NutriBullet Stay Fresh Resealable Cup Lids

NutriBullet Stay Fresh Resealable Cup Lids Instruction Manual

Model: Stay Fresh Resealable Cup Lids

INTRODUCTION

This manual provides essential instructions for the proper use and care of your NutriBullet Stay Fresh Resealable Cup Lids. Please read this manual thoroughly before first use and retain it for future reference. These lids are designed to provide a secure seal for your NutriBullet cups, enhancing convenience for storage and transport.

SETUP AND FIRST USE

1. **Unpacking:** Carefully remove the lids from their packaging. Inspect for any signs of damage.
2. **Initial Cleaning:** Before first use, wash the lids thoroughly with warm, soapy water. Rinse completely and allow to air dry. Ensure the gasket is properly seated within the lid.
3. **Gasket Check:** Verify that the rubber gasket is securely in place around the inner rim of each lid. A properly seated gasket is crucial for a leak-proof seal.

Image: Two NutriBullet Stay Fresh Resealable Cup Lids. One lid is shown from the top, displaying its resealable opening. The other lid is inverted, showing the inner rim where the gasket is located, essential for sealing.

OPERATING INSTRUCTIONS

These lids are designed for use with compatible NutriBullet cups to store blended contents or transport beverages.

- **Attaching the Lid:** After blending, ensure the NutriBullet cup rim is clean and dry. Place the lid onto the cup and twist clockwise until it is securely tightened. Do not overtighten.
- **Sealing the Opening:** To seal the lid's drinking spout, firmly press down the flip-top cap until it clicks into place. To open, lift the flip-top cap.
- **Storage and Transport:** Once sealed, the lids help prevent leaks during storage in a refrigerator or when transporting your NutriBullet cup. Always ensure the lid is tightly secured and the spout is closed before moving.

CARE AND MAINTENANCE

Proper cleaning and maintenance will extend the life of your NutriBullet Stay Fresh Resealable Cup Lids.

- **Dishwasher Safe:** The lids are dishwasher safe. Place them on the top rack of your dishwasher for cleaning.
- **Hand Washing:** For hand washing, use warm water and mild dish soap. Use a brush to clean around the gasket and inside the flip-top mechanism to remove any residue. Rinse thoroughly.
- **Drying:** Allow lids to air dry completely before storing to prevent odor or mildew buildup.
- **Gasket Care:** Periodically inspect the gasket for wear or damage. Ensure it remains properly seated for an effective seal. If the gasket becomes dislodged, carefully re-insert it into the groove on the underside of the lid.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Lid leaks when inverted or shaken.	<ul style="list-style-type: none"> • Lid not tightened sufficiently. • Gasket is dislodged or damaged. • Cup rim is not clean or dry. 	<ul style="list-style-type: none"> • Ensure the lid is twisted on tightly. • Check that the gasket is properly seated.
