Casio Watch Band Replacement Instruction Manual

For Models SGW-500 and SGW-500H-1B (Band Model: 10431875)

Introduction

This manual provides comprehensive instructions for the installation, usage, and maintenance of the Genuine Casio Replacement Watch Band, model 10431875. This black resin (rubber) strap is specifically designed for Casio SGW-500 and SGW-500H-1B series watches. Adhering to these guidelines will ensure proper fit and extend the lifespan of your watch band.

Setup: Watch Band Installation

Replacing your watch band requires careful attention to ensure a secure fit. It is recommended to use a spring bar tool for this procedure.

Required Tools:

- Spring bar tool (or a small, thin flathead screwdriver)
- New spring bars (if not included with the replacement band)
- Soft cloth or protective surface

Installation Steps:

1. **Prepare Your Workspace:** Place your watch face down on a soft cloth or protective surface to prevent scratches.
2. **Remove the Old Watch Band:**
    - Locate the spring bar at the connection point between the watch lug and the old band.
    - Using the spring bar tool, gently compress one end of the spring bar inward.
    - Carefully pull the old band away from the watch lug to release the spring bar. Repeat for the other side of the band and the second strap piece.
3. **Prepare the New Watch Band:** Insert a spring bar into the channel at one end of the new band piece. Ensure the spring bar is properly seated within the band.
4. **Attach the New Watch Band:**

- Position one end of the spring bar into one of the lug holes on the watch case.
- Using the spring bar tool, compress the other end of the spring bar.
- Align the compressed end with the opposite lug hole and gently release the spring bar, ensuring both ends click securely into place.
- Gently tug on the installed band piece to confirm it is firmly attached and does not easily detach.

5. **Repeat for the Second Band Piece:** Follow steps 3 and 4 to attach the remaining section of the watch band.

Image: The two sections of the genuine Casio black rubber replacement watch band. One section includes the buckle, and the other is the longer strap with adjustment holes. Both pieces feature textured surfaces and integrated end links designed to fit specific Casio watch models.

Image: A detailed view of the Casio black rubber watch band, focusing on the textured surface of the strap and the black buckle mechanism. This perspective shows the quality of the resin material and the design of the buckle for secure fastening.

Operating (Wearing Guidelines)

Once installed, the watch band is ready for use. Proper wearing ensures comfort and longevity.

- **Adjust for Comfort:** Fasten the buckle to a hole that allows the watch to sit comfortably on your wrist without being too tight or too loose. The watch should not slide freely but also not restrict circulation.
- **Secure Closure:** Ensure the buckle pin is fully inserted into the chosen hole and the strap keeper holds the excess strap securely.
- **Avoid Over-tightening:** Excessive tension can cause discomfort, skin irritation, and premature wear on the band material.

Maintenance

Regular cleaning and care will help preserve the appearance and integrity of your resin watch band.

- **Cleaning:** Wipe the band regularly with a soft, damp cloth. For deeper cleaning, use a mild soap solution (e.g., dish soap diluted in water) and a soft brush. Rinse thoroughly with clean water.
- **Drying:** Allow the band to air dry completely after cleaning or exposure to water. Avoid direct sunlight or artificial heat sources, which can degrade the resin material.
- **Avoid Chemicals:** Do not expose the band to harsh chemicals, solvents, or strong detergents, as these can cause discoloration or material degradation.
- **Inspection:** Periodically inspect the band for any signs of wear, cracks, or damage, especially around the spring bar attachment points.

Troubleshooting

If you encounter issues with your replacement watch band, consider the following:

- **Band Does Not Fit:**
    - Verify that your watch model is indeed a Casio SGW-500 or SGW-500H-1B. This band is specifically designed for these models.
    - Ensure the spring bars are correctly seated within the band and aligned with the watch lug

holes.
    - Check if the spring bars themselves are the correct size for your watch and the band.
- **Band Appears Damaged or Breaks Prematurely:**
    - Review your usage and maintenance practices to ensure they align with the guidelines provided.
    - Contact Casio customer support or the retailer for assistance regarding potential defects or warranty claims.

Specifications

Brand	Casio
Band Model Number	10431875
Compatible Watch Models	SGW-500, SGW-500H-1B
Material	Resin (Rubber)
Color	Black
Closure Type	Buckle Closure
Lug Width ('a')	Refer to diagram for measurement
Total Case Width ('b')	Refer to diagram for measurement

