Graco SnugRide Click Connect 30/35 LX Infant Car Seat Base Instruction Manual

Model: 1855603 | Brand: Graco

1. PRODUCT OVERVIEW

The Graco SnugRide Click Connect 30/35 LX Infant Car Seat Base provides a secure and convenient foundation for your compatible Graco infant car seat. Designed for ease of use, this base simplifies car seat installation and removal, ensuring a safe travel experience for your child.

Key Features:

- **Click Connect System:** Ensures a one-step secure attachment of the infant car seat to the base.
- **Integrated Belt Lock-Off:** Facilitates easier and more secure seat belt installation.
- **6-Position Dial Adjustment:** Allows for proper recline and easier installation.
- **Easy-to-Read Level Indicator:** Helps eliminate guesswork, ensuring accurate installation.
- **Compatibility:** Specifically designed for Graco SnugRide Click Connect 30 and 35 LX infant car seats.

Note: This base is not compatible with Graco Classic Connect car seats.

2. SETUP AND INSTALLATION

Proper installation of the car seat base is critical for your child's safety. Always refer to your vehicle's owner's manual and the car seat base manual for complete instructions.

Installation Methods:

- **LATCH System:** Utilize your vehicle's lower anchors and tethers for children (LATCH) system for a secure connection.
- **Vehicle Seat Belt:** Use the vehicle's lap or lap/shoulder belt with the integrated belt lock-off for a tight installation.

Installation Steps:

1. Place the car seat base on the vehicle seat.
2. Adjust the 6-position dial to achieve the correct recline angle, indicated by the easy-to-read level indicator. The bubble in the indicator must be within the green zone.
3. Secure the base using either the LATCH connectors or the vehicle's seat belt. Ensure the belt is routed correctly

through the designated path and the integrated belt lock-off is engaged for a tight fit.

4. Press down firmly on the base while tightening the LATCH straps or seat belt to remove all slack. The base should not move more than 1 inch side-to-side or front-to-back at the belt path.

Image: A hand demonstrating the adjustment of the red recline dial on the car seat base, which allows for proper angle setting.

3. OPERATING INSTRUCTIONS

Once the base is securely installed in your vehicle, attaching and detaching the infant car seat is simple with the Click Connect system.

Attaching the Infant Car Seat:

1. Align the infant car seat with the base.
2. Lower the car seat onto the base until you hear a distinct "click" sound, indicating a secure connection.
3. Always check that the car seat is firmly attached to the base by pulling up on the car seat. It should not lift off the base.

Detaching the Infant Car Seat:

1. Locate the release handle on the back of the infant car seat.

2. Squeeze the release handle and lift the infant car seat straight up from the base.

4. MAINTENANCE

Regular cleaning and maintenance will help prolong the life of your car seat base.

Cleaning Instructions:

- **Seat Cushion:** The seat cushion of the infant car seat (not the base) is machine-washable. Refer to the infant car seat manual for specific washing instructions.
- **Metal and Plastic Parts:** These parts of the base may be cleaned with mild soap and water. Wipe clean with a damp cloth and allow to air dry completely.
- **Buckle:** The buckle may be cleaned with a damp cloth. For a more thorough cleaning of the harness buckle:
 - a. Turn the restraint over and push the retainer through the harness strap slot to remove the buckle from the car seat.
 - b. Place the buckle in a cup of warm water upside down and gently agitate the buckle, pressing the red button several times while it is in the water.

- c. Do not submerge the harness webbing and do not use soaps or lubricants. Only rinse the harness buckle with warm water.
- d. Shake out the excess water and allow the harness buckle to air dry.
- e. Reattach the harness buckle into the same slot and re-check harness for correct installation according to the car seat manual before use.

5. TROUBLESHOOTING

If you encounter issues with your Graco SnugRide Click Connect Car Seat Base, consider the following common solutions:

- **Base Not Secure:** If the base moves more than 1 inch at the belt path, re-read the installation instructions carefully. Ensure the LATCH straps or vehicle seat belt are pulled tight and the belt lock-off is engaged. Adjust the recline angle using the dial until the level indicator shows a correct installation.
- **Car Seat Not Clicking into Base:** Ensure the car seat is a Graco SnugRide Click Connect model. Classic Connect car seats are not compatible. Check for any obstructions in the connection points on both the car seat and the base.
- **Difficulty Adjusting Recline Dial:** Ensure the base is not under excessive tension from the vehicle seat belt or LATCH system during adjustment. Loosen slightly if needed, adjust, then re-tighten.

For persistent issues, consult the full product manual or contact Graco customer support.

6. SPECIFICATIONS

Attribute	Detail
Product Dimensions	23.35 x 9.37 x 15.35 inches
Item Model Number	1855603
Material Type	Metal
Number Of Items	1
