Recliner-Handles 2360, 6023

Leggett and Platt Full Size Hospitality Sofa Sleeper Bed Deck Repair Kit

Models: 2360, 6023

Introduction

This instruction manual provides detailed guidance for the installation and maintenance of your Leggett and Platt Full Size Hospitality Style Sofa Sleeper Bed Deck Repair Kit. This kit is designed to replace the bed deck on Leggett and Platt sofa sleeper systems with model numbers 2360 or 6023. It includes a replacement polypropylene deck and helical springs necessary for attachment. The original bed deck frame is not included with this kit.

Safety Information

- Keep away from open flames or high heat sources to prevent material damage or fire hazards.
- Supervise children and pets to avoid entrapment risks during installation and use of the sofa sleeper.
- Always follow the manufacturer's instructions for safe installation and use to ensure proper function and prevent injury.
- Wear appropriate personal protective equipment, such as gloves, during installation to prevent hand injuries from springs or sharp edges.

Package Contents

Please verify that all components are present before beginning installation:

- 1x Full Size Polypropylene Bed Deck
- 10x Helical Springs (5 for top attachment, 5 for side attachment)

Note: The bed deck frame is NOT included with this repair kit.

Compatibility

This repair kit is specifically designed for Leggett and Platt brand sofa sleeper systems. It is compatible with systems that have model numbers containing **2360** or **6023**. This is a Full Size Hospitality Style Decking, approximately 60 inches wide.
Important: Before ordering or installing, locate the manufacturer's sticker on your sofa sleeper frame to confirm the model number. Refer to the image below for an example of where to find the model number.

Figure 1: Example of a sofa sleeper frame with the bed deck. The manufacturer's sticker, typically located on the frame, indicates the model number for compatibility verification.

Installation Instructions

Follow these steps carefully to install your new bed deck. It is recommended to have assistance for this process.

Step 1: Prepare the Sofa Sleeper

1. Remove the mattress from the sofa sleeper frame.
2. Carefully fold out the sofa sleeper mechanism to its fully extended bed position.
3. Identify and remove the old bed deck and springs from the frame. Note how the old springs were attached for reference.

Step 2: Unpack the New Bed Deck and Springs

Figure 2: The new polypropylene bed deck in its rolled-up packaging.

Figure 3: The polypropylene bed deck unfolded, ready for installation.

Figure 4: The helical springs included in the repair kit.

1. Unroll the new polypropylene bed deck and lay it flat.
2. Ensure you have all 10 helical springs ready for attachment.

Step 3: Attach the Bed Deck to the Frame

1. Position the new bed deck onto the sofa sleeper frame. Ensure it is correctly oriented (head end vs. foot end).
2. Begin attaching the helical springs. It is often easiest to start with the corners or one side, working your way around.
3. Use a spring tool or a strong pair of pliers to stretch and hook each spring from the bed deck's attachment loops to the corresponding points on the sofa sleeper frame.
4. Distribute the 10 springs evenly: 5 for the top/head section and 5 for the side sections, as per the original design.
5. Ensure all springs are securely attached and the bed deck is taut across the frame.

Step 4: Final Check

1. Inspect all spring connections to confirm they are firm and properly seated.
2. Gently test the bed deck by applying light pressure to ensure it is securely installed and provides adequate support.
3. Fold and unfold the sofa sleeper mechanism a few times to ensure the new deck does not interfere with its operation.
4. Replace the mattress.

Operating Instructions

Once the bed deck repair kit is correctly installed, the sofa sleeper system will operate according to its original manufacturer's design. To deploy the bed, follow the standard procedure for your specific Leggett and Platt sofa sleeper model. Ensure the mechanism moves smoothly and without obstruction.

Maintenance

- Periodically inspect the bed deck and springs for any signs of wear, damage, or loosening.
- Clean the polypropylene deck with a damp cloth and mild soap if necessary. Avoid harsh chemicals that could degrade the material.
- Ensure the sofa sleeper mechanism is kept free of debris that could impede its movement.

Troubleshooting

Problem	Possible Cause	Solution
Bed deck does not fit the frame.	Incorrect model number or size ordered.	Verify your sofa sleeper's model number against the kit's compatibility (2360 or 6023). Contact customer service if unsure.
Difficulty attaching springs.	Springs require significant tension; improper technique.	Use a spring tool or strong pliers. Consider having a second person assist. Ensure springs are distributed correctly.

Problem	Possible Cause	Solution
Bed deck sags after installation.	Springs not properly tensioned or insufficient number of springs used.	Ensure all 10 springs are installed and securely attached, providing even tension across the deck.

Specifications

Product Type: Sofa Sleeper Bed Deck Repair Kit

Brand (for system): Leggett and Platt

Kit Provider: Recliner-Handles

Compatibility: Leggett and Platt Sofa Sleeper Systems Models 2360, 6023

Size: Full Size (approximately 60 inches wide)
