

Plugable UD-3900

Plugable UD-3900 Universal Laptop Docking Station

USER INSTRUCTION MANUAL

Introduction

This manual provides detailed instructions for setting up, operating, and troubleshooting your Plugable UD-3900 Universal Laptop Docking Station. This docking station is designed to expand the connectivity of your laptop, offering dual HDMI display outputs, multiple USB ports, Gigabit Ethernet, and audio jacks through a single connection to your host computer.

Product Overview

The Plugable UD-3900 is a versatile docking solution for both Windows and Mac laptops. It features a hybrid 2-in-1 USB 3.0 and USB-C cable for broad compatibility.

Figure 1: Front and Rear View of the Plugable UD-3900 Docking Station

What's in the Box:

- Plugable UD-3900 USB Docking Station
- Power Adapter (UL 62368-1 Certified)
- Hybrid 2-in-1 USB 3.0 and USB-C Cable

Packaging

and USB-C cable

Figure 2: Package Contents

Features and Ports

The UD-3900 docking station provides a comprehensive set of ports to expand your laptop's capabilities:

12-in-1 Dual Display Docking Station

Designed for the hybrid workspace

Figure 3: Port Layout and Features

- **Dual HDMI Video Outputs:** Supports resolutions up to 1920x1200 @ 60Hz for two displays. A single HDMI display can reach 2560x1440 @ 50Hz. Note: 4K resolution is not supported.
- **Gigabit Ethernet:** Provides a stable and fast wired network connection.
- **Audio Jacks:** Separate 3.5mm jacks for headphone output and microphone input.
- **USB 3.0 Ports:** Two (2) USB 3.0 ports for high-speed data transfer.
- **USB 2.0 Ports:** Four (4) USB 2.0 ports for connecting various peripherals like keyboards, mice, and printers.
- **Hybrid USB 3.0 / USB-C Cable:** A single cable connects the dock to your host laptop, supporting both USB-A and USB-C ports.

Compatibility

The Plugable UD-3900 docking station is designed for universal compatibility with a wide range of operating systems and devices:

Compatible with

OS Versions

macOS
11+

Windows
10+

ChromeOS
100+

Connection to Host

USB-A

Thunderbolt,
USB-C, USB4

Popular Compatible Systems

M1, M2, M3, M4
MacBooks

Dell Latitude

Lenovo
Thinkpad

Chromebook

*DisplayLink driver required.

Figure 4: Operating System and Device Compatibility

- **Windows:** Compatible with Windows 11, 10, 8.x, and 7. Driver installation is typically plug-and-play via Windows Update.
- **macOS:** Compatible with macOS 10.14 or later. A manual DisplayLink driver installation is required. Instructions are provided with the product.
- **ChromeOS:** Compatible with ChromeOS 100 or later, requiring no additional setup.
- **Incompatible Systems:** Not compatible with Linux/Unix systems. Does not support some non-DisplayLink adapters, DisplayPort connections, or HDCP protected content.

Setup Guide

Follow these steps to set up your Plugable UD-3900 docking station:

1. **Connect Power:** Connect the included power adapter to the DC 5V/4A input port on the back of the docking station, then plug the adapter into a wall outlet.
2. **Connect to Host Laptop:** Use the provided hybrid 2-in-1 USB 3.0 and USB-C cable to connect the docking station to an available USB 3.0 (USB-A) or USB-C port on your laptop.
3. **Install Drivers (if necessary):**
 - For Windows: Drivers typically install automatically via Windows Update upon first connection.

- For macOS: A manual DisplayLink driver installation is required. Please refer to the included instructions or the Plugable support website for the latest driver and installation guide.
 - For ChromeOS: No additional driver installation is needed.
4. **Connect Monitors:** Connect your HDMI monitors to the two HDMI output ports on the back of the docking station using HDMI cables.
 5. **Connect Peripherals:** Plug your USB devices (keyboard, mouse, external drives), Ethernet cable, and audio devices into the corresponding ports on the docking station.

Operating Instructions

Display Configuration:

Once connected, your operating system should detect the external monitors. You can configure your display settings (extend, duplicate, or primary display) through your computer's display settings. For optimal performance, ensure your display drivers are up to date.

