Crivit Feeder Rod Set 300-5

INSTRUCTION MANUAL

1. Introduction

Thank you for choosing the Crivit Feeder Rod Set 300-5. This comprehensive fishing combo is specifically designed for bottom and feeder fishing, ideal for catching carp, eel, and various other coarse fish. This set provides a complete solution for your angling needs, combining a high-quality telescopic rod, a reliable reel, and a wide range of essential accessories. Please read this manual carefully before using the product to ensure proper assembly, safe operation, and effective maintenance.

2. Safety Instructions

- Always handle fishing hooks with extreme care to prevent injury.
- Be aware of your surroundings when casting to avoid hitting people, animals, or overhead power lines.
- Do not use the rod during thunderstorms or near electrical hazards.
- Keep all small accessories and sharp objects out of reach of children.
- Ensure all rod sections are securely extended and locked before casting.

3. Package Contents

Your Crivit Feeder Rod Set 300-5 includes the following components:

- Crivit Telescopic Feeder Rod (approx. 300 cm total length, 101 cm transport length)
- Crivit Spinning Reel (Size 50RD, 4 ball bearings, pre-spooled)
- Spare Spool for Reel
- Rod Holder
- Hook Remover
- Comprehensive Accessory Box (100-piece set including hooks, lead weights, etc.)
- Rod Bag for transport and storage

Figure 3.1: Overview of the Crivit Feeder Rod Set 300-5, showing the telescopic rod, spinning reel, rod holder, hook remover, accessory box, and rod bag.

4. Setup

4.1 Assembling the Rod

1. Carefully extend each telescopic section of the rod, starting from the tip, until each section is fully extended and securely locked into place. Ensure the guides are aligned.
2. Inspect all rod guides for any damage or misalignment.

Figure 4.1: Close-up view of the telescopic rod tip and line guides, illustrating the robust construction.

4.2 Attaching the Reel

1. Locate the reel seat on the rod handle.
2. Place the reel foot into the fixed hood of the reel seat.
3. Tighten the screw-down hood until the reel is firmly secured and does not wobble. Do not overtighten.

Figure 4.2: Detailed view of the rod's cork handle and the secure reel seat mechanism.

4.3 Threading the Line

The reel comes pre-spoiled with fishing line. To thread the line:

1. Open the bail arm of the reel.
2. Pass the line through all the guides on the rod, starting from the guide closest to the reel and working towards the

tip.

3. Once the line is through all guides, you can attach your desired rig (e.g., feeder, hook, weight) from the accessory box.

5. Operating Instructions

5.1 Casting

1. Hold the rod firmly with both hands.
2. Open the bail arm of the reel.
3. Bring the rod back over your shoulder, then smoothly cast forward, releasing the line with your index finger as the rod reaches the desired angle.
4. Close the bail arm immediately after the cast to prevent tangles.

Figure 5.1: The Crivit rod set up for fishing by a natural water body, demonstrating its practical application.

5.2 Reeling and Drag System

The reel features an S-Stroke system for perfectly aligned line lay and a finely adjustable rear drag with an anti-slip knob and multi-disc brake system.

- To retrieve line, turn the reel handle clockwise.
- Adjust the rear drag knob to control the tension on the line. A tighter drag prevents line from being pulled out easily, while a looser drag allows line to be released under pressure, preventing line breakage when fighting a fish.

Figure 5.2: An angler demonstrating the proper grip and handling of the Crivit rod and reel during use.

6. Maintenance

- After each use, wipe down the rod and reel with a damp cloth to remove dirt, salt, or debris.
- Ensure the reel is dry before storing. Avoid submerging the reel in water.
- Periodically apply a small amount of reel oil to moving parts of the reel (e.g., handle shaft, bail arm pivot points) to ensure smooth operation.
- Store the rod in its protective bag in a dry, cool place, away from direct sunlight and extreme temperatures.
- Retract the telescopic rod sections carefully after use, starting from the butt section.

7. Troubleshooting

- **Line Tangles:** Ensure the bail arm is closed immediately after casting. Check for loose line on the spool.
- **Stiff Reel Handle:** Apply a small amount of reel oil to the handle shaft and internal gears. Check for debris obstructing movement.
- **Rod Sections Sticking:** Gently twist and pull to separate. Avoid excessive force. Clean the inside of the sections if dirt is present.
- **Drag Not Working:** Check if the drag knob is too loose or too tight. Ensure no debris is caught in the drag system.

8. Specifications

Feature	Specification
Model Number	2148
Rod Type	Telescopic Feeder Rod
Rod Material	HMGF (High-Modulus-Glass Fiber)
Total Length	Approx. 300 cm (3 meters)
Transport Length	Approx. 101 cm

Feature	Specification
Casting Weight	100g
Handle Material	Portuguese Plate-Cork
Reel Type	Spinning Reel
Reel Size	50RD
Ball Bearings	4
Gear Ratio	5.1 : 1
Brake System	Finely adjustable rear drag with anti-slip knob and multi-disc system
Line Lay System	S-Stroke System
Total Weight	1.5 Kilograms (approx. for the set)

9. Warranty and Support

For warranty information, technical support, or spare parts, please refer to the contact details provided with your purchase documentation or visit the official Crivit website. Keep your proof of purchase for any warranty claims.
