

## Kumtel LX-2831

# Kumtel Electric Heater LX-2831 User Manual

## 1. IMPORTANT SAFETY INSTRUCTIONS

Please read and understand all safety instructions before operating this electric heater. Failure to follow these instructions may result in electric shock, fire, or personal injury.

- Do not cover the heater or block air inlets/outlets.
- Keep the heater away from water and do not use it in wet or damp environments, such as bathrooms.
- Ensure adequate ventilation around the heater during operation.
- Always unplug the heater from the power outlet when not in use or before cleaning.
- Keep children and pets at a safe distance from the heater.
- Never insert objects into any openings of the heater.
- Place the heater on a stable, flat, and heat-resistant surface.
- Regularly inspect the power cord for any signs of damage. Do not operate the heater with a damaged cord or plug.
- This heater is for indoor use only.

## 2. PRODUCT OVERVIEW

The Kumtel Electric Heater LX-2831 is designed to provide efficient indoor heating. It features three heating tubes, a built-in thermostat for temperature control, and an integrated safety switch for enhanced user protection.

This image shows the Kumtel Electric Heater LX-2831. It features a grey casing, three visible heating tubes emitting orange light, and two control knobs on the right side for operation.

### Key Features:

- **Model:** LX-2831
- **Power:** 1800 Watts
- **Heating Elements:** 3 Tubes
- **Control:** Built-in Thermostat
- **Safety:** Integrated Safety Switch
- **Design:** Floor Mount

### 3. SETUP

1. **Unpack:** Carefully remove the heater from its packaging and inspect for any damage. Retain packaging for

future storage or transport.

- 2. **Placement:** Position the heater on a firm, level, and stable surface. Ensure there is at least 1 meter (3 feet) of clear space around the heater from walls, furniture, curtains, and other combustible materials.
- 3. **Power Connection:** Plug the heater into a standard 220-230V, 50-60Hz electrical outlet. Ensure the outlet is in good condition and not overloaded.

## 4. OPERATING INSTRUCTIONS

The Kumtel Electric Heater LX-2831 features simple controls for ease of use.

- 1. **Power On/Off:** Locate the main power knob or switch on the side of the heater. Turn it to the 'ON' position to activate the heater. Turn to 'OFF' to power down.
- 2. **Heat Settings:** The heater typically offers multiple heat settings by activating one, two, or all three heating tubes. Use the designated control knob to select your desired heat output. For example, one tube for low heat, two for medium, and three for high heat.
- 3. **Thermostat Control:** Use the thermostat knob to set the desired room temperature. The heater will operate until the room reaches the set temperature, then cycle on and off automatically to maintain it. Turn the knob clockwise to increase the temperature setting and counter-clockwise to decrease it.
- 4. **Safety Switch:** This heater is equipped with a safety switch, often a tip-over switch, which automatically turns off the heater if it is accidentally knocked over. Ensure the heater is upright on a stable surface for continuous operation.

## 5. MAINTENANCE

Regular maintenance ensures the longevity and efficient operation of your heater.

- **Cleaning:** Always unplug the heater and allow it to cool completely before cleaning. Wipe the exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners, solvents, or harsh chemicals, as these can damage the heater's finish.
- **Storage:** When not in use, store the heater in a cool, dry place, preferably in its original packaging, to protect it from dust and damage.
- **Inspection:** Periodically check the power cord and plug for any signs of wear or damage. If damage is found, discontinue use and contact a qualified technician.

## 6. TROUBLESHOOTING

| Problem                  | Possible Cause                                                                           | Solution                                                                                                                                                                  |
|--------------------------|------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Heater does not turn on. | No power supply.<br>Safety switch activated (e.g., tipped over).<br>Power switch is off. | Check if the heater is properly plugged in. Test the wall outlet with another appliance. Ensure the heater is upright on a stable surface. Turn the power switch to 'ON'. |

| Problem                   | Possible Cause                                        | Solution                                                                                                                                                            |
|---------------------------|-------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Heater is on but no heat. | Thermostat set too low.<br>Heat setting too low.      | Increase the thermostat setting. Select a higher heat setting (e.g., activate more heating tubes).                                                                  |
| Unusual smell or noise.   | First-time use (dust burning off).<br>Internal fault. | A slight odor on first use is normal and should dissipate. If the smell or noise persists or is strong, immediately unplug the heater and contact customer support. |
