SodaStream Genesis Home Soda Maker Instruction Manual

This manual provides comprehensive instructions for the setup, operation, maintenance, and troubleshooting of your SodaStream Genesis Home Soda Maker.

INTRODUCTION

The SodaStream Genesis Home Soda Maker is designed to transform ordinary tap water into sparkling water or soda in seconds. This system offers a convenient and efficient method for preparing carbonated beverages at home, reducing the need for store-bought bottles and cans.

The Genesis model operates without electricity or batteries, relying on a CO2 cylinder to carbonate water. This manual will guide you through the process of setting up your device, carbonating water, and maintaining your SodaStream Genesis for optimal performance.

SETUP INSTRUCTIONS

- 1. Unpack the Device:** Carefully remove all components from the packaging. Ensure you have the SodaStream Genesis unit, a carbonating bottle, and a CO2 cylinder.
- 2. Install the CO2 Cylinder:**
 - Place the SodaStream Genesis on a flat, stable surface.
 - Remove the back cover of the soda maker by pressing the release button (if applicable, specific to model).
 - Unscrew the cap from the CO2 cylinder.
 - Insert the CO2 cylinder into the back compartment, screwing it in firmly until it is secure. Do not overtighten.
 - Replace the back cover.

Image: The SodaStream Genesis Home Soda Maker with a carbonating bottle inserted and a CO2 cylinder shown separately. The CO2 cylinder features a label indicating it's a SodaStream mini CO2 cartridge, with instructions to swap for a full-size exchange carbonator when empty.

Video: Demonstrates the process of installing a CO2 cylinder into a SodaStream unit. The user removes the back panel, inserts the cylinder, and secures it before replacing the panel.

OPERATING INSTRUCTIONS

1. Prepare the Carbonating Bottle:

- Fill the SodaStream carbonating bottle with cold tap water up to the fill line. Do not overfill.
- Ensure the water is cold, as colder water carbonates more effectively.

2. Attach the Bottle:

- Twist the carbonating bottle into the soda maker's bottle rest until it is securely locked in place.
- The bottle should be upright and centered.

3. Carbonate the Water:

- Press the carbonating button located on the top of the machine firmly for 1-2 seconds, then release.
- Repeat this process 3-5 times for standard carbonation, or more for a stronger fizz. You will hear a buzzing sound as the CO2 is released into the water.

Your browser does not support the video tag.

Video: Shows a user filling a SodaStream bottle with water, attaching it to the machine, and pressing the carbonation button to create sparkling water. Bubbles are visible during the carbonation process.

4. Remove the Bottle:

- Once carbonation is complete, gently twist the bottle counter-clockwise to release it from the machine.
- A small amount of excess CO2 may be released, which is normal.

5. Add Flavors (Optional):

- If desired, add SodaStream flavor syrups or other flavorings to your carbonated water. **Always add flavors after carbonation** to prevent foaming and potential damage to the machine.
- Gently mix the flavor into the water.

MAINTENANCE

- **Cleaning the Machine:** Wipe the exterior of the SodaStream Genesis with a damp cloth. Do not immerse the machine in water or use abrasive cleaners.
- **Cleaning Carbonating Bottles:** Wash carbonating bottles with lukewarm water and a mild dish soap. Do not wash in a dishwasher unless explicitly stated as dishwasher-safe on the bottle. Avoid hot water, as it can damage the bottle.
- **CO2 Cylinder Replacement:** When the CO2 cylinder is empty (you will notice a decrease in fizz or no carbonation), replace it with a new SodaStream CO2 cylinder. Empty cylinders can often be exchanged for full ones at participating retailers.
- **Storage:** Store the SodaStream Genesis in a cool, dry place away from direct sunlight and heat sources.

TROUBLESHOOTING

No Fizz or Weak Carbonation:

- Ensure the CO2 cylinder is properly installed and not empty.
- Verify the carbonating bottle is securely attached to the machine.
- Confirm the water used is cold.
- Press the carbonating button firmly and hold for the recommended duration (1-2 seconds per press), repeating 3-5 times.

Water Leaking During Carbonation:

- Check that the carbonating bottle is filled only to the fill line and not overfilled.
- Ensure the bottle is securely twisted into the machine.
- Do not carbonate anything other than plain water.

Machine Not Operating:

- Since the Genesis model does not require electricity or batteries, ensure the CO2 cylinder is correctly installed and has gas.
- If issues persist, contact SodaStream customer support.

PRODUCT SPECIFICATIONS

Feature	Detail
Model Name	Genesis
Item Model Number	1317512017
Brand	SodaStream
Color	Black and Silver
Material	Plastic
Product Dimensions (L x W x H)	9.2 x 5.3 x 16.4 inches
Item Weight	6.14 pounds
Power Source	Manual (No electricity or batteries required)
CO2 Cylinder Capacity	60 or 130 liters (depending on cylinder type)
UPC	811369006899
ASIN	B00ETUNPM2

WARRANTY AND SUPPORT

The SodaStream Genesis Home Soda Maker comes with a product warranty and a money-back satisfaction guarantee. For specific details regarding your warranty coverage, including terms and conditions, please refer to the documentation included with your product or visit the official SodaStream website.

For technical assistance, troubleshooting beyond the scope of this manual, or to inquire about replacement parts and CO2 cylinder exchanges, please contact SodaStream customer support. Contact information can typically be found on the product packaging or the official SodaStream website.
