JERDON HL88NL

JERDON Wall-Mounted Vanity Mirror with Lights - Model HL88NL Instruction Manual

Model: HL88NL | Brand: JERDON

INTRODUCTION

Thank you for choosing the JERDON Wall-Mounted Vanity Mirror with Lights, Model HL88NL. This manual provides essential information for the safe and efficient installation, operation, and maintenance of your new mirror. Please read it thoroughly before use and retain it for future reference.

SAFETY INFORMATION

CAUTION:

- This mirror is made of glass and may break if not handled properly.
- Always use two hands when mounting and ensure the mirror is securely fastened to the wall.
- Do not force the swivel feature as it may cause the mirror to fall.
- Keep out of reach of children and pets.

PRODUCT FEATURES

- **Wall-Mounted Design:** Modern nickel-finish mirror with a 13.5-inch extendable arm and 4.75" mounting plate.
- **Integrated Lighting:** Features bright, long-lasting LED bulbs for optimal illumination.
- **Dual Magnification:** Two-sided mirror with 1X and 8X magnification for versatile use.
- **360-Degree Swivel:** Allows for easy rotation between magnification levels and viewing angles.
- **Plug-in Operation:** Includes a 6.5-foot coiled power cord for convenient electrical connection.
- **Durable Construction:** Designed with scratch-resistant finishes and robust hardware for lasting quality.

WHAT'S IN THE BOX

- Jerdon Wall-Mounted Vanity Mirror (Model HL88NL)
- Mounting Plate
- Mounting Hardware (screws, anchors)

