Mr. Coffee WFF

Mr. Coffee Water Filter Replacement Disc Universal Instruction Manual

Model: WFF

PRODUCT OVERVIEW

The Mr. Coffee® Water Filter Replacement Discs are designed for use with Mr. Coffee® Water Filtration Systems. These universal discs are compatible with Mr. Coffee® 8, 10, 12, and 14 cup coffeemaker models.

These filters are made from carbon fiber and are NSF certified. They are designed to remove up to 97% of chlorine from water, which helps to improve the taste of your coffee.

INSTALLATION AND USAGE

To install and use the water filtration system in your Mr. Coffee® coffeemaker, follow these steps:

1. **Remove the gray disk cover:** Locate the water filtration system in your coffeemaker. Remove the gray disk cover. Remove your used water filter disk and replace it with a new Mr. Coffee® water filter disk. Reinstall the cover.

Image: Diagram illustrating the components of the water filter system, including the frame, filter disk, and disk cover,

with an arrow indicating removal of the cover (Diagram 1 from original manual).

2. **Set the replacement reminder:** On the water filter, locate the red indicator. Align this indicator to the letter on the frame that corresponds with the month you are installing the replacement disk. This serves as a visual reminder to change the disk monthly.

Image: Diagram illustrating the red indicator on the water filter and its alignment with month letters on the frame (Diagram 2 from original manual).

3. **Prepare the brew basket:** Place a Mr. Coffee® paper or permanent filter into the brew basket. Add your desired amount of coffee grounds into the filter.

Image: Diagram showing coffee grounds being added to a filter within the brew basket (Diagram 3 from original manual).

4. **Insert the water filter:** Place the Mr. Coffee® Water Filter into the brew basket. Ensure the correct side is facing up, as indicated on the water filter itself. Verify that the water filter is level.

Image: Diagram illustrating the placement of the water filter into the brew basket, ensuring the correct orientation (Diagram 4 from original manual).

5. **Close the brew basket:** Close the brew basket or lid of your coffeemaker. If the brew basket or lid does not close properly, re-check steps 4 and 5 to ensure the filter is correctly inserted. Once closed, you are ready to brew coffee.

Image: Diagram showing the brew basket being closed after filter insertion (Diagram 5 from original manual).

6. **Post-brewing care:** After brewing, rinse the water filter with fresh water. Do not wash the water filter in a dishwasher.

MAINTENANCE

- **Replacement Schedule:** The water filtration disk should be replaced once a month, or approximately every 30 brew cycles, to maintain optimal performance.
- **Cleaning:** After each use, rinse the water filter with fresh water. Do not place the water filter in a dishwasher.

TROUBLESHOOTING

If the brew basket or lid of your coffeemaker does not close properly after inserting the water filter, please:

- Re-check step 4: Ensure the Mr. Coffee® Water Filter is placed correctly in the brew basket with the

indicated side facing up and is level.

- Re-check step 5: Verify that the filter is properly seated before attempting to close the brew basket or lid.