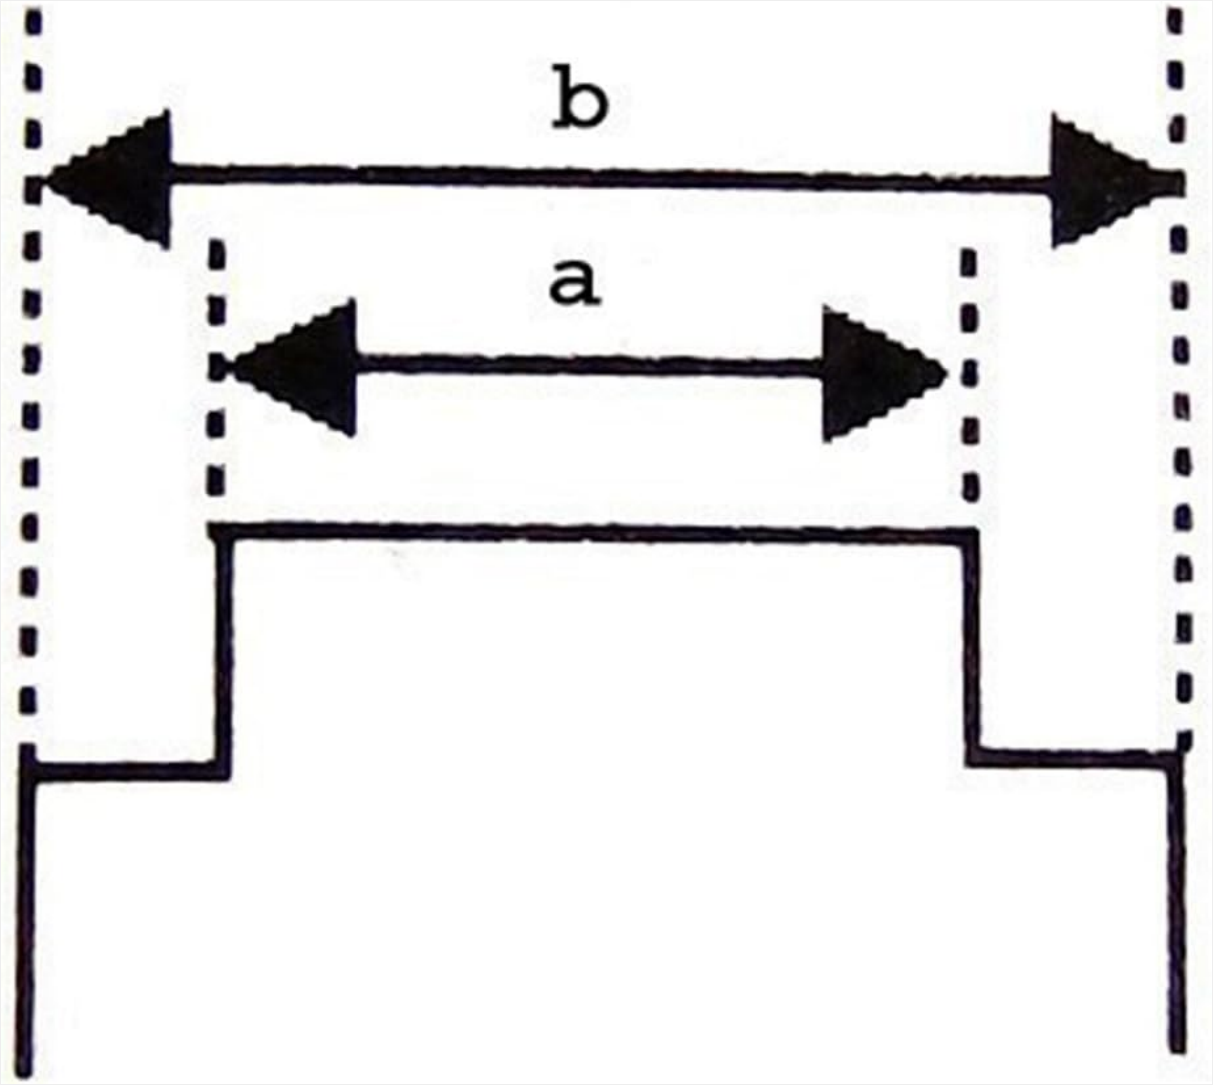

Image: This diagram illustrates key measurements for watch band compatibility. 'a' represents the lug width, which is the distance between the watch lugs where the spring bar connects the band. 'b' represents the total width of the watch case at the attachment point, indicating the overall fit of the band to the watch body.

Warranty and Support

For information regarding product warranty, returns, or additional support, please contact Casio Computer Co., Ltd. directly or the authorized retailer from whom the product was purchased. Keep your proof of purchase for any warranty claims.

Q1

How can I adjust the time of my watch at the time of switching Daylight Saving Time (Summer Time)?

A1

1. If the module no. of your watch is one of following 19 modules, please toggle DST setting (ON or OFF) in Timekeeping mode according to the page of Daylight Saving Time (Summer Time) setting in the operating instruction manual of your watch.
You can download the operating instruction manual directly by clicking the module no. in following.

Module no. (Representative models, Page as DST Setting)

2688 / 2638	(GW-500MTG-900, Page 5)
3054	(WV-58/59, Page4)
3159	(GW-M5610, Page5)
3194	(GLX-6900, Page1)
3263	(GD-100, Page2)
3299	(AE-1200, E-12)
3410	(GW-9400, E-31)

2. If the module no. of your watch is one of following 2 modules, please toggle DST setting (ON or OFF) in Timekeeping mode according to the page of Daylight Saving Time (Summer Time) setting in the operating instruction manual of your watch, and also adjust the analog time according to the page of Analog time adjusting in the operating instruction manual of your watch because it does not work with DST setting.
You can download the operating instruction manual directly by clicking the module no. in following.

Module no. (Representative models, Page as DST Setting, Page as Analog time adjusting)

2747	(AW-80/81, Page1, Page1)
4778	(AW-590/591, Page2, Page2)

3. If the module no. of your watch is not above, please read an operating instruction manual of your watch.
You can download it clicking here.
