BLACK+DECKER Dustbuster Replacement Vacuum Filter Instruction Manual

Model: 90558113

INTRODUCTION

This manual provides essential instructions for the installation, maintenance, and optimal use of your BLACK+DECKER Dustbuster Replacement Vacuum Filter, part number 90558113. Proper filter care ensures your Dustbuster maintains its suction power and efficiency.

COMPATIBILITY

This replacement filter (Part #90558113) is compatible with the following BLACK+DECKER Dustbuster models:

- BDH1220AV Type 1
- BDH2000L Type 1
- CHV1210 Type 1
- CHV1410 Type 1
- CHV1410B Type 1
- CHV1410L Type 1
- CHV1510 Type 1
- CHV9610 Type 1
- BDH2010LP

Please verify your Dustbuster model number to ensure proper fit and function.

INSTALLATION

Follow these steps to replace the filter in your BLACK+DECKER Dustbuster:

1. Ensure the Dustbuster is turned off and unplugged from any charging base.
2. Locate the filter release button, typically near the dustbin. Press the button to detach the dustbin from the main unit.
3. Carefully remove the old filter from the dustbin. Dispose of the old filter responsibly.
4. Insert the new replacement filter (Part #90558113) into the dustbin, ensuring it is seated correctly and securely.
5. Reattach the dustbin to the main Dustbuster unit until it clicks firmly into place.
6. Your Dustbuster is now ready for use with the new filter.

MAINTENANCE

Regular cleaning of your Dustbuster filter is crucial for maintaining optimal suction and extending the life of your vacuum. The filter is reusable and can be washed.

1. Remove the filter from the dustbin as described in the installation steps.
2. Tap the filter gently over a trash can to dislodge loose debris and dust.

- 3. Rinse the filter under running water until the water runs clear. Avoid using harsh detergents or brushes that could damage the filter material.
- 4. Allow the filter to air dry completely for at least 24 hours before reinserting it into the Dustbuster. Ensure it is completely dry to prevent mold or mildew growth and to maintain proper suction.
- 5. For best performance, it is recommended to have a spare filter to use while one is drying.

TROUBLESHOOTING

If your Dustbuster experiences reduced suction after filter replacement or cleaning, consider the following:

- **Filter Clogging:** Even after emptying the dustbin, the filter itself can become clogged with fine dust and debris. Ensure the filter is thoroughly cleaned as per the maintenance instructions.
- **Improper Installation:** Double-check that the filter is correctly seated within the dustbin and that the dustbin is securely attached to the vacuum unit.
- **Wet Filter:** A damp filter will significantly reduce suction. Always ensure the filter is completely dry before reinstallation.
- **Filter Wear:** Over time, even washable filters can degrade. If the filter appears damaged, torn, or excessively worn, it may be time for a new replacement.

SPECIFICATIONS

Part Number	90558113
Product Dimensions	10.38 x 3.62 x 4.87 inches
Item Weight	1.76 ounces
Material	Plastic
Reusability	Reusable
