Logitech MK270

Logitech MK270 Wireless Keyboard and Mouse Combo User Manual

INTRODUCTION

The Logitech MK270 Wireless Keyboard and Mouse Combo provides a reliable and convenient wireless solution for your computing needs. This combo features a 2.4 GHz wireless connection, offering a range of up to 10 meters with minimal delays or dropouts. Designed for ease of use, it includes a full-size keyboard with media hotkeys and a compact, ambidextrous mouse. This manual provides instructions for setup, operation, maintenance, and troubleshooting to ensure optimal performance of your device.

WHAT'S IN THE Box

Upon opening the package, verify that all components are present:

- Logitech MK270 Wireless Keyboard
- Logitech Wireless Mouse
- USB Nano Receiver
- 2 AAA batteries (for keyboard)
- 1 AA battery (for mouse)

SETUP INSTRUCTIONS

- 1. Install Batteries:** Open the battery compartments on the underside of both the keyboard and the mouse. Insert the included AAA batteries into the keyboard and the AA battery into the mouse, ensuring correct polarity (+/-).
- 2. Connect the USB Receiver:** Locate an available USB port on your computer. Plug the tiny Logitech Nano Receiver into the USB port. The system should automatically detect the receiver and install necessary drivers.
- 3. Power On Devices:** Locate the ON/OFF switch on the top right of the keyboard and on the underside of the mouse. Slide both switches to the 'ON' position.
- 4. Test Connection:** Once powered on, the keyboard and mouse should be ready for use. Test by typing on the keyboard and moving the mouse cursor. If they do not respond, ensure the receiver is securely plugged in and the devices are powered on.

The Logitech MK270 is designed for plug-and-play simplicity and is compatible with Windows 10 or later, Windows 8, 7, Windows Vista, Windows XP, and Chrome OS. It is not Bluetooth compatible.

OPERATING INSTRUCTIONS

Keyboard Features

- Full-Size Layout:** The keyboard features a standard full-size layout with deep-profile, quiet keys for comfortable typing.
- Eight Hot Keys:** Access frequently used functions instantly with the dedicated hotkeys located above the function row. These include controls for movies, music, internet, email, volume adjustment, and play/pause.
- On/Off Switch:** Conserve battery life by using the ON/OFF switch located on the top right of the keyboard when not in use.

Mouse Features

- **Compact and Ambidextrous Design:** The mouse is designed for comfortable control, suitable for both left and right-handed users.
- **Smooth Tracking:** Provides responsive and accurate cursor control.
- **10m Wireless Range:** Maintain a reliable connection up to 10 meters from your computer.
- **Receiver Storage:** The USB Nano Receiver can be conveniently stored inside the mouse when not in use, making it ideal for portability.
- **On/Off Switch:** An ON/OFF switch on the underside of the mouse helps conserve battery power.

COMPACT AMBIDEXTROUS COMFORT

Image: A hand demonstrating the comfortable, compact, and ambidextrous design of the Logitech MK270 mouse.

- 1. Sculpted keyplate
- 2. Ambidextrous design
- 3. 12-month battery life

- 4. 10m range wireless
- 5. Smooth tracking
- 6. Receiver stored in mouse

MAINTENANCE

Battery Management

The Logitech MK270 combo is designed for extended battery life:

- **Keyboard Battery Life:** Up to 36 months (3 years) with typical use.
- **Mouse Battery Life:** Up to 12 months with typical use.

Battery life may vary based on user and computing conditions. To maximize battery life, always use the ON/OFF switches on both the keyboard and mouse when not in use. The devices also feature an auto-sleep function to conserve power during periods of inactivity.

COUNT ON LONG LASTING QUALITY

Cleaning

To clean your devices, use a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the surfaces. Ensure devices are powered off before cleaning.

TROUBLESHOOTING

• No Response from Keyboard/Mouse:

- Ensure both the keyboard and mouse are switched 'ON'.
- Check that the USB Nano Receiver is securely plugged into a working USB port on your computer.
- Replace the batteries in both the keyboard and mouse. Low batteries are a common cause of connectivity issues.
- Try plugging the USB receiver into a different USB port.

• Intermittent Connection or Lag:

- Move the keyboard and mouse closer to the USB receiver. The optimal range is up to 10

meters, but environmental factors (e.g., metal objects, other wireless devices) can reduce this.

- Avoid placing the receiver near other electrical devices that may cause interference (e.g., speakers, monitors, Wi-Fi routers).
- If using a USB hub, try connecting the receiver directly to a USB port on your computer.

- **Hotkeys Not Working:**

- Ensure your operating system is up to date.
- While plug-and-play, some advanced functions or specific hotkey behaviors might benefit from Logitech's optional software, available on their official support website.

SPECIFICATIONS

Brand	Logitech
Model Number	920-004536
Connectivity Technology	Wireless (2.4 GHz Radio Frequency)
Wireless Range	Up to 10 meters (33 feet)
Keyboard Battery Life	Up to 36 months (3 years)
