1. INTRODUCTION

The Vktech 5-in-1 Professional Stainless Steel Wax Clay Carving Sculpture Tools Set provides a versatile collection of instruments for various artistic and crafting projects. Each tool features two distinct heads, offering flexibility for detailed work in clay, wax, and other sculpting mediums. This set is designed for tasks such as scraping, smoothing, shaping, and sculpting. It includes five stainless steel tools and a black PU leather pouch for convenient storage and transport.

2. PRODUCT OVERVIEW

This set includes five double-ended stainless steel tools, each designed for specific sculpting and carving tasks, along with a protective carrying pouch.

Package Contents:

- 5 x Stainless Steel Sculpting Tools
- 1 x PU Leather Zipper Pouch

3. SETUP

The Vktech sculpting tools are ready for immediate use upon removal from their packaging. No assembly or special preparation is required.

1. Unzip the PU leather pouch.
2. Carefully remove the desired tool from the pouch.
3. Ensure the tool's tips are clean before beginning work.

Always handle the tools with care due to their sharp and pointed ends.

4. OPERATING INSTRUCTIONS

These tools are designed for precision work in various sculpting and carving applications. Each tool features different tip shapes to accommodate a wide range of techniques.

General Usage:

- **Scraping:** Use flat or angled ends to remove excess material or create smooth surfaces.
- **Smoothing:** Gently glide broader, rounded ends over surfaces to refine texture.
- **Shaping:** Employ curved or pointed tips to define contours and create specific forms.
- **Sculpting:** Utilize various tips for detailed carving, etching, and adding fine details to your artwork.

Experiment with different tool ends to discover their optimal application for your specific material (wax, clay, etc.) and desired effect. Always apply appropriate pressure to avoid damaging the material or the tool.

5. MAINTENANCE

Proper care and maintenance will extend the lifespan of your Vktech sculpting tools.

Cleaning:

- After each use, clean any residue (clay, wax, etc.) from the tool tips.
- For clay, use a damp cloth or sponge to wipe off material. Ensure tools are completely dry afterward to prevent rust.
- For wax, gently scrape off excess wax. A soft cloth can be used for polishing.
- Avoid harsh abrasive cleaners or materials that could scratch the stainless steel surface.

Storage:

- Always store the tools in the provided PU leather zipper pouch when not in use. This protects the tool tips from damage and prevents accidental injury.
- Store the pouch in a dry environment to prevent moisture buildup.

6. TROUBLESHOOTING

These tools are simple in design and operation, minimizing common issues.

Problem	Possible Cause	Solution
Tool tips appear dull or less effective.	Residue buildup or minor wear from extensive use.	Clean tools thoroughly after each use. For minor dullness, a very fine abrasive (e.g., polishing compound) can be used with extreme care, but generally, these tools are not designed for sharpening.
Tools show signs of rust.	Exposure to moisture or improper drying after cleaning.	Ensure tools are completely dry before storage. Store in a dry environment. Minor rust spots can sometimes be removed with a fine abrasive pad, but prevention is key.
Difficulty achieving desired detail.	Incorrect tool selection or technique.	Review the "Operating Instructions" and experiment with different tool ends. Practice on scrap material to refine technique.
