

Givi PLX1111

Givi PLX1111 Pannier Holder Instruction Manual

For Honda NC700 XA/XAD/S/sad Motorcycles

1. INTRODUCTION

Welcome to the instruction manual for your Givi PLX1111 Pannier Holder. This document provides essential information for the correct installation, safe use, and proper maintenance of your new motorcycle accessory. Please read these instructions thoroughly before proceeding with installation to ensure optimal performance and safety.

2. PRODUCT OVERVIEW

The Givi PLX1111 is a robust tubular pannier holder specifically engineered for Honda NC700 XA/XAD/S/sad motorcycles. It provides a secure and integrated mounting solution for compatible Givi hard panniers, enhancing your motorcycle's luggage carrying capacity.

Key Features

- Motorcycle specific fitment ensures perfect integration with Honda NC700 XA/XAD/S/sad models.
- Required for the secure attachment of Givi hard panniers.
- Includes all necessary fittings for a complete installation.

This image displays the various tubular metal components of the Givi PLX1111 Pannier Holder kit, laid out on a white background. The black-coated metal frames are designed to attach to a motorcycle, providing a sturdy base for side cases. Visible parts include the main support frames and smaller connecting brackets, all with pre-drilled holes for mounting.

3. INSTALLATION GUIDE

This section details the steps for installing the Givi PLX1111 Pannier Holder on your Honda NC700 XA/XAD/S/sad motorcycle. Basic mechanical knowledge and appropriate tools are recommended for this procedure.

Before You Begin

- Ensure your motorcycle is parked on a stable, level surface.
- Turn off the engine and remove the key.
- Carefully unpack all components and verify against the parts list provided with your product.
- Refer to your motorcycle's owner's manual for specific torque settings or removal procedures for any existing components.

Installation Steps

1. Identify the designated mounting points on your motorcycle's frame. These are typically located near the rear passenger footpegs and under the seat or tail section.
2. Attach the main support brackets to these designated points using the provided bolts and washers. Do not fully tighten any fasteners at this initial stage.
3. Connect any cross-members or additional support bars between the main brackets, ensuring proper alignment of all components.
4. Secure the pannier mounting plates (if separate from the main frame) to the tubular frames. These plates are the interface for attaching your Givi panniers.
5. Once all components are correctly positioned and aligned, progressively tighten all bolts to the manufacturer's recommended torque specifications.
6. Perform a final check of all connections to ensure they are secure and stable before operating the motorcycle.

For detailed, step-by-step visual instructions, please refer to any official Givi installation diagrams or videos that may be available with your product or on the Givi website.

4. USAGE INSTRUCTIONS

Once the Givi PLX1111 Pannier Holder is securely installed, it provides a robust and reliable platform for attaching compatible Givi hard panniers.

Attaching Panniers

1. Align the pannier's mounting points with the corresponding hooks and the upper locking mechanism on the PLX1111 holder.
2. Engage the lower hooks first, then push the pannier firmly against the holder until the upper locking mechanism audibly clicks into place.
3. Verify that the pannier is securely locked by gently attempting to pull it away from the holder.
4. Use the pannier's key to lock the case to the holder, which prevents both accidental detachment and unauthorized removal.

Detaching Panniers

1. Unlock the pannier using its dedicated key.
2. Operate the release lever or button on the pannier. The exact location and mechanism may vary depending on your specific pannier model.
3. Gently pull the pannier away from the holder to remove it.

Important Considerations

- Always distribute weight evenly between panniers to maintain motorcycle balance.
- Do not exceed the maximum weight capacity specified for your panniers or your motorcycle.
- Be aware that adding panniers can affect the motorcycle's handling characteristics and aerodynamics, especially at higher speeds or in crosswinds.

5. MAINTENANCE AND CARE

Regular inspection and maintenance are crucial to ensure the longevity, safe operation, and structural integrity of your Givi PLX1111 Pannier Holder.

- Periodically inspect all bolts, nuts, and fasteners for tightness. Re-tighten to the specified torque

values if any looseness is detected.

- Examine the tubular frame for any signs of damage, such as cracks, bends, or excessive corrosion. Address any issues promptly.
- Clean the holder regularly with a mild soap and water solution. Avoid using abrasive cleaners, harsh chemicals, or solvents, as these can damage the finish.
- If applicable, lubricate any moving parts of the pannier attachment mechanism with a suitable, non-corrosive lubricant to ensure smooth and reliable operation.

6. TROUBLESHOOTING

This section addresses common issues you might encounter with the Givi PLX1111 Pannier Holder and provides potential solutions.

Panniers Not Attaching Securely

- **Check Alignment:** Ensure the pannier holder is correctly installed and not bent or misaligned. A misaligned holder can prevent proper pannier engagement.
- **Inspect Mechanism:** Verify that the pannier's locking mechanism and the holder's attachment points are clean and free of any obstructions, dirt, or debris.
- **Verify Compatibility:** Confirm that your specific Givi panniers are compatible with the PLX1111 system.

Loose or Rattling Holder

- **Tighten Fasteners:** Re-check and tighten all mounting bolts and fasteners to the recommended torque specifications. Vibrations during riding can cause bolts to loosen over time.
- **Inspect for Damage:** Carefully inspect the entire frame and all mounting points for any signs of wear, fatigue, or damage that could compromise stability.

Corrosion

- **Clean Regularly:** Clean the pannier holder regularly, especially after riding in wet, humid, or salty conditions, which can accelerate corrosion.
- **Apply Protective Coating:** Consider applying a suitable rust-inhibiting spray or wax to exposed metal surfaces to provide an additional layer of protection.

7. PRODUCT SPECIFICATIONS

Feature	Detail
Model	PLX1111
Brand	Givi
Compatibility	Honda NC700 XA/XAD/S/sad
Type	Tubular Pannier Holder
Product Dimensions	71.12 x 45.72 x 25.4 cm

Feature	Detail
Product Weight	3.08 kg
Manufacturer	GIVI UK Ltd.
ASIN	B00B7XAB62

Note: Specifications are subject to change without prior notice.

8. WARRANTY AND CUSTOMER SUPPORT

Givi products are manufactured to high-quality standards. For detailed warranty information, please refer to the documentation included with your purchase or visit the official Givi website.
