6. CARE AND MAINTENANCE

To maintain the appearance and integrity of your nanoblock model, follow these guidelines:

- **Cleaning:** Gently wipe the assembled model with a dry, soft cloth to remove dust. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the model in a cool, dry place away from direct sunlight to prevent discoloration or material degradation.
- **Handling:** Handle the assembled model with care, as micro-sized blocks can detach if subjected to excessive force.

7. TROUBLESHOOTING

If you encounter issues during assembly or with your nanoblock kit, consider the following:

- **Missing Pieces:** Carefully check the packaging and surrounding area. Due to the small size of the blocks, they can be easily overlooked. If pieces are genuinely missing, contact customer support.
- **Difficulty Assembling:** Re-examine the instruction diagrams. Sometimes rotating the model or viewing the step from a different angle can clarify the placement of pieces. Ensure you are using the correct size and color blocks for each step.
- **Model Instability:** Ensure all blocks are firmly pressed together. If parts repeatedly detach, a small amount of model glue can be used for permanent display models (not recommended if you plan to disassemble and reassemble).
