## Intex 68605E

# Intex Double Quick III S 14.5" Hand Pump Instruction Manual

Model: 68605E

## PRODUCT OVERVIEW

The Intex Double Quick III S 14.5" Hand Pump is a manual, high-output air pump designed for inflating and deflating various inflatables such as airbeds, pool toys, and other large items. Its double-action design allows air to be pumped on both the up and down strokes, maximizing efficiency.

- **Brand:** Intex
- **Model:** 68605E
- **Dimensions:** 12"L x 8"W x 16"H
- **Item Weight:** 1.9 Pounds
- **Material:** Plastic
- **Operation Mode:** Manual

## PACKAGE CONTENTS

The package includes one Intex Double Quick III S Hand Pump and a set of three interconnecting nozzles with hoses to fit various valve sizes.

## SETUP INSTRUCTIONS

1. **Attach Hose:** Connect the flexible hose to the pump's air outlet. Ensure a secure fit to prevent air leakage during operation.
2. **Select Nozzle:** Choose the appropriate nozzle from the three included options that best fits the valve of the inflatable item.
  - **Small Pinch Valve:** Typically used for small inflatables like swim rings and floats.
  - **Large Pinch Valve:** Typically used for larger inflatables like large swim rings and floats.
  - **Boston Valve:** Typically used for larger inflatables such as boats, rafts, and airbeds.
3. **Connect Nozzle:** Firmly insert the selected nozzle into the valve of your inflatable item.

## OPERATING INSTRUCTIONS

### Inflation:

1. Ensure the hose is connected to the "Inflate" port (usually marked or the primary port) on the pump.
2. Place the pump on a stable, flat surface.
3. Hold the pump handle firmly and use your foot to stabilize the base.
4. Pump the handle up and down in a steady motion. The double-action design will inflate on both strokes.
5. Continue pumping until the inflatable reaches the desired firmness. Avoid over-inflation.

Image: A person using the Intex hand pump to inflate a yellow pool float next to a swimming pool, showing the pump in action.

## Deflation:

1. Connect the flexible hose to the "Deflate" port (if available, or reverse the hose connection on some models as indicated by markings) on the pump.
2. Attach the appropriate nozzle to the inflatable item's valve.
3. Pump the handle up and down. The double-action design will draw air out of the inflatable.
4. Continue pumping until the inflatable is fully deflated for compact storage.

## MAINTENANCE

- **Cleaning:** Wipe the pump clean with a damp cloth after each use. Ensure no dirt or debris enters the pump mechanism or nozzles.
- **Storage:** Store the pump and its accessories in a dry, cool place away from direct sunlight and extreme temperatures. Keep the hose and nozzles organized to prevent loss or damage.
- **Inspection:** Periodically check the hose and nozzles for any signs of wear, cracks, or damage. Replace components if necessary to maintain optimal performance.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Slow or no inflation/deflation	Loose hose or nozzle connection; incorrect nozzle size; pump mechanism obstruction.	Ensure all connections are tight. Verify the correct nozzle is used. Check for debris in the pump or hose.
Nozzle detaches easily from inflatable	Incorrect nozzle size; worn nozzle; insufficient pressure during pumping.	Select a tighter-fitting nozzle. Replace worn nozzles. Maintain steady pressure while pumping, and if possible, have someone hold the nozzle in place for large inflatables.
Pump handle is stiff or difficult to move	Internal friction; debris in the cylinder.	Ensure the pump is clean. If stiffness persists, contact customer support.

## SPECIFICATIONS

Feature	Detail
Brand	Intex
Model Number	68605E
Material	Plastic
Item Weight	1.9 Pounds
Product Dimensions (L x W x H)	12" x 8" x 16"
Power Source	Manual
Included Components	Pump, Hose, 3 Interconnecting Nozzles

## WARRANTY AND SUPPORT

For warranty information or product support, please refer to the documentation included with your purchase or contact Intex customer service directly. Keep your proof of purchase for any warranty claims.
