Quorum 151525-8

Quorum International 151525-8 Medallion 52-Inch Flush Mount Patio Ceiling Fan User Manual

Model: 151525-8

1. PRODUCT OVERVIEW

The Quorum International 151525-8 Medallion Ceiling Fan is a 52-inch flush mount fan designed for both indoor and covered outdoor use. It features five Studio White ABS blades and a Studio White finish, offering a low-profile design suitable for various decors. The fan operates with a pull-chain for speed control and reverse function. Optional remote or wall controls are available separately.

This image displays the Quorum International 151525-8 Medallion ceiling fan. It features five Studio White blades attached to a flush-mount motor housing, also in Studio White. The fan is designed for a low-profile installation.

2. SAFETY INFORMATION

Read and understand all instructions before beginning installation. Installation should be performed by a qualified electrician. Always disconnect power at the main fuse or circuit breaker box before installing or servicing the fan. Ensure all electrical connections comply with local codes and ordinances. The fan must be securely mounted to a ceiling joist or a fan-rated outlet box capable of supporting the fan's weight. Do not bend blade holders during installation or cleaning. Keep hands clear of the fan blades when the fan is operating. This fan is UL listed for covered, damp locations.

- Ensure the installation site is suitable for a ceiling fan.
- Use only parts supplied by the manufacturer.
- Do not operate the fan with damaged parts.
- Maintain a minimum clearance of 7 feet from the floor to the fan blades.

3. PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- Fan Motor Assembly (Studio White finish)
- Five (5) ABS Fan Blades (Studio White)
- Mounting Bracket
- Hardware Pack (screws, washers, wire nuts)
- Pull Chain and Fob
- Instruction Manual

4. SETUP AND INSTALLATION

Professional installation is recommended for electrical components. Ensure power is OFF at the circuit breaker before proceeding.

1. **Mounting Bracket Installation:** Secure the mounting bracket to a ceiling joist or a fan-rated outlet box. Ensure it is firmly attached and can support the fan's weight.
2. **Wiring Connections:** Connect the fan's electrical wires to the household wiring according to the wiring diagram provided in the full installation guide. Ensure all connections are secure and insulated with wire nuts.
3. **Fan Assembly Mounting:** Carefully lift the fan motor assembly and attach it to the mounting bracket. Secure it with the provided screws.
4. **Blade Attachment:** Attach each of the five fan blades to the blade holders using the provided screws. Ensure all screws are tightened securely.
5. **Final Checks:** Double-check all connections and ensure no wires are pinched. Restore power at the circuit breaker.

5. OPERATION

The Quorum International 151525-8 Medallion fan is operated via a pull chain.

- **Fan Speed Control:** Pull the chain repeatedly to cycle through the three available fan speeds (High, Medium, Low) and Off.
- **Reverse Function:** A separate switch on the fan motor housing controls the direction of blade rotation. For summer operation, set the switch to circulate air downwards. For winter operation, set the switch to circulate air upwards, which helps redistribute warm air. Ensure the fan is completely stopped before changing the direction switch.
- **Optional Controls:** This fan is compatible with optional remote control (Model 7-3000) or wall control (Model 7-1305-0), which are sold separately. Refer to the instructions provided with these accessories for installation and operation.

6. MAINTENANCE

Regular maintenance ensures optimal performance and extends the life of your ceiling fan.

- **Cleaning:** To clean the fan, wipe with a soft, damp cloth. Do not use abrasive cleaners or solvents, as these may damage the finish or blades.
- **Blade Inspection:** Periodically check the blade screws for tightness. Loose screws can cause wobbling and noise.
- **Motor Lubrication:** The fan motor is permanently lubricated and does not require additional oiling.
- **Electrical Connections:** Annually inspect electrical connections for any signs of wear or loosening. Ensure power is disconnected before inspection.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Fan does not start.	No power to the fan; loose wire connections; pull chain not activated.	Check circuit breaker/fuse. Ensure all wire connections are secure. Pull the chain to cycle through speeds.
Fan wobbles.	Loose blade screws; unbalanced blades; loose mounting bracket.	Tighten all blade screws. Ensure blades are balanced (balancing kit may be needed). Verify mounting bracket is secure.
Noisy operation.	Loose screws; motor hum; blades hitting an obstruction.	Check and tighten all screws. Ensure no parts are rubbing. Allow a break-in period for new motors.
Airflow is weak.	Fan direction set incorrectly for season; fan speed too low.	Adjust the reverse switch for appropriate seasonal airflow. Increase fan speed using the pull chain.

8. SPECIFICATIONS

Model Number:

151525-8

Brand:

Quorum International

Fan Design:

Flush Mount Patio Ceiling Fan

Finish:

Studio White

Blade Color:

Studio White

Number of Blades:

5

Blade Pitch:

14 degrees

Fan Diameter:

52 inches

Height (from ceiling to bottom of fan):

7.5 inches

Motor Size:

153mm x 15mm

Power Source:

Corded Electric (120 Volts)

Wattage (High Speed):

66-67 Watts

Airflow (High Speed):

4850 Cubic Feet Per Minute (CFM)

Airflow Efficiency:

73 Cubic Feet Per Minute per Watt

Speed:

158 RPM

Control Method:

Pull Chain (Optional Remote/Wall Control available separately)

Usage:

Indoor, Outdoor (Damp rated, suitable for covered outdoor use)

Certifications:

UL Listed for covered, damp locations

Item Weight:

18.2 pounds
