Johnson Controls T-4000-119 Adjustment Tool User Manual

Model: T-4000-119

INTRODUCTION

This manual provides comprehensive instructions for the safe and effective use of the Johnson Controls T-4000-119 Adjustment Tool. Please read this manual thoroughly before operating the tool and retain it for future reference. This tool is designed for specific adjustment tasks within Johnson Controls systems.

PRODUCT OVERVIEW

Figure 1: The Johnson Controls T-4000-119 Adjustment Tool. This image displays the tool, which features a blue handle with "JOHNSON CONTROLS" branding, and a slender metallic shaft extending from one end, designed for precise adjustments.

The T-4000-119 is a specialized adjustment tool manufactured by Johnson Controls. It is designed for precise calibration and adjustment tasks within compatible systems. Key features include:

- Part
- Adjustment tool
- Manufactured by Johnson Controls

SETUP

The Johnson Controls T-4000-119 Adjustment Tool requires minimal setup. Ensure the tool is clean and free from debris before use. No assembly is required.

1. **Inspection:** Before each use, visually inspect the tool for any signs of damage, wear, or bending. Do not use a damaged tool.
2. **Cleanliness:** Ensure the tip of the adjustment tool is clean to prevent contamination of sensitive components. Use a dry, lint-free cloth if necessary.
3. **Identification:** Confirm that the tool is indeed the T-4000-119 model, as using an incorrect tool may cause damage to the equipment being adjusted.

OPERATING INSTRUCTIONS

The T-4000-119 Adjustment Tool is designed for specific adjustment points within Johnson Controls equipment. Always refer to the specific equipment's service manual for detailed adjustment procedures.

1. **Identify Adjustment Point:** Locate the specific adjustment screw or mechanism on the equipment that requires the T-4000-119 tool.
2. **Insert Tool:** Carefully insert the tip of the T-4000-119 tool into the adjustment point. Ensure a secure fit to prevent slipping.
3. **Perform Adjustment:** Gently turn the tool clockwise or counter-clockwise as required by the equipment's service manual to achieve the desired adjustment. Make small, incremental turns.
4. **Verify Adjustment:** After making an adjustment, verify the setting according to the equipment's specifications.
5. **Remove Tool:** Once the adjustment is complete and verified, carefully remove the tool from the adjustment point.

Caution: Do not apply excessive force when using the tool, as this may damage the adjustment mechanism or the tool itself. Always follow the specific equipment's guidelines for adjustment.

MAINTENANCE

Proper maintenance ensures the longevity and accuracy of your T-4000-119 Adjustment Tool.

- **Cleaning:** After each use, wipe the tool with a clean, dry, lint-free cloth to remove any dust, dirt, or residue.
- **Storage:** Store the tool in a dry, clean environment, away from extreme temperatures and corrosive substances. Keep it in a protective case or drawer to prevent damage.
- **Inspection:** Periodically inspect the tool for any signs of wear, bending, or damage to the tip or handle. Replace the tool if it shows significant wear or damage that could affect its performance or safety.

TROUBLESHOOTING

This section addresses common issues that may arise during the use of the T-4000-119 Adjustment Tool.

- **Tool does not fit adjustment point:**
 - Ensure you are using the correct T-4000-119 tool for the specific equipment.
 - Check for any obstructions or debris in the adjustment point.
- **Adjustment is difficult or stiff:**
 - Do not force the tool. The adjustment mechanism may be seized or damaged.
 - Consult the equipment's service manual or contact a qualified technician.
- **Tool tip appears bent or damaged:**
 - Discontinue use immediately. A damaged tool can cause further damage to equipment or injury.

- Replace the tool with a new, genuine Johnson Controls T-4000-119.

SPECIFICATIONS

Feature	Detail
Model Number	T-4000-119
Manufacturer	Johnson Controls

Surface-Mounted NS Series Network Sensors with LCD

Installation Guide

Part No. 2410094-9 Rev. 0

2021-05-04

Applications

The surface-mounted NS Series Network Sensor with LCD is an advanced sensor designed to function directly with Johnson Controls' HVAC/Building Management System (BMS) and other compatible systems. It provides real-time monitoring, alarming, and reporting capabilities. The sensor is designed to be installed in a variety of locations, including ceiling, wall, and floor. It is designed to be installed in a variety of locations, including ceiling, wall, and floor. It is designed to be installed in a variety of locations, including ceiling, wall, and floor.

Important:

The surface-mounted NS Series Network Sensor is designed to be installed in a variety of locations, including ceiling, wall, and floor. It is designed to be installed in a variety of locations, including ceiling, wall, and floor. It is designed to be installed in a variety of locations, including ceiling, wall, and floor.

North American emissions compliance

The equipment has been tested and found to comply with the requirements of the FCC Part 15. The equipment is designed to be installed in a variety of locations, including ceiling, wall, and floor. It is designed to be installed in a variety of locations, including ceiling, wall, and floor.

ZFR1831 Pro Series Wireless Router Installation Guide Exhibit D Users Manual per 2 1033 b3 Johnson

Controls Inc ZFRRADIO Digital Transmission System OEJ OEJZFRRADIO zfrradio

ZFR1831 Pro Series Wireless Router Installation Guide Introduction The ZFR1831 Wireless Router (ZFR1831) is a component of the ZFR1831 Pro Series Wireless Field Bus System which provides BACnet or connectivity to compatible Johnson Controls Field Controllers, User Controllers, Thermostats and sensors over a wireless mesh network. The ZFR1831 can be used as a network controller, a field controller, a field controller, or a stand-alone repeater.

Applications

- Important:** Where failure or malfunction of an ZFR1831 or loss of communications due to wireless interference could lead to personal injury or property damage to the controlled equipment or other property, additional precautions must be designed into the control system. Incorporate and maintain other devices, such as supervisory or alarm systems or safety or fire controls, intended to warn of or protect against failure or malfunction of a ZFR1831.
- Important:** The ZFR1831/ZFR1831 Series Wireless Field Bus System is not designed or intended for use in mission-critical or life-safety applications.

North American emissions compliance

United States

Compliance Statement (Part 15.19)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

Warning (Part 15.21)

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Canada

Industry Canada Statement(s)

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- This device may not cause interference, and
- This device must accept any interference, including interference that may cause undesired operation of the device.
