De'Longhi Dragon Oil-Filled Radiator 2000W - Instruction Manual

Model: 0110612301

1. INTRODUCTION

This manual provides essential information for the safe and efficient operation of your De'Longhi Dragon Oil-Filled Radiator 2000W. Please read these instructions carefully before using the appliance and keep them for future reference. This radiator is designed to provide comfortable and consistent heat for rooms up to 60 m³.

2. IMPORTANT SAFETY INSTRUCTIONS

- Read all instructions before using this heater.
- Do not use this heater in the immediate vicinity of a bath, shower, or swimming pool.
- Do not use this heater if it has been dropped.
- Do not use if there are visible signs of damage to the heater.
- Use this heater on a horizontal and stable surface.
- Keep combustible materials such as furniture, curtains, and other flammable items at least 1 meter (3 feet) from the front and sides of the heater.
- Do not cover the heater. Overheating may occur.
- Supervise children and individuals with reduced physical, sensory, or mental capabilities when the appliance is in use.
- Ensure the voltage indicated on the rating label corresponds to the mains voltage in your home.
- Always unplug the heater when not in use.

3. PRODUCT COMPONENTS

Your De'Longhi Dragon Oil-Filled Radiator consists of the following main components:

- **Heating Fins:** Multiple fins filled with diathermic oil for efficient heat distribution.
- **Control Panel:** Located on the side, featuring a thermostat dial and power selection switches.
- **Thermostat Dial:** Adjustable from 1 to 6 to set the desired room temperature.

- **Power Selection Switches:** Allows selection of different heating power levels (Minimum, Medium, Maximum).
- **Handle:** Integrated handle for easy repositioning of the radiator.
- **Foldable Wheels:** Pre-assembled wheels that can be unfolded for mobility and folded for compact storage.
- **Cord Storage:** Integrated reel for neat storage of the power cord.

4. SETUP

4.1 Unpacking and Wheel Deployment

1. Carefully remove the radiator from its packaging.
2. The wheels are pre-assembled and folded for transport. Gently unfold them until they click into place, ensuring the radiator is stable on a flat surface.

Emmenez le où vous voulez

Vous pouvez déplacer facilement l'appareil grâce aux roulettes pré-assemblées.

4.2 Initial Use and Odor Dissipation

During the first few hours of operation, the heater may emit a slight odor. This is normal and harmless, caused by the protective oils used during manufacturing. To dissipate this odor:

- Operate the heater at maximum power for approximately 2 hours in a well-ventilated area, preferably near an open window.
- Ensure the room is adequately ventilated during this period.

4.3 Placement

- Place the radiator on a stable, level surface.
- Maintain a minimum distance of 1 meter (3 feet) from walls, furniture, and other objects to ensure proper air circulation and prevent fire hazards.
- Do not place the heater directly below a power outlet.

5. OPERATING INSTRUCTIONS

5.1 Powering On/Off

1. Plug the power cord into a suitable electrical outlet (230V).
2. To turn on the radiator, select the desired power level using the power selection switches on the control panel.
3. To turn off the radiator, switch off all power switches and unplug the appliance from the mains.

5.2 Adjusting Temperature and Power

- **Thermostat Control:** Rotate the thermostat dial to set your desired room temperature. The dial typically ranges from 1 (minimum heat) to 6 (maximum heat). The radiator will automatically cycle on and off to maintain the set temperature.
- **Power Settings:** Use the power switches to select the heating output:
 - **MIN (900W):** For gentle, continuous heating or smaller rooms.
 - **MED (1100W):** For moderate heating.
 - **MAX (2000W):** For rapid heating or larger rooms.

5.3 Cord Storage

When the radiator is not in use or needs to be moved, wrap the power cord around the integrated cord storage reel located at the base of the unit for neat and safe storage.

6. MAINTENANCE

6.1 Cleaning

- Always unplug the radiator and allow it to cool completely before cleaning.
- Wipe the exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- Ensure no water enters the control panel or other electrical components.

6.2 Storage

- When storing the radiator for extended periods, ensure it is clean and dry.
- Fold the wheels for compact storage.
- Store the appliance in a cool, dry place, away from direct sunlight and moisture.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Radiator does not turn on.	Not plugged in; power switch off; thermostat set too low.	Ensure plug is securely in outlet; turn on power switches; increase thermostat setting.
Radiator emits unusual odor during first use.	Protective oils from manufacturing burning off.	This is normal. Operate in a well-ventilated area for 2 hours. Odor will dissipate.
Radiator stops heating unexpectedly.	Overheat protection activated; thermostat reached set temperature.	Unplug, let cool, check for obstructions. If not overheating, thermostat is working as intended.

8. SPECIFICATIONS

Feature	Detail
Brand	De'Longhi
Model Number	0110612301
Type	Oil-Filled Radiator
Color	White/Stainless Steel
Max Heating Power	2000W
Min Heating Power	900W
Medium Heating Power	1100W
Voltage	230V
Frequency	50 Hz
Dimensions (L x W x H)	16 x 43.99 x 65 cm
Weight	2.5 kg
Material	Stainless steel, plastic
Suitable Room Size	Up to 60 m ³

Feature	Detail
Adjustable Thermostat	Yes
Cord Storage	Yes
Mobility	Foldable wheels