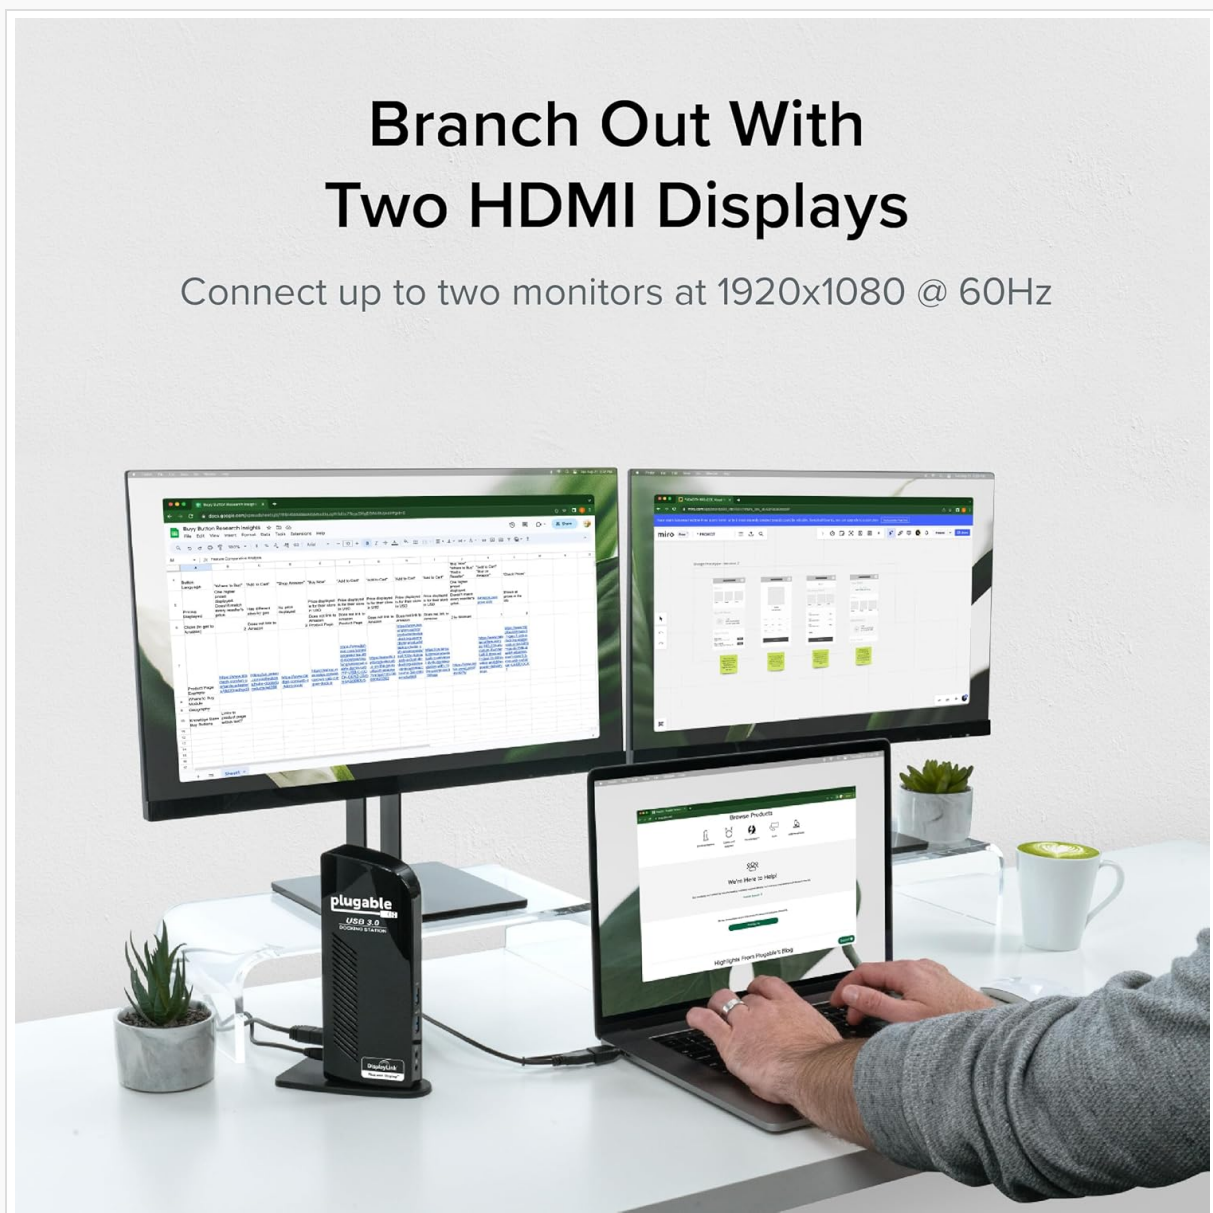

Figure 5: Dual Monitor Setup Example

Laptop Charging:

Important Note: This USB docking station does not charge the host laptop.

An external power supply is needed to charge your host system. The docking station provides power to its own internal components and connected USB peripherals, but not to the laptop itself.

