4. Building Instructions

The nanoblock Pikachu kit is designed for builders aged 8 and up, with a difficulty level rated as 2 out of 5. The assembly process involves connecting micro-sized blocks to create a 3D model.

4.1 General Assembly Tips

- **Organize Pieces:** Due to their small size, it is recommended to sort the nanoblock pieces by color or type before starting. Use a tray or container to prevent loss.
- **Follow Instructions Carefully:** Refer to the included step-by-step instruction sheet. Each step illustrates the placement of blocks.
- **Patience is Key:** Nanoblock assembly requires precision. Take your time and ensure each block is securely placed.
- **Use a Flat Surface:** Assemble the model on a clean, flat, and well-lit surface.

4.2 Step-by-Step Guide

The kit includes a detailed graphical instruction sheet. Follow the numbered steps provided in the physical manual to construct your Pikachu model. Pay close attention to the orientation and color of each block as indicated.

5. Care and Maintenance

Once assembled, your nanoblock Pikachu model requires minimal maintenance.

- **Cleaning:** To remove dust, gently wipe the model with a soft, dry cloth or use a soft brush. Avoid using harsh chemicals or abrasive materials.
- **Handling:** While nanoblocks are designed to interlock securely, some parts, such as the ears and tail of Pikachu, may be more delicate. Handle the finished model with care to prevent pieces from detaching.
- **Storage:** Store the model in a stable location away from direct sunlight or extreme temperatures to preserve its color and structural integrity.

6. Troubleshooting

If you encounter issues during or after assembly, consider the following:

- **Missing Pieces:** Double-check the packaging and your work area thoroughly. If pieces are genuinely missing, contact customer support (see Section 8).
- **Pieces Not Fitting:** Ensure you are using the correct pieces for each step as indicated in the instructions. Sometimes, a slight adjustment in angle or pressure is needed for micro-blocks to connect properly.
- **Model Instability:** If parts of the model feel loose, re-examine the connections in that area. Ensure all blocks are fully pressed together. For delicate parts like ears or tails, gentle handling is advised.
