WMF Profi Resist Frying Pan

Model: 1756286411 | Brand: WMF

INTRODUCTION

This manual provides essential information for the safe and effective use of your WMF Profi Resist Frying Pan. Please read these instructions carefully before first use and retain them for future reference. This 28 cm frying pan features a multi-layer construction for optimal heat distribution and a durable non-stick coating with a honeycomb structure for enhanced performance and longevity.

SETUP

Unpacking and Initial Cleaning

Upon receiving your WMF Profi Resist Frying Pan, carefully remove all packaging materials and labels. Before first use, wash the pan thoroughly with warm water and a mild dish soap. Rinse completely and dry with a soft cloth. It is recommended to lightly grease the non-stick surface with cooking oil before the first use to condition the coating.

OPERATING INSTRUCTIONS

Stovetop Compatibility and Heat Management

The WMF Profi Resist Frying Pan is designed for use on all stovetops, including:

- Induction
- Gas
- Electric
- Ceramic
- Halogen

The multi-layer construction with an aluminum core ensures fast and even heat distribution, which is beneficial for searing and frying. Use medium heat settings for most cooking tasks to preserve the non-stick coating and prevent overheating. High heat should only be used for short periods, such as preheating for searing.

Non-Stick Performance

The pan features WMF's PermaDur non-stick coating, protected by a raised honeycomb structure. This design helps to reduce wear on the coating and enhances durability. You can cook with less oil or fat due to the non-stick properties. Avoid using metal utensils that could scratch the surface; silicone, wooden, or plastic utensils are recommended.

Oven Use

The WMF Profi Resist Frying Pan is oven-safe up to 260°C (500°F). This allows for versatile cooking, where you can start dishes on the stovetop and finish them in the oven.

Ergonomic Handle and Pouring Rim

The stainless steel handle features a hollow design to minimize heat transfer, ensuring it remains comfortable to hold during normal stovetop cooking. The pan also includes a wide pouring rim, which facilitates easy and drip-free pouring of sauces or liquids.

MAINTENANCE AND CARE

Cleaning

While the pan is officially dishwasher safe, hand washing is recommended to prolong the life and performance of the non-stick coating. Allow the pan to cool completely before washing. Use warm water, a mild dish soap, and a soft sponge or cloth. Avoid abrasive cleaners or scouring pads that can damage the non-stick surface.

Storage

When storing, place a soft cloth or pan protector between pans if stacking to prevent scratches to the non-stick surface.

TROUBLESHOOTING

No specific troubleshooting steps are provided for this product. For general cooking issues, ensure proper heat management and use appropriate cooking oils. If you experience persistent issues, please refer to the Warranty and Support section.

SPECIFICATIONS

| Feature | Detail |
|---------|--------|
|---------|--------|

| | |
|------------------------|---|
| Brand | WMF |
| Model Name | Profi Resist |
| Model Number | 1756286411 |
| Size (Diameter) | 28 cm (11.0 inches) |
| Product Weight | Approx. 1.57 kg (3.3 lbs) |
| Materials | Stainless Steel (main body, handle), Aluminum alloy (bottom core), Fluorine resin coating (inner surface) |
| Coating Description | Non-stick with Fluorine Resin and Honeycomb Structure |
| Stovetop Compatibility | All stovetops, including Induction, Gas, Electric, Ceramic, Halogen |
