# ZINUS Compack Metal Bed Frame User Manual

Model: AZ-SBF-07Q | Brand: ZINUS

## 1. Introduction and Overview

The ZINUS Compack Metal Bed Frame is designed to provide reliable support for your box spring and mattress. Crafted from strong and durable steel, it features a center support bar and multiple-leg construction for superior stability. Its thoughtful design includes recessed legs to prevent accidental toe stubbing and integrated brackets for easy headboard attachment. This manual provides comprehensive instructions for assembly, maintenance, and troubleshooting to ensure long-lasting use of your bed frame.

## 2. Safety Information

Please read and understand all instructions before assembly and use. Keep these instructions for future reference.

- **Weight Capacity:** Ensure to use a box spring for proper support. The maximum weight capacity for this bed frame is 500 lbs. Do not exceed this limit.
- **Pinch Points:** Be cautious of potential pinch points during assembly and when handling the folding parts of the frame.
- **Recessed Legs:** The legs are designed to be recessed to prevent toe stubbing. Ensure they are fully extended and locked into place during use.
- **Mattress and Box Spring:** A box spring and mattress are both required for proper use and are sold separately. Do not use the frame without a box spring.
- **Stability:** Ensure all bolts are tightened securely before use. Periodically check and re-tighten bolts as needed.

## 3. Package Contents

Verify that all components are present before beginning assembly.

- Main Bed Frame Sections (pre-assembled folding parts)
- Center Support Bar(s)
- Headboard Attachment Brackets (integrated)
- Assembly Tool (Allen wrench/ratchet tool)
- Non-Slip Patches (8 pieces)
- Installation Manual (this document)

## 4. Setup and Assembly

The ZINUS Compack Metal Bed Frame is designed for quick and easy assembly, often taking less than 30 minutes. No additional tools are required beyond what is provided.

1. **Unpack Components:** Carefully remove all parts from the packaging. Lay the main bed frame sections on a clean, flat surface.
2. **Unfold Frame:** The main frame sections are pre-assembled and fold out. Gently unfold them to form the rectangular shape of the bed frame. Ensure the headboard attachment brackets are at the desired end.
3. **Extend Legs:** All support legs are designed to fold out from the frame. Extend each leg until it locks securely into its upright position. Some legs may have a locking mechanism that needs to be pushed down.
4. **Attach Center Support Bar:** Locate the center support bar(s). These bars slide into designated slots on the main frame and typically have a locking pin or bolt to secure them. For Queen size, there are usually three such slots.
5. **Secure Connections:** Use the provided Allen wrench/ratchet tool to tighten any visible bolts on the frame connections, especially at the corners and where the center support bars attach. Ensure all connections are firm and stable.
6. **Apply Non-Slip Patches:** Peel and stick the provided non-slip patches onto the top surface of the frame where the box spring will rest. This helps prevent the box spring from shifting.
7. **Attach Headboard (Optional):** If attaching a headboard, align its mounting holes with the pre-drilled holes on the integrated headboard brackets. Use appropriate hardware (not included with the frame) to secure the headboard.

## 5. Operating Instructions

Once assembled, the bed frame is ready for use with your box spring and mattress.

- **Placement:** Position the assembled bed frame in your desired location.
- **Box Spring Placement:** Carefully place your box spring onto the bed frame. Ensure it is centered and rests evenly on all support rails.
- **Mattress Placement:** Place your mattress directly on top of the box spring.

Figure 4: Proper placement of box spring and mattress on the frame.

## 6. Maintenance

Regular maintenance will help prolong the life of your ZINUS Compack Metal Bed Frame.

- **Cleaning:** Wipe with a dry cloth to remove dust and debris. Avoid using harsh chemicals or abrasive cleaners.
- **Bolt Check:** Periodically check all bolts and connections to ensure they remain tight. Re-tighten if any looseness is detected.
- **Leg Stability:** Ensure all legs are fully extended and locked into place.

## 7. Troubleshooting

If you encounter any issues with your bed frame, refer to the following common solutions:

- **Squeaking/Noise:** Ensure all bolts are securely tightened. Loose connections are a common cause of noise. Check that the box spring and mattress are properly seated on the frame.
- **Instability/Wobbling:** Verify that all legs are fully extended and locked. Re-tighten all frame connection bolts. Ensure the frame is on a level surface.
- **Box Spring/Mattress Shifting:** Confirm that the non-slip patches are correctly applied. If they are worn, consider replacing them.

## 8. Specifications

| | |
|---|---|
| **Size** | Queen |
| **Product Dimensions** | 76.5"L x 60"W x 7"H |
| **Color** | Black |
