

## Munchkin MK0094-011

# Munchkin Auto Close Modern Pressure Mounted Baby Gate Instruction Manual

Model: MK0094-011

### IMPORTANT SAFETY INFORMATION

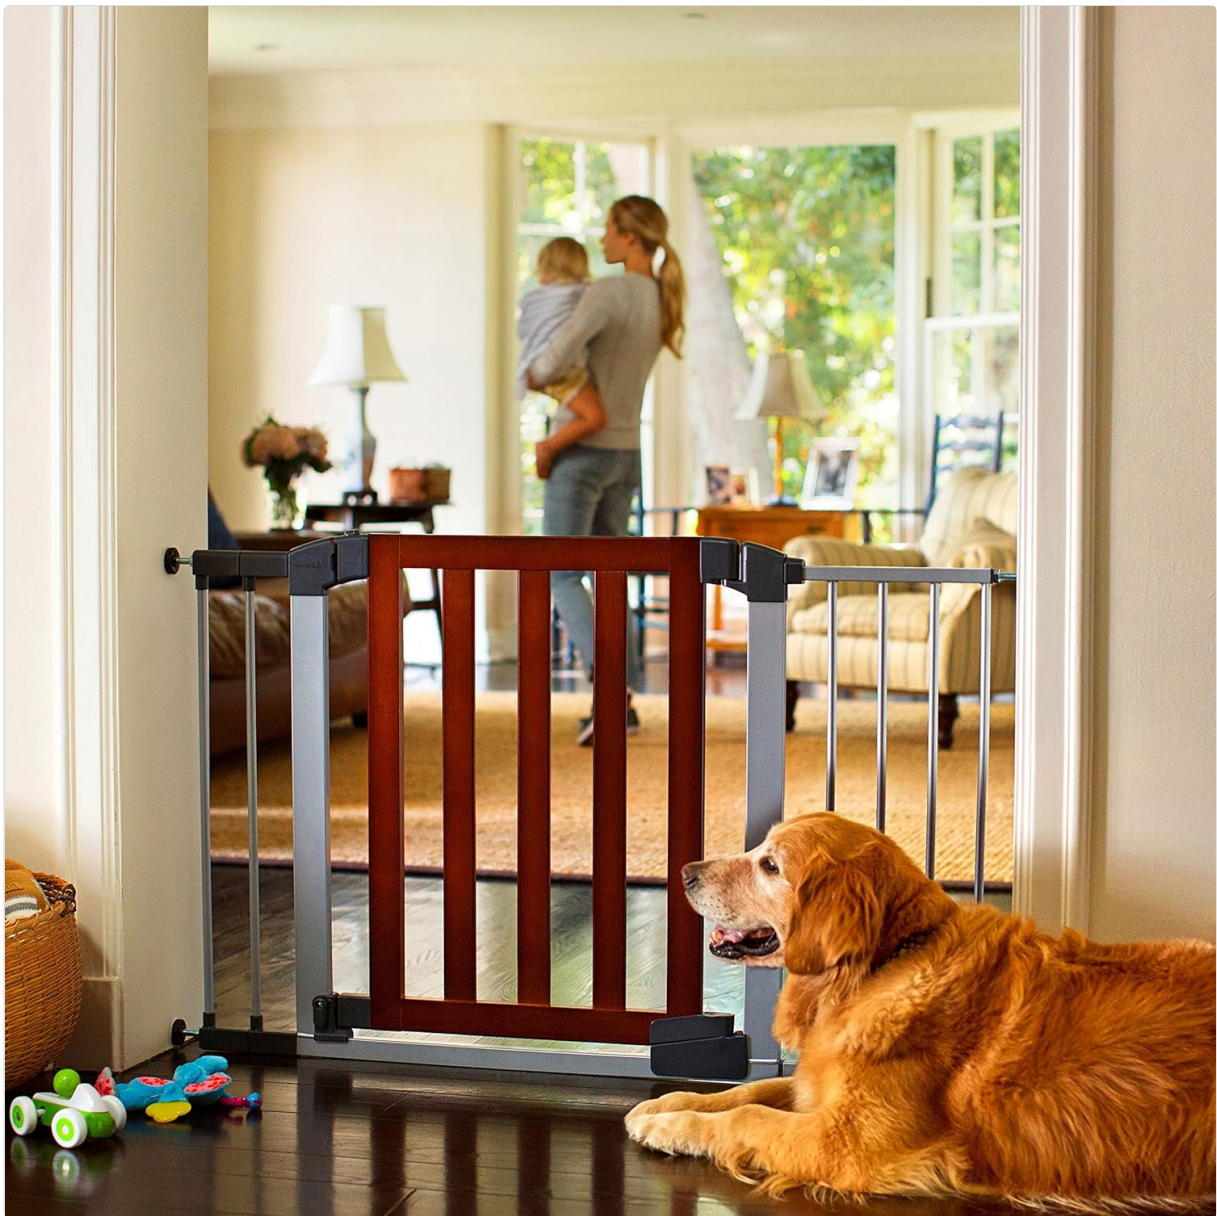

- **Secure Installation:** Children have been seriously injured when gates are not securely installed. Always install and use gates as directed, utilizing all required parts.
- **Discontinue Use:** Stop using the gate when a child can climb over it or dislodge it.
- **Locking Mechanism:** Use only with the locking mechanism securely engaged.
- **Pool Safety:** Never use this gate to keep a child away from a pool.
- **Stair Use:** Do not use this gate at the top or bottom of stairs without using all four wall cups. For maximum safety, use all four wall cups with the sticky pads and screws provided when installing the gate in any location.

### SETUP AND INSTALLATION

The Munchkin Auto Close Modern Baby Gate is designed for pressure-fit installation and includes a hardware mounting kit for enhanced safety, particularly when used in doorways and on stairs. It is suitable for children aged 6 to 24 months.

#### Measuring Your Opening

Measure your desired opening accurately before purchase to ensure a proper fit. The gate measures 29 inches tall and fits openings from 29.5 inches to 40.6 inches wide with the included 2.75-inch and 5.5-inch extensions. Additional extensions can be purchased separately to fit openings up to 54 inches wide.

**Image Description:** A diagram illustrating various recommended configurations for the Auto Close Modern gate (Model # MK0094-011). It shows how different combinations of extensions (2.75-inch, 5.5-inch, 11-inch) can be used to fit opening widths ranging from 29.5 inches to 54.0 inches. The diagram specifies which extensions are included with the standard package and which need to be purchased separately.

## Installation Steps

1. **Unpack Components:** Carefully remove all parts from the packaging.
