BASF BP-300

ULD BP-300 Fogging Concentrate Instruction Manual

Brand: BASF

PRODUCT OVERVIEW

The ULD BP-300 Fogging Concentrate is a contact insecticide designed for effective pest control. It features 3% pyrethrum with a 16% dual synergist, formulated to address a wide range of insect problems. This product is authorized for use in federally inspected meat and poultry plants and can be applied at full strength or diluted, utilizing various ULD application equipment.

It is classified as a "Prescription Treatment® brand" contact insecticide, following "Formula 1" for its composition.

PRODUCT VISUAL

A white 1-gallon container of ULD BP-300 Fogging Concentrate with a blue and red label. The label provides product name, active ingredients, application instructions, and safety warnings. The container features a handle for easy pouring and a screw-top lid.

KEY FEATURES AND APPLICATIONS

- **Target Pests:** Angoumois Grain Moths, Ants, Boxelder Bugs, Cadelles, Cheese Mites, Cigarette Beetles, Confused Flour Beetles, Crickets, Earwigs, Fruit Flies, Gnats, Granary Weevils, House Flies, Indianmeal Moths, Rice Weevils, Roaches, Spiders, Tobacco Moths, Wasps, and Waterbugs. For a complete list, refer to the product label.
- **For Use In:** Apartments, Cafeterias, Dormitories and Office Buildings, Food Service Storage and Preparation Areas, Grocery and Convenience Stores, Health Care Facilities, Hotels, Motels, Restaurants, Schools, and Universities. Consult the product label for a comprehensive list of approved sites.
- **Application Methods:** This product can be applied through mechanical aerosol or Ultra Low Volume (ULV) cold aerosol generators, such as Whitmire Micro-Gen equipment, as well as thermal and conventional fogging or spraying equipment.
- **Concentration:** Can be used full strength or diluted depending on the specific application requirements.

SETUP AND PREPARATION

Before application, ensure the area is prepared according to the product label's instructions. The ULD BP-300 Fogging Concentrate is suitable for both indoor and outdoor applications as a space, area, or contact spray. The choice of application equipment (e.g., mechanical aerosol, ULV cold aerosol generators, thermal foggers, or conventional sprayers) should be determined by the type of insects to be controlled and the size and nature of the area to be treated. Always ensure your equipment is clean and in good working order before use.

OPERATING INSTRUCTIONS

For detailed and complete application instructions, including dilution rates (if applicable), specific use sites, and pest control strategies, it is imperative to **read and follow the actual product label and accompanying booklet/back panel**. This manual provides general guidance, but the product label contains the legally binding and most comprehensive directions for use. The product is designed for "ULTRA LOW DOSAGE THROUGH MICRON GENERATION" when used with appropriate equipment, ensuring efficient coverage. Key areas covered in the full product label include:

- Specific insects and use sites.
- First Aid measures.
- Precautionary Statements.
- Directions for Use.
- Storage and Disposal instructions.

MAINTENANCE AND STORAGE

Proper storage of ULD BP-300 Fogging Concentrate is essential to maintain its efficacy and ensure safety. Always store the product in its original container, tightly closed, in a cool, dry, well-ventilated area, away from direct sunlight and extreme temperatures. For specific storage conditions and disposal procedures, refer to the "Storage and Disposal" section on the product label. Do not contaminate water, food, or feed by storage or disposal.

TROUBLESHOOTING

Should you encounter any issues during the application or if the product does not perform as expected, first verify that all instructions on the product label have been strictly followed, including correct dilution rates and application methods for the target pest and site. For specific troubleshooting guidance related to pest control efficacy or product behavior, consult the detailed information provided in the full product label or contact BASF Professional Pest Control directly.

SPECIFICATIONS

Attribute	Detail
Brand	BASF
Product Name	ULD BP-300 Fogging Concentrate

Attribute	Detail
Model Number	BP-300
Liquid Volume	1 Gallon (3.78 Liters)
Item Weight	8 Pounds (approx. 3.63 kg)
Target Species	Insects
EPA Registration No.	499-450
EPA Establishment No.	7969-M0-1

Active Ingredients (from product label)

Pyrethrins	3.00%
Piperonyl butoxide, technical	6.00%
n-Octyl bicycloheptene dicarboximide	10.00%
Other Ingredients (Contains Petroleum Distillate)	81.00%
TOTAL	100.00%

Note: 1 gallon contains 0.208 lb of pyrethrins. Piperonyl butoxide consists of 4.80% (butylcarbityl) (6-propylpiperony) ether and 1.20% related compounds. n-Octyl bicycloheptene dicarboximide is MGK-264 Insecticide Synergist.

WARRANTY AND SUPPORT

Please note that no guarantee is either expressed or implied by the seller beyond that indicated by the registrant of the products advertised herein. For any product-specific inquiries, technical support, or to report issues, it is recommended to contact BASF Professional Pest Control directly, as they are the manufacturer and registrant of ULD BP-300 Fogging Concentrate.

Always refer to the official product label for the most accurate and up-to-date information regarding product performance, safety, and any manufacturer-provided assurances.
