LARQ LARQ Bottle Movement

LARQ Bottle Movement PureVis 32 oz User Manual

Model: LARQ Bottle Movement

INTRODUCTION

The LARQ Bottle Movement PureVis is a lightweight, non-insulated stainless steel water bottle featuring innovative UV-C LED technology for water purification and bottle self-cleaning. This system neutralizes bacteria such as E-coli, providing fresh water in 60 seconds and automatically self-cleaning every 2 hours to keep your bottle fresh and odor-free.

SAFETY INFORMATION

- **UV Light Exposure:** Avoid direct viewing of the UV light as it can cause eye damage. The cap has a safety feature that reduces UV LED power when removed from the bottle.
- **Cap Waterproofing:** The cap, which contains the electronics and battery, is not waterproof. Do not submerge the cap in water or wash it conventionally. Clean the cap by wiping it with a damp cloth or alcohol wipe.
- **Water Clarity:** For effective purification, the UV-C LED technology requires clear water. Do not use the LARQ Bottle with turbid or cloudy water, as the UV-C rays may not penetrate effectively.
- **Temperature:** This model is non-insulated. It will not maintain the temperature of hot or cold liquids and may sweat when filled with cold beverages or ice.

PACKAGE CONTENTS

Your LARQ Bottle Movement PureVis package includes:

- LARQ Bottle PureVis Movement (32 oz)

- USB to MicroUSB charging cable
- Quick Start Guide

Image: The LARQ Bottle Movement, its cylindrical packaging, and the included USB to MicroUSB charging cable and quick start guide.

SETUP

1. **Initial Charge:** Before first use, fully charge your LARQ Bottle. Connect the provided MicroUSB cable to the charging port on the cap and plug the other end into a USB power source. Ensure the charging port is dry before connecting the cable. The LED light on the cap will indicate charging status.
2. **First Use:** After charging, rinse the bottle thoroughly with water.

OPERATING INSTRUCTIONS

The LARQ Bottle features two purification modes and an automatic self-cleaning function.

Image: The LARQ Bottle cap detached from the bottle, revealing the UV-C LED light module inside the cap.

Purification Modes:

- **Normal Mode:** Press the button on the cap once. The cap will glow with a pulsing blue light, indicating a 60-second purification cycle. This mode is suitable for daily use with tap water.
- **Adventure Mode:** Press the button on the cap twice. The cap will glow with a pulsing green light, indicating a 3-minute purification cycle. This mode provides a higher level of purification for water from uncertain sources.

Self-Cleaning Function:

- The bottle automatically activates a 10-second purification cycle every 2 hours to keep the bottle interior fresh and clean. This is indicated by a gentle pulsing blue light.

MAINTENANCE

- **Bottle Cleaning:** The LARQ Bottle is designed for hand washing only. Do not place the bottle in a dishwasher. Use mild soap and water for cleaning. Avoid abrasive cleaners or scrubbers that could damage the finish.
- **Cap Cleaning:** As the cap contains electronic components, it should not be submerged in water. Wipe the exterior of the cap with a damp cloth or an alcohol wipe to clean. Ensure the charging port is dry before and after cleaning.

TROUBLESHOOTING

- **Fixed Green Light on Cap:** If the cap displays a fixed green light and the purification function is not working, this may indicate a malfunction. Please refer to the warranty section for support options.
- **Bottle Sweating:** This LARQ Bottle Movement model is non-insulated. It is normal for condensation to form on the exterior when filled with cold liquids or ice. This is not a defect.

SPECIFICATIONS

Brand	LARQ
Model Name	LARQ Bottle Movement
Material	Stainless Steel (bottle), BPA-free plastic (cap)
Bottle Type	Self-cleaning, Non-Insulated, Reusable
Capacity	950 Milliliters (32 Ounces)
