

ACOVA ACATSL075050TF

ACOVA Atoll Spa El Regulation Tf Electric Towel Dryer User Manual

1. INTRODUCTION

This manual provides essential information for the safe and efficient operation, installation, and maintenance of your ACOVA Atoll Spa El Regulation Tf Electric Towel Dryer. Please read these instructions thoroughly before installation and use, and retain them for future reference. This electric towel dryer is designed to warm towels and provide supplementary heat in bathrooms.

2. SAFETY INFORMATION

- Ensure the electrical supply matches the specifications on the product label.
- Installation must be performed by a qualified electrician in accordance with local wiring regulations.
- Do not operate the appliance with a damaged cord or plug.
- Keep the appliance away from water sources and do not immerse it in water.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- Do not cover the towel dryer with clothing or other materials that could obstruct heat dissipation, as this may cause overheating.
- Ensure adequate ventilation around the appliance.

3. PRODUCT OVERVIEW

The ACOVA Atoll Spa El Regulation Tf is an electric towel dryer designed for bathroom environments. It features a ladder-style design with multiple horizontal bars for hanging and warming towels, and an integrated control unit for temperature regulation.

This image shows the ACOVA Atoll Spa El Regulation Tf electric towel dryer, a white, ladder-style radiator designed for heating towels and providing ambient warmth in a bathroom. It is wall-mounted and features horizontal bars for hanging towels, with a control unit located at the bottom right.

4. SETUP

4.1 Unpacking

1. Carefully remove all packaging materials.
2. Inspect the towel dryer for any signs of damage. Do not install if damaged.
3. Ensure all components listed in the packing list (not provided here, refer to your product packaging) are present.

4.2 Wall Mounting

- Choose a suitable wall location in your bathroom, ensuring it is away from direct water spray and within reach of a power outlet.
- Use the provided mounting brackets and hardware. Mark the drilling points accurately on the wall.
- Drill holes and insert appropriate wall plugs.
- Securely attach the mounting brackets to the wall.
- Mount the towel dryer onto the brackets, ensuring it is level and stable.

4.3 Electrical Connection

- This appliance requires a dedicated electrical connection.
- All electrical work must be carried out by a qualified electrician.
- Ensure the power supply is disconnected before making any electrical connections.
- Connect the towel dryer to the mains supply according to the wiring diagram provided with the product and local electrical codes.

5. OPERATING INSTRUCTIONS

5.1 Power On/Off

- Once properly installed and connected to the power supply, switch on the main power to the appliance.
- Use the power button on the integrated control unit (typically located at the bottom of the dryer) to turn the unit on or off.

5.2 Temperature Regulation (EI Regulation Tf)

- The 'EI Regulation Tf' system allows you to adjust the heating output.
- Refer to the specific controls on your unit for detailed instructions on setting the desired temperature or operating mode (e.g., comfort, eco, boost).
- Typically, buttons or a dial will allow you to increase or decrease the heat setting.
- Some models may include a timer function for scheduled operation.

5.3 Drying Towels

- Hang towels evenly over the horizontal bars.
- Avoid overcrowding the dryer, as this can reduce its efficiency and potentially lead to overheating.
- Ensure towels do not block the control unit or any ventilation openings.

6. MAINTENANCE

6.1 Cleaning

- Always disconnect the power supply before cleaning.
- Allow the towel dryer to cool completely.
- Wipe the surface with a soft, damp cloth. Do not use abrasive cleaners, solvents, or harsh chemicals, as these can damage the finish.
- Ensure no moisture enters the electrical components.

6.2 Regular Checks

- Periodically check the power cord for any signs of damage.
- Ensure mounting brackets remain secure.
- If you notice any unusual noises, smells, or malfunctions, switch off the appliance immediately and contact customer support.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Towel dryer does not heat.	No power supply. Unit is switched off. Faulty heating element.	Check circuit breaker/fuse. Ensure unit is switched on at the control unit. Contact a qualified technician.

Problem	Possible Cause	Solution
Insufficient heating.	Temperature setting too low. Room too large for unit's output. Overcrowding with towels.	Increase temperature setting. This unit is for supplementary heating; consider additional heating if needed. Reduce the number of towels.
Unusual noise or smell.	Internal fault.	Immediately switch off the unit and disconnect power. Contact customer support.
