections in the steering mechanism. Inspect for damaged parts.
Wheels wobble or are loose	Wheel fasteners are loose or axle is bent.	Tighten wheel fasteners. If axle is bent, contact customer support for replacement.
Trailer detaches easily	Trailer hitch not properly secured.	Ensure the trailer hitch is fully engaged and secured to the tractor's connection point.
