CARE AND MAINTENANCE

To ensure the longevity and optimal performance of your Targus Slim Stylus, follow these care guidelines:

- **Cleaning the Tip:** Periodically wipe the rubber tip with a soft, dry, lint-free cloth to remove any dust or debris. Avoid using abrasive materials or harsh chemicals.
- **Cleaning the Body:** The stylus body can be cleaned with a slightly damp cloth. Ensure the stylus is completely dry before storage or use.
- **Storage:** Store the stylus in a clean, dry place when not in use. Avoid exposing it to extreme temperatures or direct sunlight.
- **Avoid Excessive Force:** Do not apply excessive pressure to the stylus tip, as this may cause damage.

TROUBLESHOOTING

If you experience issues with your Targus Slim Stylus, consider the following:

- **Stylus Not Responding:** Ensure your device has a capacitive touchscreen. The stylus is not compatible with resistive touchscreens.
- **Inaccurate Input:** Check the stylus tip for any visible damage or excessive wear. A damaged tip may affect accuracy.
- **Screen Sensitivity:** If your device's screen protector is very thick, it might reduce touchscreen sensitivity. Try using the stylus without the screen protector to see if performance improves.
- **Cleaning:** A dirty tip can sometimes cause inconsistent performance. Clean the tip as described in the 'Care and Maintenance' section.
