

## Hape E6008

# Hape Quadrilla Cyclone Wooden Marble Run Instruction Manual

MODEL: E6008

Brand: Hape

## 1. Introduction

The Hape Quadrilla Cyclone Wooden Marble Run (Model E6008) is a comprehensive construction set designed to inspire creativity and develop problem-solving skills. This set features two spiraling funnels, twelve curved rails, and ten power-boosting accelerators, along with 100 marbles, allowing for endless construction possibilities. Made from durable, child-safe materials, it provides an engaging experience for children aged 4 and up, fostering spatial thinking and teamwork.

## 2. Setup

The Quadrilla Cyclone set includes a variety of wooden blocks, tracks, and special components like spiraling funnels and accelerators. To begin construction, refer to the detailed step-by-step instructions provided in the manual. For additional building ideas and interactive guidance, download the official Hape Quadrilla app.

Carefully identify each component using the visual guide. Start by building a stable base, then progressively add layers and tracks according to your chosen design. Ensure all connections are secure to create a smooth path for the marbles.

### 3. Operating Instructions

Once your marble run is assembled, place the marbles at the starting point. Observe as they travel through the intricate paths, spiraling down funnels, accelerating along curved rails, and interacting with various elements. Experiment with different starting points and marble quantities to see varied outcomes. This toy encourages children to explore principles of physics, engineering, and design. The open-ended nature of the set allows for continuous experimentation and modification of the track, promoting creative thinking and problem-solving skills.

## 4. Maintenance

---

The Hape Quadrilla Cyclone is made with durable, child-safe paint finishes and solid wood construction. The surface of the product is made of safe and water-based paint, which does not require disinfection. It can be dissolved in water. Do not use alcohol to wipe, and do not wash the wooden components. Instead, wipe gently with a dry or slightly damp cloth to clean.

## 5. Troubleshooting

---

If marbles get stuck or fall off the track, ensure all connections between blocks and rails are secure and properly aligned. Check for any blockages within the marble paths. If a specific configuration proves unstable, try adjusting the height of the blocks or referring to the instruction manual or the Hape Quadrilla app for alternative, stable designs. Patience and experimentation are key to successful marble run construction.

## 6. Specifications

---

- **Product Dimensions:** 24.41 x 13.39 x 5.43 inches
- **Item Weight:** 14.19 pounds
- **Item Model Number:** E6008
- **Manufacturer Recommended Age:** 4 years and up
- **Materials:** Wood and natural products sourced from sustainably harvested forests, child-safe paint finishes.
- **Components:** Two spiraling funnels, twelve curved rails, ten accelerators, 100 marbles, and various wooden blocks.

## 7. Warranty & Support

---

For detailed warranty information, product registration, or customer support, please visit the official Hape website or contact Hape customer service directly. All Hape products sold in North America meet or exceed all applicable safety standards, ensuring a high-quality and safe play experience.
