Moen T8342NHCBN

Moen Commercial Classic Brushed Nickel Posi-Temp Pressure Balancing Shower and Handshower Trim

Model: T8342NHCBN

Brand: Moen

Introduction

This instruction manual provides detailed information for the installation, operation, and maintenance of your Moen Commercial Classic Brushed Nickel Posi-Temp Pressure Balancing Shower and Handshower Trim, Model T8342NHCBN. This trim kit is designed to provide a reliable and consistent shower experience in commercial settings.

The Moen M-Dura heavy-duty commercial tub/shower line is engineered for durability and user safety. It features heavy-duty all-metal construction with a classic brushed nickel finish. When paired with a Moen Posi-Temp pressure-balancing control valve (sold separately), it helps maintain consistent water temperature and pressure, preventing sudden temperature changes.

Product Features

- **Finish:** Brushed Nickel finish provides a lightly brushed warm-grey metallic look, suitable for various commercial decors.
- **Valve Compatibility:** This trim kit requires Moen valves #8731HD and #3360 for complete installation. These valves are sold separately.
- **M-PACT Common Valve System:** Built on the Moen M-PACT common valve system, allowing for future style updates without replacing existing plumbing.

- **Posi-Temp Pressure Balancing:** Designed to work with a Posi-Temp valve (sold separately) to help maintain water pressure and temperature, even when other water sources are in use.
- **ADA Compliant:** Complies with Americans with Disabilities Act (ADA) specifications, ensuring accessibility.
- **Components Included:** Contains a stationary showerhead, a hand-held shower with non-positive pause function, a 69-inch metal hose, a 30-inch slide bar, and a drop ell.

Setup and Installation

Installation of the Moen Commercial Shower Trim requires professional plumbing knowledge. It is recommended that installation be performed by a qualified plumber.

1. **Valve Installation:** Ensure that Moen valves #8731HD and #3360 are properly installed within the wall. These valves are critical for the functionality of the trim kit and are sold separately.
2. **Trim Kit Assembly:** Follow the specific instructions provided with your valve and trim kit for assembling the handles, escutcheons, and other visible components.
3. **Showerhead and Handshower Installation:** Securely attach the stationary showerhead, slide bar, hand-held shower, and metal hose according to the provided diagrams. Ensure all connections are watertight.
4. **Water Supply:** After installation, slowly turn on the main water supply and check for any leaks.

This trim kit is designed for wall-mounted installation. The M-PACT common valve system allows for future style changes without needing to alter the in-wall plumbing.

Operating Instructions

The Moen Commercial Shower Trim features a single handle lever for controlling both water volume and temperature.

- **Turning On/Off:** Rotate the single handle to turn the water flow on or off.
- **Adjusting Temperature:** Rotate the handle counter-clockwise for warmer water and clockwise for cooler water. The Posi-Temp valve (if installed) will help maintain your desired temperature by balancing pressure fluctuations in the hot and cold water lines.
- **Adjusting Volume:** The volume is typically controlled by the degree of rotation of the handle.
- **Handshower Use:** The hand-held shower can be removed from its holder on the slide bar for directed water flow. It includes a non-positive pause function to temporarily reduce water flow.

Maintenance

Regular cleaning and maintenance will help preserve the finish and functionality of your Moen shower trim.

- **Cleaning the Finish:** Clean the brushed nickel finish with a soft, damp cloth and mild soap. Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the finish.
- **Preventing Water Spots:** To minimize water spots, wipe the trim dry after each use.
- **Cartridge Maintenance:** If you experience dripping or inconsistent water flow, the internal cartridge may need inspection or replacement. Moen cartridges are designed for durability, but wear can occur over time.
- **Hose and Handshower:** Periodically check the metal hose for kinks or damage. Ensure the handshower holder is secure and functioning correctly.

Troubleshooting

Problem	Possible Cause	Solution
Water dripping from showerhead/handshower.	Worn or faulty cartridge in the Posi-Temp valve.	Replace the valve cartridge (e.g., Moen 1222B cartridge). Contact Moen customer service for assistance or replacement parts.
Inconsistent water temperature (sudden hot/cold changes).	Pressure imbalance in hot/cold water lines; Posi-Temp valve not functioning optimally.	Ensure the Posi-Temp valve is correctly installed and functioning. If issues persist, the valve cartridge may need inspection or replacement.
Handshower falls off holder.	Holder mechanism worn or not securely tightened.	Inspect the handshower holder on the slide bar. Ensure it is securely fastened. If worn, replacement of the holder component may be necessary.
Low water pressure from showerhead/handshower.	Clogged showerhead/handshower nozzles; water restrictor in handshower.	Clean any mineral deposits from the nozzles. For the handshower, check for and carefully remove any water restrictors if higher flow is desired and permitted by local codes.

For issues not listed here, or if solutions do not resolve the problem, please contact Moen Commercial customer support.

Specifications

Brand: Moen

Model Number: T8342NHCBN

Color: Brushed Nickel

Material: Metal (primarily Brass for handle)

Finish Type: Classic Brushed Nickel

Number of Handles: 1

Mounting Type: Wall Mount

Item Weight: Approximately 6.19 pounds

Product Dimensions: 31.75 x 8 x 5.38 inches

Included Components: Stationary showerhead, hand-held shower with hose, slide bar, drop ell. (Valve sold separately)

UPC: 026508237182

Manufacturer: Moen Incorporated

Installation Method: Wall Mounted
