8. TROUBLESHOOTING

Common Issues and Solutions

Problem	Possible Cause	Solution
Keyboard not connecting/pairing.	Bluetooth is off on device; keyboard not in pairing mode; low battery; too far from device.	Ensure Bluetooth is enabled. Put keyboard in pairing mode. Charge/replace batteries. Move keyboard closer to device (within 10m). Try re-pairing.
Keys not responding or delayed input.	Low battery; interference; out of range.	Charge/replace batteries. Move away from other wireless devices. Ensure keyboard is within range.
Incorrect characters typed (e.g., Y and Z swapped).	Device's keyboard layout is set to QWERTY instead of QWERTZ.	Change your device's keyboard input language/layout to German (QWERTZ).