2. **Assemble Extensions:** If your opening requires extensions, attach them to the main gate frame as per the configuration diagram.
3. **Position Gate:** Place the gate in the desired opening. Ensure the bottom support bar is flush with the floor.
4. **Install Wall Cups:** For maximum safety, especially at the top or bottom of stairs, install all four wall cups using the provided sticky pads and screws. These cups create pressure points against the wall, securing the gate.
5. **Adjust Pressure Mounts:** Tighten the pressure adjustment bolts on all four corners until the gate is firmly secured in the opening. The gap between the gate frame and the handles, which is present when shipped, will close once the gate is properly installed and tightened. This gap is not a defect.
6. **Test Security:** Once installed, push and pull on the gate to ensure it is stable and cannot be easily dislodged.

# Recommended configurations

Auto Close Modern™  
Model #: MK0094-011

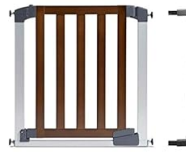

Measure your space to ensure a proper fit in your home.

## NO ADDITIONAL EXTENSIONS NEEDED

(1) 11" not included

51.6" to 54.0"

(2) 11" not included

**NOTE:** Some configurations will not use all extensions provided in package.

**Image Description:** The Munchkin Auto Close Modern Baby Gate is shown installed in a home doorway, separating a living area from another room. The gate features a dark wood door section and silver metal side frames. A golden retriever dog is resting on the floor in front of the gate, and a person holding a baby is visible in the background, demonstrating the gate's use in a household setting.

