

Philips Avent SCF603/50

Philips Avent Breast Milk Storage Bags

Model: SCF603/50

INTRODUCTION

The Philips Avent Breast Milk Storage Bags are designed for safe and convenient storage of expressed breast milk. These bags are pre-sterilized, durable, and feature a secure double zipper to prevent leaks, ensuring your precious breast milk is protected whether stored in the refrigerator or freezer.

KEY FEATURES

- **Secure Double Zipper:** Designed with a robust double zipper for a leak-proof seal, ensuring

safe storage.

- **Pre-sterilized:** Each bag is pre-sterilized for immediate use, maintaining hygiene and convenience.
- **Durable Construction:** Features reinforced side seams and a dual-layer design for enhanced strength and durability.
- **Self-Standing Design:** The bag is designed to stand upright, making filling and pouring easier.
- **Wide Opening:** A wide neck facilitates easy and mess-free transfer of breast milk.
- **BPA-Free Material:** Made from BPA-free materials for your baby's safety.
- **Labeling Area:** A dedicated area on the bag allows you to note the date, time, and volume of milk.

Protect and safely store your precious breast milk

SETUP & PREPARATION

1. **Inspect Bag:** Before use, visually inspect each bag for any signs of damage.
2. **Open Seal:** The bags are pre-sterilized and come with a tamper-evident seal. Carefully tear or cut along the perforated line at the top of the bag to open it.
3. **Expand Bag:** Gently pull the sides of the bag apart to expand the self-standing base.

OPERATING INSTRUCTIONS

- 1. Fill Bag:** Hold the bag upright and carefully pour expressed breast milk into the wide opening. Do not overfill; leave approximately one inch of space from the top to allow for expansion during freezing. The bag has clear measurement markings up to 6 oz (180 ml).
- 2. Remove Air:** Gently press any excess air out of the bag from the bottom upwards before sealing. This helps prevent freezer burn and preserves milk quality.
- 3. Seal Bag:** Firmly press the double zipper closure together to ensure a complete and secure seal. Run your fingers along the zipper to confirm it is fully closed.
- 4. Label Bag:** Use a permanent marker to write the date and time of expression, and the volume of milk on the dedicated labeling area. You may also add your baby's name if storing milk for multiple children.

Breastfeeding System Overview

Philips Avent offers a comprehensive system for expressing, storing, and feeding breast milk. The storage bags integrate seamlessly into this process.

Video: An overview of Philips Avent breast pumps and the 'Express, Store, Feed' system, demonstrating how breast milk can be expressed, stored in containers or bags, and then fed to the baby.

Video: A detailed look at Philips Avent breast pumps, explaining their features and benefits for mothers, including the ability to express and store milk for later feeding.

STORAGE GUIDELINES

Proper storage is crucial for maintaining the quality and safety of breast milk.

- **Refrigerator Storage:** Store filled and sealed bags in the coldest part of the refrigerator (not the door) for up to 4 days.
- **Freezer Storage:** For longer storage, place the sealed bags in the freezer. Lay them flat initially to freeze quickly and save space, then store upright if preferred. Breast milk can be stored in a freezer for up to 6 months.
- **Thawing:** Thaw frozen breast milk in the refrigerator overnight, or by holding the bag under cool or lukewarm running water. Do not thaw in a microwave or boiling water.
- **Usage:** Once thawed, use breast milk within 24 hours. Do not refreeze thawed breast milk.

Secure, leak-proof double zipper with reinforced side seams

CARE & SAFETY

- **Single Use:** These breast milk storage bags are designed for single use only. Do not wash or reuse them.
- **BPA-Free:** The bags are made from BPA-free materials, ensuring no harmful chemicals leach into your breast milk.
- **Microwave Use:** The bags are indicated as microwaveable, but it is generally recommended to avoid microwaving breast milk as it can destroy nutrients and create hot spots.

TROUBLESHOOTING

- **Leaking:** If a bag leaks, ensure the double zipper is fully sealed by pressing firmly along the entire length. Avoid overfilling the bag.
- **Difficulty Sealing:** Ensure the zipper area is clean and dry before attempting to seal.
- **Label Smudging:** Use a permanent marker for labeling to prevent smudging, especially when handling frozen bags.

SPECIFICATIONS

Attribute	Detail
Brand	Philips Avent
Model Number	SCF603/50
Capacity	6 ounces (180 ml)
Unit Count	50 bags
Material Type	PET/PE, BPA free
Closure Type	Double Zipper
Reusability	Disposable
Special Features	Leak Resistant, Pre-sterilized, Self-standing
Item Dimensions (W x H)	4.5"W x 6"H
