Oasis Easy-Vac

Oasis 'Easy-Vac' Suction Cups User Manual

Model: Easy-Vac

INTRODUCTION

Thank you for choosing Oasis 'Easy-Vac' Suction Cups. These versatile suction cups are designed to provide a reliable and temporary attachment solution for various decorations on smooth, non-porous surfaces. Each suction cup features a convenient eyelet for easy attachment of garlands, lights, or other decorative items. Please read this manual carefully to ensure proper installation and use.

PRODUCT OVERVIEW

The Oasis 'Easy-Vac' Suction Cups are transparent, durable, and designed for strong adhesion to smooth surfaces. Each package contains 15 suction cups, each with a diameter of approximately 63 mm (2.5 inches).

Key Features:

- **Quantity:** 15 individual suction cups.
- **Diameter:** Approximately 63 mm (2.5 inches).
- **Material:** Transparent, durable material for strong suction.
- **Attachment Eyelet:** Integrated eyelet for hanging decorations.

- **Application:** Suitable for smooth, non-porous surfaces like glass, metal, and polished plastic.

SETUP AND INSTALLATION

Proper preparation of the surface is crucial for optimal suction. Follow these steps for secure installation:

1. **Clean the Surface:** Ensure the target surface (e.g., window, car body, mirror) is thoroughly clean, dry, and free of dust, grease, or any residues. Use a mild cleaner and dry with a lint-free cloth.
2. **Clean the Suction Cup:** Wipe the suction cup surface with a clean, damp cloth to remove any dust. Ensure it is also dry before application.
3. **Position the Suction Cup:** Place the suction cup firmly against the desired smooth surface.
4. **Apply Pressure:** Press the center of the suction cup firmly against the surface, working outwards to expel all air from underneath. You should see the cup flatten and adhere securely.
5. **Test Adhesion:** Gently tug on the suction cup to confirm it is securely attached before hanging any decorations.

Note: Suction cups work best on perfectly smooth, non-porous surfaces. Textured or porous surfaces will prevent proper adhesion.

OPERATING INSTRUCTIONS

Once the suction cups are securely installed, you can use the integrated eyelets to attach your decorations.

- **Attaching Decorations:** Thread string, wire, or hooks through the eyelet of the suction cup to hang garlands, lightweight signs, small lights, or other decorative items.
- **Weight Limit:** Avoid overloading the suction cups. While designed for stable hold, excessive weight can cause them to detach. Test the hold with your specific decoration before leaving it unattended.
- **Removal:** To remove a suction cup, gently lift one edge to break the vacuum seal. Do not pull directly from the center, as this can damage the cup or the surface.

MAINTENANCE

Regular maintenance ensures the longevity and effectiveness of your Oasis 'Easy-Vac' Suction Cups.

- **Cleaning:** If the suction cups become dirty or lose their grip, wash them with warm, soapy water. Rinse thoroughly and allow them to air dry completely before re-applying.
- **Storage:** Store suction cups in a clean, dry place away from direct sunlight and extreme temperatures when not in use. This helps prevent the material from hardening or degrading.
- **Inspection:** Periodically inspect suction cups for any signs of damage, cracks, or deformation. Replace any damaged cups to ensure secure attachment.

TROUBLESHOOTING

If your suction cups are not adhering properly, consider the following:

- **Suction Cup Not Sticking:**
 - **Surface Cleanliness:** Ensure the surface is perfectly clean, dry, and free of dust, oil, or wax.
 - **Suction Cup Cleanliness:** Clean the suction cup itself with warm, soapy water and dry it

thoroughly.

- **Air Expulsion:** Make sure all air is pressed out from under the cup. Re-apply with firm pressure from the center outwards.
 - **Surface Type:** Confirm the surface is smooth and non-porous. Suction cups will not work on textured, porous, or uneven surfaces.
 - **Temperature:** Extreme cold can make the material less flexible. Allow cups to warm to room temperature if they have been stored in a cold environment.
- **Suction Cup Detaches After Some Time:**
 - **Surface Imperfections:** Microscopic imperfections or dust on the surface can slowly allow air to seep in. Re-clean and re-apply.
 - **Overloading:** The decoration might be too heavy. Reduce the weight or use more suction cups to distribute the load.
 - **Temperature Fluctuations:** Significant temperature changes can affect the vacuum seal. Re-apply if necessary.
