

## Coiled Power Cord (Compatible with Cobra XRS-9945, XRS-9955, XRS-9965, XRS-9990)

# GENERIC Coiled Power Cord Instruction Manual

Compatible with Cobra XRS-9945, XRS-9955, XRS-9965, XRS-9990 Radar Detectors

## INTRODUCTION

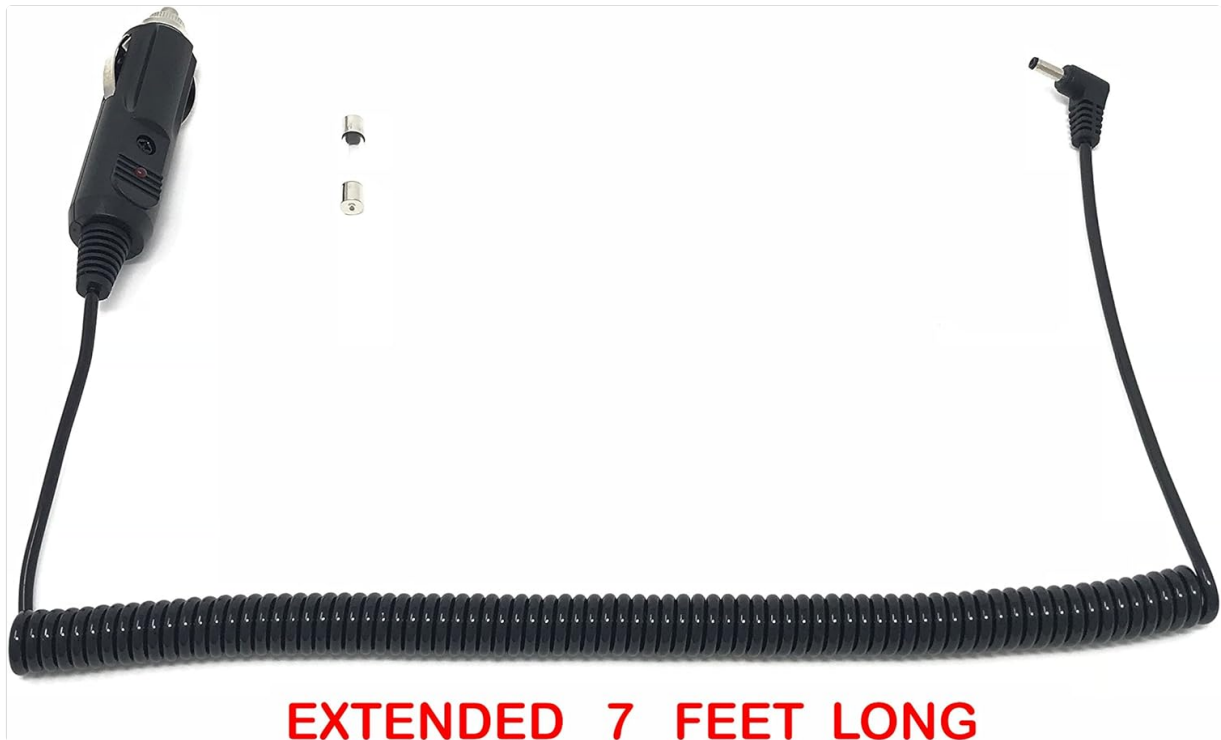

---

This manual provides instructions for the GENERIC Coiled Power Cord, a compatible replacement power accessory for select Cobra radar detectors. This cord is designed to supply 12V DC power to your radar detector from your vehicle's cigarette lighter socket. It is important to note that this power cord is for power supply only and does not include additional functions such as an on/off button, mute button, alert function, or USB charging capabilities.

## SETUP

---

- 1. Connect to Radar Detector:** Locate the power input port on your Cobra radar detector. Insert the small, angled connector end of the coiled power cord into this port. Ensure a secure connection.
- 2. Connect to Vehicle Power:** Insert the larger cigarette lighter plug end of the coiled power cord into your vehicle's 12V accessory power socket (cigarette lighter socket).
- 3. Verify Power:** Once connected, a red LED indicator on the cigarette lighter plug will illuminate, confirming that power is being supplied to the radar detector. Your radar detector should now power on.

This image displays the GENERIC Coiled Power Cord in its extended form, highlighting the 12V cigarette lighter adapter on one end and the compatible power connector for Cobra radar detectors on the other. The cord is designed to provide power to your device.

## OPERATING INSTRUCTIONS

---

The GENERIC Coiled Power Cord operates automatically once properly connected to your vehicle's 12V power socket and your Cobra radar detector. It provides continuous 12V DC power to the detector. There are no user-operable controls on the power cord itself.

- The cord does not feature an on/off switch.
- It does not provide mute or alert functions.
- It does not include a USB charging port.

## MAINTENANCE

---

### Fuse Replacement

The cigarette lighter plug contains a replaceable fuse for protection against power surges. If the power cord stops working and the LED indicator does not light up, the fuse may need to be replaced.

1. **Disconnect Power:** Unplug the cigarette lighter adapter from your vehicle's power socket.
2. **Access Fuse:** Unscrew the tip of the cigarette lighter plug to access the fuse compartment.
3. **Replace Fuse:** Carefully remove the old fuse and insert the new fuse (one extra fuse is included with your purchase). Ensure the new fuse has the correct rating.
4. **Reassemble:** Screw the tip back onto the cigarette lighter plug.
5. **Test:** Reconnect the power cord to your vehicle to verify functionality.

### General Care

- Keep the cord clean and free from dust and debris.
- Avoid exposing the cord to extreme temperatures or direct sunlight for prolonged periods.

- Do not bend or crimp the cord excessively to prevent internal wire damage.

This image shows the GENERIC Coiled Power Cord along with an included extra fuse. The cigarette lighter adapter features a red LED indicator that illuminates when power is being supplied, confirming proper connection and operation.

The extra fuse is provided for replacement if the original fuse blows.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Radar detector does not power on.	Loose connection. Blown fuse. Vehicle power socket issue.	Ensure both ends of the power cord are securely connected. Check and replace the fuse if necessary (refer to Maintenance section). Test the vehicle's power socket with another device.
LED indicator on plug is not lit.	No power from vehicle. Blown fuse.	Verify the vehicle's ignition is on (if required for power socket). Check and replace the fuse.

## SPECIFICATIONS

- **Product Type:** Compatible Car Coiled Power Cord
- **Input Voltage:** 12V DC
- **Output Voltage:** 12V DC
- **Connector Type:** Male-to-Female (Cigarette Lighter to Device Connector)
- **Color:** Black
- **Item Weight:** Approximately 4 Ounces

- **Manufacturer:** DCPOWER
- **UPC:** 610098515401
- **Features:** Fuse Protection, LED Light Indicator
- **Compatibility:** Cobra XRS-9945, XRS-9955, XRS-9965, XRS-9990 Radar Detectors

## WARRANTY INFORMATION

---

This product comes with a **90-day warranty** from the date of purchase. This warranty covers manufacturing defects. Please retain your proof of purchase for any warranty claims.

## CUSTOMER SUPPORT

---

If you encounter any problems with your GENERIC Coiled Power Cord, or if you have questions regarding its use or maintenance, please contact the seller directly. Providing details of your issue will help facilitate a quicker resolution.
