Brita 35938

Brita Small 6 Cup Water Filter Pitcher User Manual

Model: 35938

1. Product Overview

The Brita Small 6 Cup Water Filter Pitcher is designed to provide cleaner, great-tasting water by reducing common contaminants found in tap water. Its compact design makes it suitable for smaller spaces, while its features ensure ease of use and maintenance.

Key Features:

- **6-Cup Capacity:** Ideal for individuals or small households.
- **BPA-Free Construction:** Ensures safe water storage.
- **Contaminant Reduction:** Reduces zinc, chlorine taste and odor, copper, mercury, and cadmium.
- **Electronic Filter Indicator:** Tracks filter life for timely replacement.
- **Easy-Fill Flip-Top Lid:** Simplifies refilling the pitcher.
- **Comfort Grip Handle:** Provides comfortable and secure pouring.
- **Space-Saving Design:** Fits conveniently in most refrigerator doors.

2. Setup Instructions

Follow these steps to prepare your Brita Water Filter Pitcher for first use:

1. **Wash Hands:** Always wash your hands thoroughly before handling the filter.
2. **Flush Filter:** Flush the new filter with cold water for 15 seconds. This helps remove any loose carbon dust.
3. **Insert Filter:** Firmly insert the flushed filter into the reservoir of the pitcher. Ensure it is seated correctly to prevent unfiltered water from bypassing the filter.
4. **Add Cold Tap Water:** Fill the reservoir with cold tap water. The water will slowly trickle through the filter into the main pitcher body.
5. **Discard First Batches:** The first three pitchers of filtered water may contain harmless carbon dust. It is recommended to use this water for plants or discard it.

3. Operating Instructions

Using your Brita pitcher is straightforward:

- **Filling:** Open the flip-top lid and place the pitcher under a cold water tap. Fill the upper reservoir with water. The water will filter through to the main pitcher body.
- **Pouring:** Once the water has filtered, you can pour it directly from the pitcher. The ergonomic handle provides a comfortable grip.
- **Filter Indicator:** The electronic filter indicator on the lid will show the remaining filter life. A green light indicates good filter life, yellow indicates it's time to order a new filter, and red indicates it's time to replace the filter. Press and hold the 'Reset' button for 3 seconds after replacing the filter.

Video: An official Brita video titled "How to Choose a Water Filter Pitcher," explaining the different sizes, features, and colors available in Brita's pitcher lineup to help users select the best option for their needs.

4. Maintenance

Proper maintenance ensures the longevity and effectiveness of your Brita pitcher.

- **Filter Replacement:** For optimal performance, replace the water filter every 40 gallons (approximately 151 liters) or every 2 months, whichever comes first. Substances reduced may not be in all users' water.
- **Cleaning the Pitcher:** The pitcher (excluding the filter and lid with electronics) is dishwasher safe. For the lid,

hand wash with mild detergent and rinse thoroughly. Do not immerse the lid with the electronic indicator in water.

5. Troubleshooting

If you encounter any issues with your Brita pitcher, refer to the following common solutions:

- **Slow Filtration:** If water filters slowly, ensure the filter is properly seated in the reservoir. Remove and re-insert the filter firmly. If the issue persists, the filter may be clogged and require replacement.
- **Unpleasant Taste/Odor:** If the filtered water has an unusual taste or odor, ensure the filter has been flushed for 15 seconds before first use. The filter may also be expired or saturated and needs to be replaced.
- **Electronic Indicator Not Working:** If the indicator lights are not functioning, try pressing the 'Reset' button. If

it still doesn't work, the battery may be depleted (if applicable to your model) or there might be a malfunction. Contact Brita customer support for further assistance.

- **Water Leaking from Lid:** Ensure the lid is securely placed on the pitcher. Check for any debris around the lid's seal that might prevent a tight fit.

6. Specifications

Attribute	Detail
Brand	Brita
Model Name	35938
Capacity	6 Cups
Product Dimensions	10.94"L x 5.59"W x 10.47"H
Special Feature	Chlorine Reduction
Installation Type	Countertop
Power Source	Manual
Item Weight	1.68 pounds
