SodaStream Source Sparkling Water Maker Starter Kit User Manual

Model: 1519511010

INTRODUCTION

The SodaStream Source Sparkling Water Maker allows you to transform ordinary tap water into fresh, great-tasting sparkling water or soda in seconds. This manual provides essential information for the safe and efficient use of your new appliance.

Image: The SodaStream Source Sparkling Water Maker, a sleek black device with a clear carbonating bottle attached, ready for use.

SETUP

1. Unboxing and Component Identification

Carefully remove all components from the packaging. Ensure you have the SodaStream Source machine, a carbonating bottle, and a CO2 cylinder.

2. Installing the CO2 Cylinder

To install the CO2 cylinder, first remove the back cover of the SodaStream Source machine. Insert the CO2 cylinder into the designated compartment, twisting it clockwise until it is firmly secured. Replace the back cover.

Image: The SodaStream Source machine shown alongside a SodaStream CO2 cylinder, illustrating the components involved in the setup.

3. Attaching the Carbonating Bottle

Fill the carbonating bottle with cold tap water up to the fill line. Pull the bottle rest forward until it clicks. Insert the bottle into the snap-lock mechanism and push it up and back until it is firmly held in place. The bottle should be upright and centered.

OPERATING INSTRUCTIONS

1. Carbonating Water

With the bottle securely attached, firmly press down on the carbonating block at the top of the unit. Hold for 1-2 seconds, then release. Repeat this process 3-5 times for desired carbonation level. Three LED

indicators on the machine will light up to show the carbonation strength (one light for light fizz, three for strong fizz).

Image: A step-by-step diagram illustrating the five easy steps to make sparkling water with the SodaStream Source, from inserting the bottle to carbonating and adding flavor.

2. Releasing Pressure and Removing Bottle

Once carbonation is complete, gently pull the bottle rest forward to release the bottle. The bottle will automatically disengage from the snap-lock mechanism.

3. Adding Flavors (Optional)

Always add flavors after carbonation, never before, as this can cause overflow and damage the machine. Pour the desired amount of syrup into the carbonated water and gently mix.

MAINTENANCE

1. Cleaning the Machine

Wipe the exterior of the SodaStream Source machine with a damp cloth. Do not immerse the machine in water or place it in a dishwasher. Avoid abrasive cleaners.

2. Cleaning Carbonating Bottles

Wash carbonating bottles with lukewarm water and a mild dish soap. Use a bottle brush for thorough cleaning. Do not wash bottles in hot water or in a dishwasher, as this can damage the plastic and compromise their integrity. Allow bottles to air dry completely.

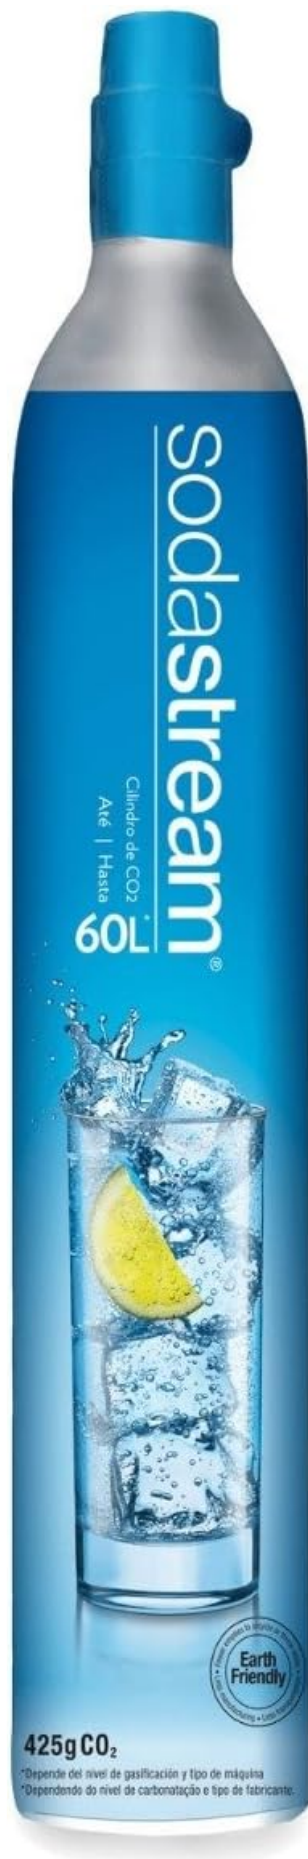

Image: A collection of SodaStream carbonating bottles, emphasizing the importance of proper care and cleaning for longevity.

3. CO2 Cylinder Replacement

When the CO2 cylinder is empty, you will notice a decrease in carbonation strength or no carbonation at

all. To replace, follow the installation steps in the 'Setup' section in reverse to remove the empty cylinder, then insert a new one. Empty cylinders can often be exchanged for full ones at authorized retailers.

TROUBLESHOOTING

- **No Carbonation or Weak Carbonation:**
Ensure the CO2 cylinder is properly installed and not empty. If the cylinder is new, ensure it is fully tightened. If the issue persists, the cylinder may be faulty or empty.
- **Water Overflowing During Carbonation:**
Ensure the carbonating bottle is filled only to the indicated fill line. Overfilling can cause water to overflow. Also, ensure you are only carbonating plain water; never carbonate liquids with added flavors or syrups.
- **Difficulty Attaching/Detaching Bottle:**
Ensure the bottle rest is pulled forward before inserting or removing the bottle. The bottle should snap securely into place. Do not force the bottle.
- **Machine Not Functioning:**
The SodaStream Source is a manual device and does not require electricity or batteries for carbonation. If the LED indicators are not lighting up, this may indicate an issue with the internal battery for the lights, but it should not affect carbonation.

SPECIFICATIONS

Model Name	1519511010
Brand	sodastream
Capacity	12 Liters (total soda mix yield)
Power Source	Manual
Operation Mode	Automatic (carbonation release)
Product Dimensions	10 x 5.5 x 17 inches
Item Weight	7.73 pounds
Material	Plastic
Color	Black

WARRANTY AND SUPPORT

The SodaStream Source Sparkling Water Maker comes with a product warranty. For detailed warranty information and terms, please refer to the documentation included with your purchase or visit the official SodaStream website.
