Olympia P-3230-BN

Olympia Faucets P-3230-BN Three Handle Tub/Shower Set Instruction Manual

Model: P-3230-BN | Brand: Olympia

1. INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your Olympia Faucets P-3230-BN Three Handle Tub/Shower Set. This set is part of the Olympia Elite Collection, featuring a versatile, transitional style with a PVD Brushed Nickel finish designed for durability and aesthetic appeal in any bathroom.

2. SAFETY INFORMATION

Please read all instructions carefully before beginning installation. Observe all local plumbing and building codes. If you are unsure about any part of the installation process, consult a qualified professional. Always turn off the main water supply before attempting any plumbing work.

- Ensure water supply is turned off before installation.
- Wear appropriate personal protective equipment (PPE) such as safety glasses and gloves.
- Do not overtighten connections, as this may cause damage.
- Keep small parts away from children.

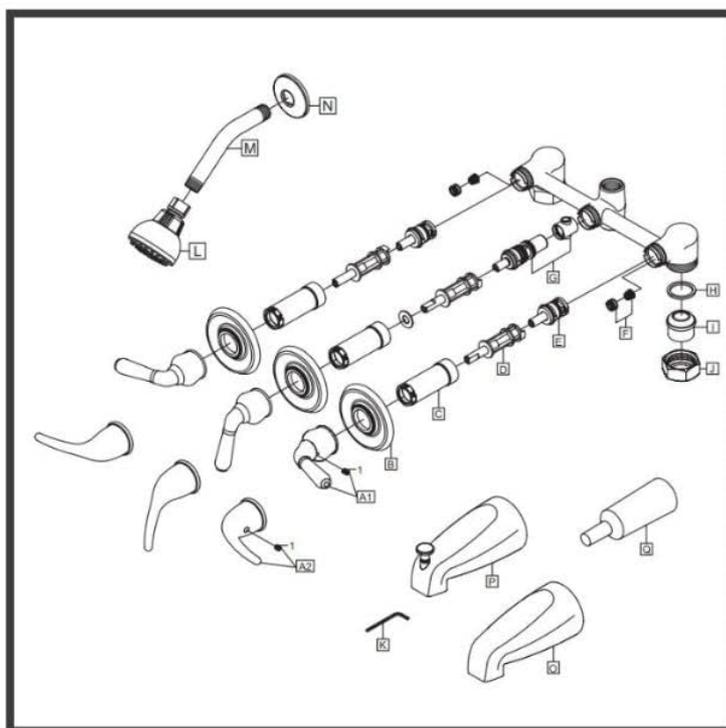

3. PACKAGE CONTENTS

Verify that all components are present before starting installation. The package for the P-3230-BN Tub/Shower Set

typically includes:

- Showerhead
- Shower arm and flange
- Three (3) lever handles (Hot, Cold, Diverter)
- Faceplates/escutcheons for handles
- Tub spout
- 8-inch cast brass valve body
- Installation hardware and seals

4. SETUP AND INSTALLATION

The Olympia P-3230-BN tub/shower set is designed for straightforward installation. A comprehensive, step-by-step guide is provided to ensure quick and easy setup.

Image 4.1: Icon representing easy installation, highlighting the user-friendly design of the product.

4.1 Pre-Installation Steps

1. **Turn off Water Supply:** Locate the main water shut-off valve for your home and turn it off.
2. **Clear Work Area:** Ensure the installation area is clean and free of debris.
3. **Gather Tools:** You will need standard plumbing tools such as a pipe wrench, adjustable wrench, screwdriver, thread sealant tape, and a level.

4.2 Valve Body Installation

The 8-inch cast brass valve body is the core of the system. It should be securely mounted within the wall according to standard plumbing practices. Ensure the valve body is level and at the correct depth relative to the finished wall surface.

4.3 Trim Installation

1. **Install Faceplates:** Attach the escutcheons (faceplates) over the valve openings.
2. **Install Handles:** Secure the hot, cold, and diverter handles onto their respective stems. Ensure they operate smoothly.
3. **Install Tub Spout:** Apply thread sealant tape to the tub spout pipe and thread the tub spout onto the pipe. Tighten securely.
4. **Install Shower Arm and Head:** Thread the shower arm into the wall fitting, ensuring it is tight. Attach the showerhead to the shower arm.

4.4 Post-Installation Check

1. **Turn on Water Supply:** Slowly turn the main water supply back on.
2. **Check for Leaks:** Inspect all connections for any signs of leaks. Tighten if necessary.
3. **Test Operation:** Test the hot, cold, and diverter functions to ensure proper water flow and temperature control.

5. OPERATING INSTRUCTIONS

Your Olympia P-3230-BN tub/shower set features three distinct handles for precise control:

- **Left Handle:** Controls hot water flow. Turn counter-clockwise to increase hot water.
- **Right Handle:** Controls cold water flow. Turn counter-clockwise to increase cold water.
- **Center Handle:** Functions as the diverter. Turn to direct water flow between the tub spout and the showerhead.

Adjust the hot and cold handles to achieve your desired water temperature. Use the center diverter handle to switch between filling the tub and using the shower.

6. MAINTENANCE

To maintain the PVD Brushed Nickel finish and ensure the longevity of your Olympia Faucets tub/shower set, follow these guidelines:

- **Regular Cleaning:** Clean the faucet surfaces regularly with a soft cloth and mild soap.
- **Avoid Harsh Cleaners:** Do not use abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the finish.
- **Rinse Thoroughly:** After cleaning, rinse all surfaces thoroughly with clean water and dry with a soft cloth to prevent water spots.
- **Check for Leaks:** Periodically check for any leaks around the handles or connections and address them promptly.

7. TROUBLESHOOTING

Here are some common issues and their potential solutions:

Problem	Possible Cause	Solution
Low Water Flow	Clogged aerator in showerhead/spout; debris in valve; worn diverter boot.	Clean or replace showerhead/spout aerator. Flush the valve body. Inspect and replace diverter boot if torn.
Leaking from Handles	Worn O-rings or cartridges.	Replace O-rings or cartridges in the affected handle.
Water Not Diverting Properly	Faulty diverter mechanism.	Inspect and replace the diverter stem or cartridge.
Water Temperature Issues	Improper hot/cold water supply; faulty cartridges.	Check hot and cold water supply lines. Replace hot or cold cartridges.

8. SPECIFICATIONS

Feature	Detail
Brand	Olympia
Model Number	P-3230-BN
Color	Brushed Nickel
Material	Brass (Valve Body), Metal (Handles)
Finish Type	PVD Brushed Nickel
