Balboa Water Group 11725

Balboa MVP260 Control Panel Overlay User Manual

Model: 11725

INTRODUCTION

This manual provides essential information for the installation, operation, and maintenance of your Balboa MVP260 Control Panel Overlay (Model 11725). This overlay is designed to replace or upgrade the existing overlay on compatible Balboa MVP260 spa control panels, featuring dedicated buttons for two jet functions, temperature control, and lighting.

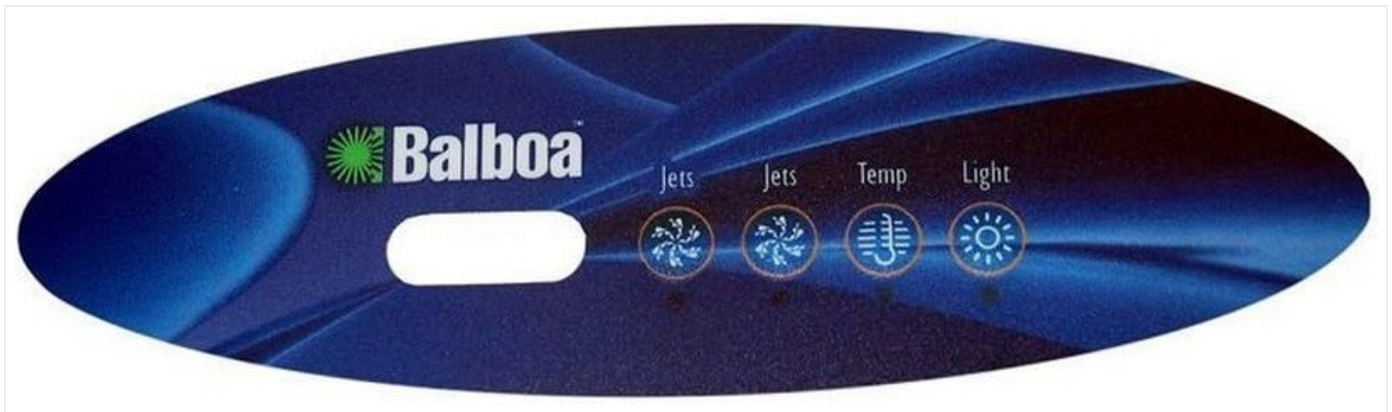

Figure 1: Balboa MVP260 Control Panel Overlay (Model 11725) showing the button layout for Jets, Temp, and Light functions.

SETUP AND INSTALLATION

The Balboa MVP260 Control Panel Overlay is an adhesive-backed decal designed to be applied directly over the existing control panel. Proper installation ensures longevity and functionality.

Before Installation:

- Ensure the spa's power is turned off at the circuit breaker to prevent accidental activation during installation.
- Clean the surface of the existing control panel thoroughly. Use a mild, non-abrasive cleaner to remove any dirt, grease, or residue. Allow the surface to dry completely.
- Verify that the new overlay matches the button configuration of your existing Balboa MVP260 control panel. This overlay features two "Jets" buttons, one "Temp" button, and one "Light" button.

Installation Steps:

1. Carefully peel off a small portion of the adhesive backing from one edge of the new overlay.
2. Align the overlay precisely with the corresponding buttons and display window on your control panel. Take your time to ensure perfect alignment.
3. Once aligned, slowly and steadily peel off the remaining adhesive backing while pressing the overlay firmly onto the panel surface. Use a soft cloth to smooth out any air bubbles, working from the center outwards.
4. Ensure all edges are securely adhered to prevent moisture ingress.
5. Allow the adhesive to set for at least 24 hours before exposing the panel to water or heavy use, if possible.

OPERATING INSTRUCTIONS

The Balboa MVP260 Control Panel Overlay provides clear labels for the functions of your spa's control panel. The actual operation of these functions is managed by the underlying control system.

Button Functions:

- **Jets 1:** Activates or deactivates the primary jet pump. Press once to turn on, press again to turn off or cycle through speeds (if applicable to your system).
- **Jets 2:** Activates or deactivates the secondary jet pump (if equipped). Press once to turn on, press again to turn off or cycle through speeds.
- **Temp:** Used to adjust the desired water temperature. Typically, pressing this button allows you to use up/down arrows (usually located near the display) to set the temperature.
- **Light:** Turns the spa's internal lighting system on or off. Some systems may cycle through different light modes or colors with multiple presses.

For detailed instructions on specific operational modes, programming, or advanced features, please refer to the complete user manual for your Balboa spa control system.

CARE AND MAINTENANCE

To ensure the longevity and appearance of your Balboa MVP260 Control Panel Overlay, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the overlay surface regularly with a soft, damp cloth. For stubborn dirt, use a mild, non-abrasive cleaner. Avoid harsh chemicals, abrasive pads, or solvents, as these can damage the overlay's finish and adhesive.
- **Protection:** Protect the overlay from direct, prolonged sunlight exposure if possible, as UV rays can cause fading over time.
- **Avoid Punctures:** Do not use sharp objects near the overlay, as this can scratch or puncture the surface, compromising its integrity and appearance.

TROUBLESHOOTING

The control panel overlay itself is a passive component and does not typically malfunction. Most issues related to button responsiveness or display problems are due to the underlying control panel or spa system.

Common Issues and Solutions:

Problem	Possible Cause	Solution
Buttons not responding	Underlying control panel issue, loose connection, or power problem.	Ensure spa has power. Consult your spa's main control system manual for troubleshooting unresponsive buttons. Contact a qualified spa technician if the issue persists.
Overlay peeling or bubbling	Improper initial adhesion, exposure to extreme temperatures, or chemical damage.	Ensure proper surface preparation during installation. If minor, try to re-adhere by pressing firmly. If severe, the overlay may need replacement.
Fading or discoloration	Prolonged exposure to direct sunlight or harsh chemicals.	Protect the spa from direct sunlight when not in use (e.g., with a spa cover). Use only mild cleaners for maintenance.

For issues not related to the overlay's physical integrity, refer to your spa's primary control system manual or contact a certified spa technician.

SPECIFICATIONS

Feature	Detail
Brand	Balboa Water Group
Model Name	MVP260
Part Number	11725
Type	Control Panel Overlay / Decal
Button Configuration	2 Jets, 1 Temp, 1 Light
Material	Acrylic
