Makartt US1F0185

Makartt Nail Polish Remover Set (200PCS) Instruction Manual

Model: US1F0185

INTRODUCTION

Thank you for choosing the Makartt Nail Polish Remover Set. This set provides an efficient and convenient solution for removing various types of nail art, including gel polish, acrylic nails, dip powder, and UV nails. Designed for both salon professionals and at-home users, this kit includes 200 foil wraps with pre-attached lint-free cotton pads and a double-ended cuticle pusher/scraper tool. Please read this manual carefully before use to ensure proper application and optimal results.

SAFETY INFORMATION

- For external use only.
- Keep out of reach of children.
- Avoid contact with eyes. In case of contact, rinse thoroughly with water.
- Use in a well-ventilated area.
- Do not use on broken or irritated skin. Discontinue use if irritation occurs.
- Ensure proper ventilation when using nail polish remover (not included).

PRODUCT COMPONENTS

- **200 x Foil Wraps:** Each wrap features a pre-attached lint-free cotton pad.
- **1 x Double-Ended Cuticle Pusher/Scraper:** A versatile tool for gently removing softened nail product.

SETUP

Before beginning the nail polish removal process, ensure you have all necessary items ready. This includes your Makartt Nail Polish Remover Set and a suitable nail polish remover (acetone recommended for gel/acrylic, not included).

1. Prepare your workspace: Lay down a protective surface to prevent damage from spills.
2. Gather your tools: Have the foil wraps and cuticle pusher readily accessible.
3. Lightly file the top coat of your nail polish: This helps to break the seal and allows the remover to penetrate more effectively.

Image: A hand demonstrating how to position a foil wrap over a fingernail, ensuring the cotton pad fully covers the nail surface.

OPERATING INSTRUCTIONS

Follow these steps for effective and gentle nail polish removal:

1. Apply nail polish remover: Dispense an appropriate amount of nail polish remover onto the pre-attached cotton pad of a foil wrap. Ensure the pad is saturated but not dripping.

2. Wrap the nail: Place the saturated cotton pad directly over your nail. Wrap the foil tightly around your finger or toe, ensuring a secure fit to prevent air exposure and maximize the remover's effectiveness.

3. Soak time: Allow the wraps to soak for 10-15 minutes. For stubborn polishes or thicker layers, you may extend the soaking time up to 20 minutes.

4. Remove softened polish: Gently unwrap one finger at a time. Use the double-ended cuticle pusher/scraper tool to carefully push and scrape off the softened gel or acrylic from your nail plate. Work from the cuticle towards the free edge.

5. Clean and nourish: After removing all polish, wipe your nails clean with a fresh cotton pad. Apply cuticle oil to moisturize and nourish your nails and surrounding skin.

STEP TO USE

1 Put the remover liquid on the cotton

2 Use the removal warp on your nail

3 Wait on about 10-15min then wrap it off

4 Remove the nail gel with cuticle peeler

5 Remove residual nail gel on the edge of nail with Nail scraper

**6** Apply nail cuticle oil to protect your nail surface and Finish

MAINTENANCE

- **Cuticle Pusher/Scraper:** Clean the metal tool with alcohol after each use to ensure hygiene and prevent product buildup. Store in a dry place.
- **Foil Wraps:** These are single-use items and should be disposed of properly after each application.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Nail polish not softening sufficiently.	Insufficient remover applied, wraps not sealed tightly, or not enough soaking time.	Ensure the cotton pad is fully saturated. Wrap the foil tightly to create a seal. Extend soaking time if necessary, especially for multiple layers or stubborn products. Lightly file the top coat before application.
Remover drips or leaks from the foil wraps.	Cotton pad oversaturated or foil not wrapped securely.	Apply remover carefully to avoid oversaturation. Ensure the foil is wrapped snugly around the finger to prevent leakage.
Difficulty applying wraps to non-dominant hand.	Lack of practice or awkward positioning.	Practice applying the wraps to improve dexterity. Consider doing one hand at a time or seeking assistance if needed. The pre-cut design simplifies the process compared to cutting your own foil.
Cotton pads feel too small for toes or larger nails.	Individual nail size variation.	While designed to cover most nails, for exceptionally large nails or toes, ensure the cotton pad is centered and fully covers the nail. You may need to use slightly more remover to compensate for larger surface areas.

SPECIFICATIONS

- **Brand:** Makartt
- **Model Number:** US1F0185
- **Quantity:** 200 pcs foil wraps, 1 double-ended cuticle pusher
- **Foil Wrap Dimensions:** Approximately 3.54 x 2.55 inches
- **Cotton Pad Dimensions:** Approximately 1.21 x 1.21 inches
- **Material:** High-quality aluminum foil, lint-free cotton pads
- **Product Dimensions:** 9.84 x 7.87 x 5.91 inches; 1.6 ounces (packaging)
- **Material Feature:** Acetone Free, Alcohol Free, Lint Free (referring to the pads themselves, not the required remover)
