

HARIO CHAN-2SV

HARIO Tea Pot 300ml Instruction Manual

Model: CHAN-2SV

INTRODUCTION

Thank you for choosing the HARIO Tea Pot, Model CHAN-2SV. This teapot is designed for brewing and serving tea, featuring heat-resistant glass and a fine stainless steel mesh filter. This manual provides essential information for the safe and effective use of your new tea pot.

SAFETY INFORMATION

- Always handle the glass components with care to prevent breakage.
- The teapot is designed for hot liquids. Use caution when handling to avoid burns.
- Do not place the teapot directly on an open flame or heating element unless specifically designed for stovetop use (this model is not).
- Keep out of reach of children.
- Ensure the lid is securely placed before pouring.

COMPONENTS

Your HARIO Tea Pot consists of the following main parts:

- **Glass Teapot Body:** Made from HARIO heat-resistant glass.
- **Stainless Steel Filter Basket:** A fine mesh filter for loose leaf tea.
- **Lid with Plunger:** Features a plunger mechanism to raise and lower the filter.
- **Handle:** For safe and comfortable pouring.

Image: The stainless steel filter basket separated from the lid with its plunger mechanism.

SETUP

1. **Unpack:** Carefully remove all components from the packaging.
2. **Initial Cleaning:** Before first use, wash all parts with warm soapy water and rinse thoroughly. Ensure all soap residue is removed.
3. **Assemble Filter:** Attach the stainless steel filter basket to the bottom of the lid's plunger mechanism. Ensure it is securely fastened.

OPERATING INSTRUCTIONS

1. **Add Tea Leaves:** Lift the lid with the attached filter. Place your desired amount of loose leaf tea into the stainless steel filter basket.
2. **Add Hot Water:** Place the lid and filter assembly back onto the teapot. Ensure the filter is in the raised position (plunger up). Carefully pour hot water into the glass teapot body, covering the tea leaves in the filter. Do not overfill.
3. **Steep Tea:** Allow the tea to steep for the recommended time according to your tea type.
4. **Stop Infusion:** Once the desired strength is reached, press the plunger down. This lowers the filter

to the bottom of the teapot, separating the tea leaves from the brewed tea and stopping the infusion process.

Image: The HARIO Tea Pot with the plunger pressed down, indicating the tea leaves are separated from the brewed tea.

5. **Pour Tea:** Hold the handle firmly and carefully pour the brewed tea into your cup.

CLEANING AND MAINTENANCE

- **Dishwasher Safe:** The HARIO Tea Pot is dishwasher safe. Place all components on the top rack for best results.
- **Hand Washing:** For hand washing, disassemble the filter from the lid. Wash all parts with warm soapy water using a soft sponge or brush. Rinse thoroughly to remove all soap residue.
- **Cleaning the Filter:** The fine stainless steel mesh filter can be cleaned by unscrewing its bottom part for easy access to trapped tea leaves. Use a small brush if necessary to remove any stubborn residue.
- **Drying:** Allow all parts to dry completely before reassembling and storing.
- **Storage:** Store the teapot in a clean, dry place.

TROUBLESHOOTING

- **Tea leaves escaping the filter:** Ensure the filter basket is securely attached to the lid. If using very fine tea, some small particles may pass through the mesh, which is normal for fine mesh filters.
- **Lid difficult to open/close:** Ensure the lid and teapot rim are clean and free of tea residue. Avoid

forcing the lid; gentle pressure should be sufficient.

- **Glass appears cloudy:** This may be due to mineral deposits from water. Use a solution of white vinegar and water to soak the glass, then rinse thoroughly.

SPECIFICATIONS

| | |
|---------------------------------------|--|
| Brand | HARIO |
| Model Number | CHAN-2SV |
| Material | Heat-resistant Glass, Stainless Steel |