- 6.5-foot Coiled Power Cord
- Instruction Manual

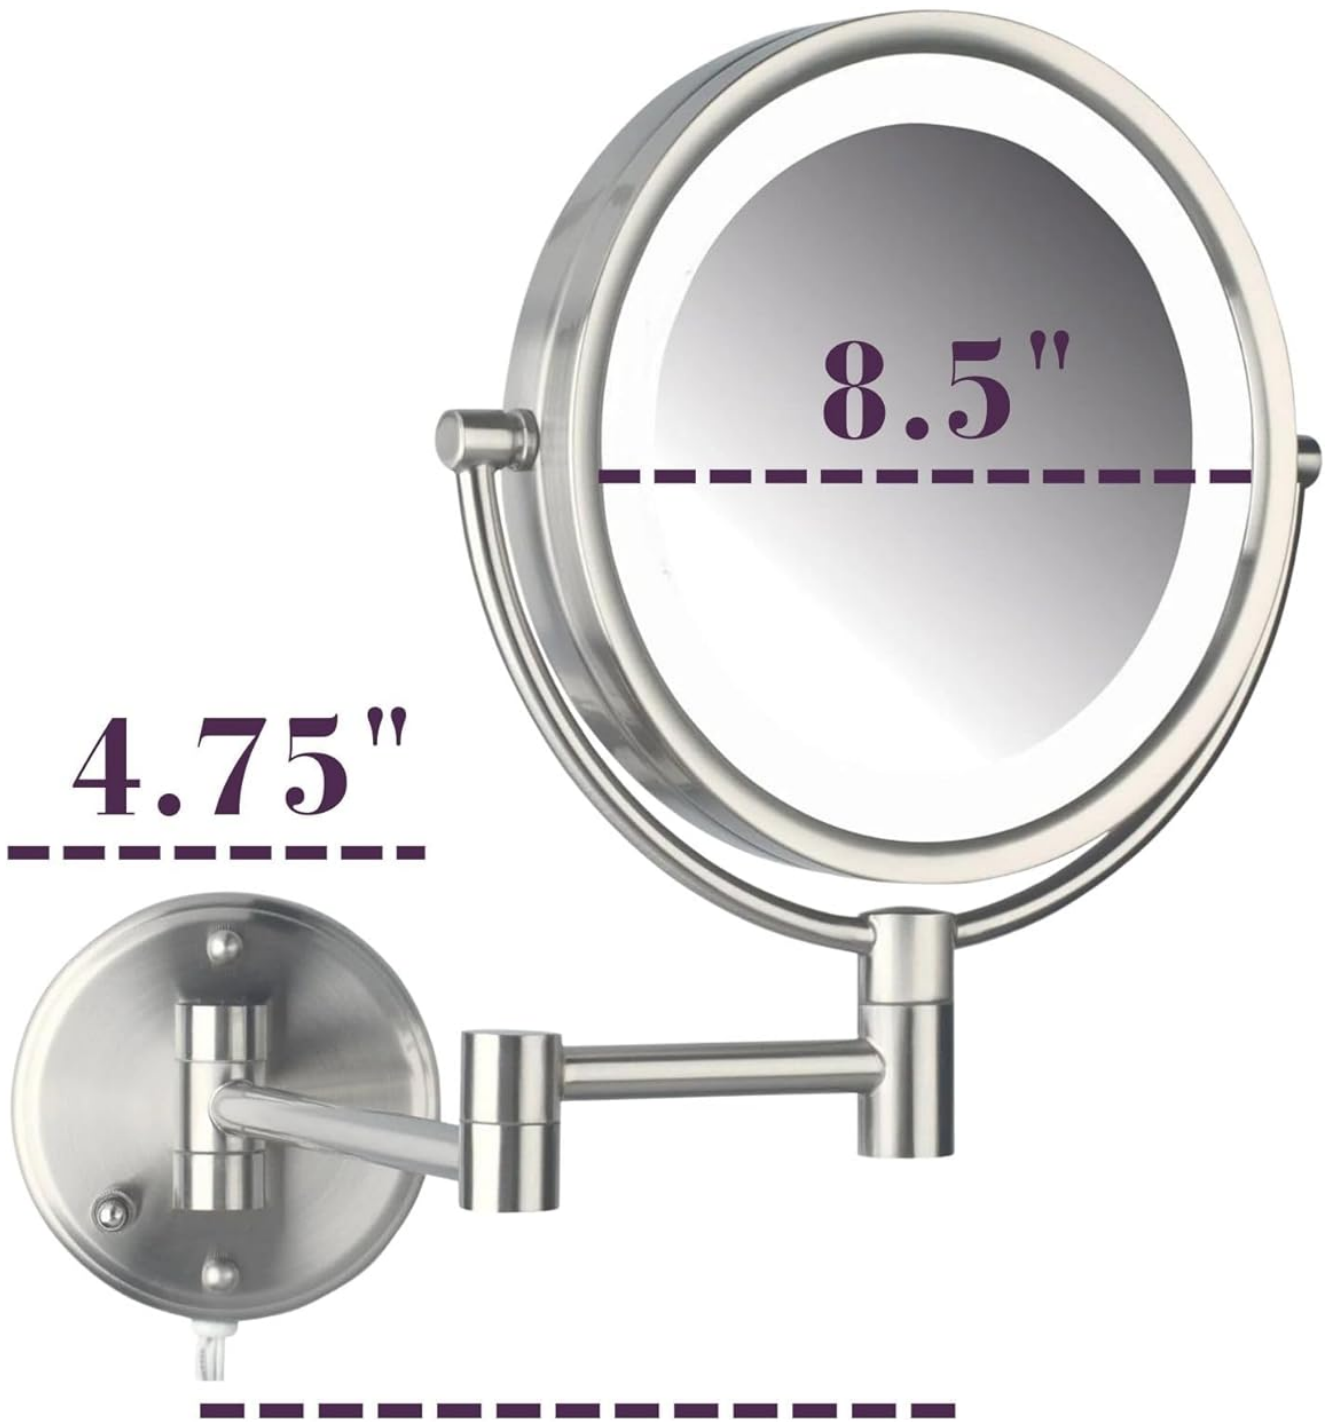

SETUP AND INSTALLATION

Installation of the JERDON Wall-Mounted Vanity Mirror requires careful attention to ensure stability and safety. It is recommended that installation be performed by an individual knowledgeable in mounting fixtures to walls.

1. **Choose Location:** Select a suitable wall location in your bathroom, bedroom, or dressing room. Ensure there is adequate space for the mirror's 13.5-inch extendable arm.
2. **Prepare Mounting Surface:** The mirror comes with a 4.75" mounting plate. If mounting to drywall, use appropriate wall anchors. For optimal stability, mount into a wall stud if possible. Some users have found success with a 4" round hole in drywall and an "old work" electrical box for power tapping.
3. **Secure Mounting Plate:** Attach the mounting plate to the wall using the provided hardware. Ensure it is level and securely fastened. The mounting plate has two screw studs that protrude through the fixture's bezel, secured by two thumb screws.
4. **Connect Power:** This is a plug-in model with a 6.5-foot coiled power cord. Plug the mirror into a standard electrical outlet. Ensure the cord is routed safely and does not pose a tripping hazard.
5. **Attach Mirror to Plate:** Carefully align the mirror's arm assembly with the mounting plate and secure it. Use two hands to handle the mirror during this step.
6. **Test Functionality:** Once installed, gently extend and swivel the mirror to ensure all movements are smooth and secure. Test the light function.

OPERATING INSTRUCTIONS

1. **Extend and Position:** Gently pull the mirror away from the wall using its extendable arm. Adjust the arm and mirror head to your desired position. The arm extends up to 13.5 inches.
2. **Activate Lights:** Locate the switch on the mirror's base or frame (if applicable) to turn the LED lights on or off. The LED lighting provides bright, even illumination.
3. **Switch Magnification:** The mirror features two sides: one with 1X magnification and the other with 8X magnification. Rotate the mirror head 360 degrees to switch between these two views.
4. **Retract Mirror:** When not in use, gently push the mirror back towards the wall to save space.

8X & 1X Magnification

MAINTENANCE

- **Cleaning the Mirror:** Use a soft, lint-free cloth and a non-abrasive glass cleaner to wipe the mirror surfaces. Avoid spraying cleaner directly onto the mirror; instead, apply it to the cloth first.
- **Cleaning the Finish:** For the nickel finish, wipe with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners, as these can damage the finish.
- **LED Bulbs:** The LED bulbs are designed for long-lasting performance and typically do not require replacement. If issues arise, contact customer support.
- **Joints and Swivel:** The mirror's joints are designed for smooth operation. Avoid excessive force when adjusting the mirror. If movement becomes stiff, a small amount of silicone-based lubricant can be applied to the pivot points, avoiding contact with electrical components.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Lights not turning on.	Power cord not plugged in; switch is off; power outage.	Ensure the power cord is securely plugged into a working outlet. Check the on/off switch. Verify power to the outlet.
Mirror feels loose or wobbly.	Mounting screws are loose; improper installation.	Tighten all mounting screws. If the issue persists, re-evaluate the installation method and consider professional assistance.
Arm movement is stiff.	Joints require lubrication or are new.	Gently work the arm back and forth. If needed, apply a small amount of silicone-based lubricant to the pivot points.
Mirror surface is distorted.	This is normal for magnified mirrors at certain distances.	Ensure you are using the correct magnification side (1X for normal view, 8X for close-up). Adjust distance for optimal clarity with the magnified side.

SPECIFICATIONS

- **Brand:** JERDON
- **Model:** HL88NL
- **Color:** Nickel Plug in
- **Product Dimensions:** 14"L x 10"W (Overall), 8" Diameter (Mirror)
- **Extension Arm Length:** 13.5 inches
