Bajaj ICX6 WOV

Bajaj Majesty ICX 6 Plus 1600-Watt Induction Cooktop User Manual

Introduction

This manual provides essential instructions for the safe and efficient operation, maintenance, and troubleshooting of your Bajaj Majesty ICX 6 Plus 1600-Watt Induction Cooktop. Please read it thoroughly before using the appliance and retain it for future reference.

Key features of your induction cooktop include 7 Indian one-touch menus, precise temperature and wattage selection, a keep-warm function, and tact switch controls for ease of use. It also incorporates a safety auto-shutoff feature if no vessel is detected.

An image showing the Bajaj Majesty ICX 6 Plus 1600-Watt Induction Cooktop, featuring its sleek design and control panel.

Setup

1. **Unpacking:** Carefully remove the induction cooktop from its packaging. Inspect for any damage.
2. **Placement:** Place the cooktop on a stable, flat, and heat-resistant surface. Ensure adequate ventilation around the unit. Do not block the air vents.
3. **Power Connection:** Plug the power cord into a suitable 220-240V AC, 50Hz electrical outlet. Ensure the outlet is properly grounded.
4. **Cookware Selection:** Use only induction-compatible cookware. This typically includes pots and pans made of cast iron, enameled iron, or stainless steel with a magnetic base. The cooktop will not operate if an unsuitable pot is detected.

Operating Instructions

The Bajaj Majesty ICX 6 Plus features user-friendly tact switch controls for various functions.

1. **Power On/Off:** Press the Power button to turn the cooktop on or off.
2. **Placing Cookware:** Place an induction-compatible pot or pan centrally on the cooking zone before selecting a cooking function. The induction cooker will auto-shut off in 1 minute if no vessel is detected after being powered on.
3. **Selecting Menus:** Utilize the "7 Indian one touch menus" for pre-set cooking programs. Refer to the control panel for specific menu options.
4. **Adjusting Temperature/Wattage:** Use the dedicated controls to select the perfect temperature and wattage for your meal. This allows for precise cooking control.
5. **Keep Warm Function:** Activate the "Keeps your food warm" function to maintain the temperature of your cooked food.
6. **Safety Features:** The cooktop is designed with safety in mind, including automatic shut-off if no vessel is detected or if internal temperatures become too high.

Maintenance

Proper maintenance ensures the longevity and optimal performance of your induction cooktop.

- **Cleaning the Surface:** After each use, allow the cooktop to cool completely. Wipe the glass ceramic surface with a soft, damp cloth and mild detergent. For stubborn stains, use a non-abrasive cleaner specifically designed for induction cooktops.
- **Cleaning Vents:** Periodically check and clean the air intake and exhaust vents to ensure proper airflow and prevent overheating. Use a soft brush or vacuum cleaner.
- **Do Not Submerge:** Never immerse the cooktop in water or any other liquid.
- **Avoid Abrasives:** Do not use abrasive cleaners, scouring pads, or sharp objects on the cooktop surface as they can cause scratches or damage.

Troubleshooting

If you encounter an issue with your induction cooktop, refer to the table below for common error codes and their solutions. If the problem persists, please contact customer care.

Error Code	Reason	Action
E1	Unsuitable pot on the plate	Replace with induction-suitable cookware.
E2	IGBT temperature sensor open	Please contact Bajaj customer care.
E3	Abnormal supply voltage more than 280V	Switch on the unit after power supply is back to normal.
E4	Temperature sensor underplate open	Switch on the unit after power supply is back to normal.
E5	Temperature under the pot is too high	Please contact Bajaj customer care.
E6	Temperature of Induction too high	Please wait for a few minutes before temperature cools down.
E0	Circuit of PCB is abnormal	Please contact Bajaj customer care.
