Bosch H309

BOSCH H309 OE Specialty Rear Wiper Blade User Manual

Model: H309

PRODUCT OVERVIEW

The Bosch H309 OE Specialty Rear Wiper Blade is designed to provide clear visibility for the rear windshield of various vehicle models. Manufactured to high-quality standards, this blade ensures smooth and quiet operation, contributing to a long service life. It features wear-resistant natural rubber and a specially coated wiping edge.

INSTALLATION (SETUP)

Proper installation is crucial for optimal performance of your Bosch H309 rear wiper blade. This blade features an easy one-step installation with a Quick Click Adapter.

General Installation Steps:

1. **Remove Old Wiper Blade:** Gently lift the wiper arm away from the rear window. Locate the release tab or button on the existing wiper blade where it connects to the arm. Press or slide the tab and slide the old blade off the arm.
2. **Clean Wiper Arm:** Inspect the wiper arm for any debris or damage. Clean the arm if necessary.
3. **Attach New Wiper Blade:** Align the Quick Click Adapter of the Bosch H309 blade with the hook or pin on the wiper arm. Slide the new blade onto the arm until it clicks securely into place. Ensure it is firmly attached.
4. **Lower Wiper Arm:** Carefully lower the wiper arm back onto the rear window.

5. **Test Operation:** Activate your vehicle's rear wiper function to ensure the new blade operates smoothly and clears the window effectively.

Note: Specific vehicle models may have slight variations in wiper arm design. Refer to your vehicle's owner's manual for detailed instructions on removing and installing rear wiper blades if you encounter difficulties.

OPERATING INSTRUCTIONS

Once installed, the Bosch H309 rear wiper blade operates in conjunction with your vehicle's existing wiper system. Activate the rear wiper using the controls located within your vehicle's cabin, typically on the steering column stalk or dashboard.

Optimal Use:

- Use the wiper blade to clear water, snow, and light debris from the rear window.
- For heavily soiled windows, use your vehicle's washer fluid system in conjunction with the wiper to prevent scratching and ensure effective cleaning.
- Avoid operating the wiper on a dry window, as this can cause premature wear to the blade and potentially scratch the glass.

MAINTENANCE

Regular maintenance extends the life and effectiveness of your Bosch H309 wiper blade.

Maintenance Tips:

- **Clean Blades Regularly:** Wipe the rubber edge of the wiper blade with a damp cloth or paper towel to remove dirt, grime, and road film. This helps prevent streaking.
- **Inspect for Damage:** Periodically check the rubber blade for cracks, tears, or hardening. Damaged blades should be replaced immediately.
- **Clear Ice and Snow:** Before operating wipers in freezing conditions, ensure the blade is not frozen to the windshield. Gently lift the arm and clear any ice or snow from the blade and windshield to prevent damage.
- **Use Quality Washer Fluid:** Always use a good quality windshield washer fluid, especially one designed for cold weather if applicable, to keep the windshield clean and lubricated for the wiper.

Wiper blades are wear items and should be replaced approximately every 6 to 12 months, or sooner if performance degrades (e.g., streaking, chattering, skipping).

TROUBLESHOOTING

If you experience issues with your Bosch H309 rear wiper blade, consider the following common problems and solutions:

Problem	Possible Cause	Solution
Streaking	Dirt/grime on blade or windshield; worn blade; improper installation.	Clean blade and windshield. If problem persists, replace blade. Ensure proper installation.
Chattering/Skipping	Blade not making full contact; hardened rubber; bent wiper arm.	Clean blade. Replace blade if rubber is hardened. Inspect wiper arm for damage.
Squeaking Noise	Dry windshield; dirty blade; worn blade.	Use washer fluid. Clean blade. Replace blade if worn.
Incomplete Wipe Area	Worn blade; insufficient pressure from wiper arm.	Replace blade. Inspect wiper arm spring tension.

If troubleshooting steps do not resolve the issue, it may be necessary to consult a professional mechanic or contact Bosch customer support.

SPECIFICATIONS

Key specifications for the Bosch H309 OE Specialty Rear Wiper Blade:

- **Brand:** Bosch
- **Model:** H309 (Rear Blade)
- **Item Length:** 12 Inches (300mm)
- **Mounting Type:** Pinch Tab
- **Vehicle Service Type:** Car (Vehicle Specific Fit)
- **Material:** Wear-resistant natural rubber with specially coated wiping edge
- **Color:** Black
- **Item Weight:** Approximately 1.87 ounces
- **Manufacturer Part Number:** 3397011630
- **Global Trade Identification Number (GTIN):** 04047025104104