Figure 6: Dock Does Not Charge Laptop

Usage Recommendations:

The UD-3900 is ideal for web browsing, productivity software, and general office tasks. It is not recommended for gaming or applications requiring high-performance graphics due to the nature of DisplayLink technology.

Maintenance

To ensure the longevity and optimal performance of your docking station:

- Keep the device in a clean, dry environment.
- Avoid exposing the device to extreme temperatures or direct sunlight.
- Do not block the ventilation slots on the sides of the docking station.
- Clean the exterior with a soft, dry cloth. Do not use liquid cleaners or aerosols.
- Disconnect the power adapter when the device is not in use for extended periods.

Troubleshooting

If you encounter issues with your Plugable UD-3900 docking station, please refer to the following common solutions or consult the official troubleshooting guide:

- **No Display Output:** Ensure all cables (power, host, HDMI) are securely connected. Verify that the correct DisplayLink drivers are installed and up to date for your operating system. Try restarting your computer.
- **USB Devices Not Working:** Confirm the docking station is powered on and connected to your host. Try connecting the USB device to a different port on the dock or directly to your computer to isolate the issue.
- **Network Connectivity Issues:** Check the Ethernet cable connection to both the dock and your router/modem. Verify network settings on your computer.
- **Audio Problems:** Ensure speakers/headphones are properly connected to the audio output jack. Check your computer's sound settings to confirm the docking station's audio output is selected as the default device.
- **Driver Issues:** If displays are not functioning correctly, reinstall the DisplayLink drivers. For macOS, manual installation is always required.

For more detailed troubleshooting steps, you can refer to the official [Troubleshooting Guide \(PDF\)](#).

Safety Information:

Standard USB ports on the docking station are not primarily designed for charging USB devices. While some devices may charge in certain scenarios, USB device charging behavior can vary. For detailed information on device-specific charging behaviors, please consult the product listing page on the Plugable website.

Specifications

Feature	Specification
Model Number	UD-3900
Connectivity to Host	Hybrid USB 3.0 (USB-A) and USB-C
Video Outputs	2x HDMI
Max Resolution (Dual Display)	1920x1200 @ 60Hz
Max Resolution (Single Display)	2560x1440 @ 50Hz
USB Ports	2x USB 3.0, 4x USB 2.0 (Total 6 USB Ports)
Ethernet	Gigabit Ethernet
Audio	3.5mm Headphone Output, 3.5mm Microphone Input
Power Source	DC Power Adapter (20 watts)
Dimensions (LxWxH)	6.45 x 3.22 x 4.02 inches
Item Weight	13 ounces
Hardware Platform	PC

Warranty and Support

Every Plugable product, including the UD-3900 docking station, is covered against defects for **2 years** from the date of purchase. Plugable also provides **lifetime technical support** for its products.

If you have any questions or require assistance, please do not hesitate to contact the Plugable North American-based support team. You can find contact information and additional resources on the official Plugable website or by visiting the [Plugable Store on Amazon](#).

Plugable USB-C Triple Display Dock

UD-ULTCDL

Features

- **NOT macOS COMPATIBLE** - (10.13.4 - 10.13.6)
UD-ULTCDL is compatible with specific Thunderbolt 3 or USB-C Windows systems such as the Microsoft Surface Book 2, Surface Go, Dell XPS 9302 / 9300 / 9310 / 9300 / 9300, Lenovo Yoga 720 13" 8, Carbon X1 30th Gen, or at 13" HP Spectre x360 models.
- **COMPATIBILITY** - Advanced features of the UD-ULTCDL such as host-charging and 78W Master video output must be supported by host system to function. As such, dock is not compatible with legacy USB 3.0/USB-A* systems. Not all systems with USB-C ports support charging or video output, please see Technical Specifications PDF below for most up-to-date system compatibility list. Not recommended for gaming, HDCP not supported.

Features

- **NOT macOS COMPATIBLE** - (10.13.4 - 10.13.6)
UD-ULTCDL is compatible with specific Thunderbolt 3 or USB-C Windows systems such as the Microsoft Surface Book 2, Surface Go, Dell XPS 9302 / 9300 / 9310 / 9300 / 9300, Lenovo Yoga 720 13" 8, Carbon X1 30th Gen, or at 13" HP Spectre x360 models.
- **COMPATIBILITY** - Advanced features of the UD-ULTCDL such as host-charging and 78W Master video output must be supported by host system to function. As such, dock is not compatible with legacy USB 3.0/USB-A* systems. Not all systems with USB-C ports support charging or video output, please see Technical Specifications PDF below for most up-to-date system compatibility list. Not recommended for gaming, HDCP not supported.
