Key Features:

- **Connector Type:** 3.5mm Male Mono
- **Construction:** Black Plastic body with silver-tone plated solder type connection
- **Total Length:** Approximately 48mm / 1.8 inches
- **Color:** Black
- **Application:** Suitable for extending or adapting mono audio connections.

PACKAGE CONTENTS

- 5 x 3.5mm Male Mono Jack Audio Adapter Connectors

SETUP INSTRUCTIONS

- 1. Identify Connection Points:** Determine the audio device or cable you wish to connect to or extend. Ensure it requires a 3.5mm mono male jack connection.
- 2. Prepare Cable (if soldering):** If you are soldering a cable to the adapter, carefully strip the insulation from your audio cable to expose the core wire(s) and ground.
- 3. Solder Connection (if applicable):** Solder the audio cable wires to the appropriate terminals inside the adapter. For mono connections, typically one signal wire and one ground wire are used. Ensure secure and clean solder joints.
- 4. Assemble Adapter:** Carefully reassemble the adapter housing, ensuring all components are properly seated and secured.
- 5. Connect to Device:** Insert the 3.5mm male mono jack into the corresponding 3.5mm mono female port on your audio device or cable. Ensure a firm and complete connection.

Note: These adapters are designed for mono audio signals. Using them with stereo devices may result in partial or no audio output.

OPERATING INSTRUCTIONS

Once connected, the adapter functions as a passive audio connector. No specific operational steps are required beyond ensuring a secure physical connection.

- Ensure the adapter is fully inserted into both the source and destination ports.
- Verify that the audio source is active and producing sound.
- Adjust volume levels on your audio devices as needed.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to wipe the exterior of the adapter. Avoid using liquid cleaners or solvents.
- **Storage:** Store the adapters in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid excessive force when inserting or removing the adapter to prevent damage to the connector or the device port.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No audio output	Loose connection; Incorrect port; Mono/Stereo incompatibility; Faulty cable/device.	Ensure adapter is fully inserted. Verify correct port (e.g., audio out). Confirm devices are mono compatible. Test with another cable/device.
Poor audio quality (static, hum)	Loose connection; Interference; Damaged adapter/cable.	Check connections. Move away from potential interference sources. Inspect adapter and cables for damage.
Adapter does not fit	Incorrect jack size or type.	Verify that your device requires a 3.5mm mono male jack. This adapter is not for 2.5mm or 6.35mm jacks, nor for stereo connections.