## OPERATING INSTRUCTIONS

### Opening the Gate

To open the gate, simply pull and lift the handle. This two-step action is designed for easy one-handed adult operation while providing a secure barrier against children.

**Image Description:** A detailed close-up of the gate's latch mechanism. It shows the gray plastic handle with a circular button on top, which needs to be pressed while lifting the gate to open it. A small red indicator is visible, signifying the locked state.

### Closing the Gate

The gate features an automatic self-closing hinge that uses gravity to close the door by itself. Simply push the gate to close and lock. The wood door offers a quieter close compared to metal gates.

**Image Description:** A close-up view of the bottom hinge mechanism of the gate. It shows the dark gray plastic hinge connecting the wooden gate panel to the silver metal frame, highlighting the gravity-fed auto-close design.

### Dual-Locking Mechanism

The gate's dual-locking mechanism allows the door to swing in both directions. An optional third lock at the base can be engaged to restrict the door to open in only one direction, providing additional control and safety.

### Walkthrough Access

The gate offers an extra-wide 21.5-inch walkthrough, facilitating easy passage for adults.

## MAINTENANCE

---

To clean the gate, use mild soap and wipe with a damp cloth. Avoid harsh chemicals or abrasive cleaners that could damage the finish.

## TROUBLESHOOTING

---

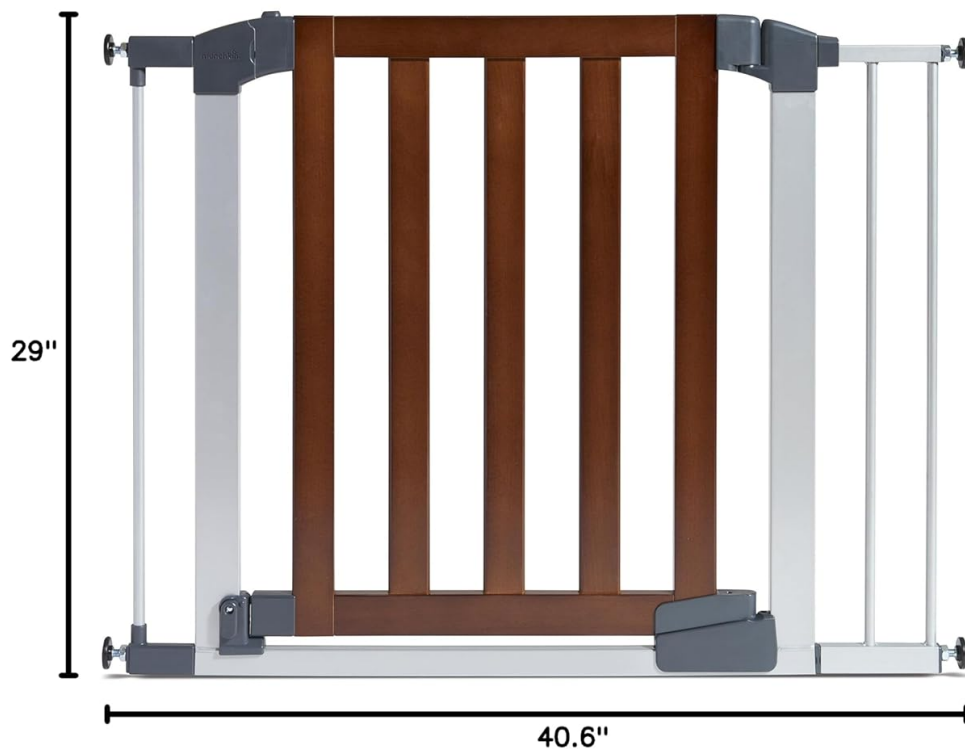

### Gap Between Gate Frame and Handles

**Issue:** A gap is visible between the gate frame and the handles upon unpacking.

**Solution:** This is not a defect. The gap is designed to close once the gate is properly installed and the pressure adjustment bolts are tightened. Ensure the gate is securely installed as per the setup instructions.

## SPECIFICATIONS

Feature	Detail
Model Number	MK0094-011
Item Number	46764
Dimensions (Height)	29 inches
Dimensions (Width)	29.5 inches – 40.6 inches (with included extensions)
