BANDAI NBC111

Nanoblock Tyrannosaurus Building Kit Instruction Manual

Model: NBC111

INTRODUCTION

This manual provides detailed instructions for assembling, maintaining, and troubleshooting your Nanoblock Tyrannosaurus Building Kit, model NBC111. Nanoblock offers a unique building experience with micro-sized blocks, allowing for intricate detail and realism in your creations. This kit contains over 110 pieces to construct a detailed Tyrannosaurus model.

SETUP

1. Unpacking the Kit

Carefully open the packaging. The kit includes snap-together bricks and full-color instructions. Ensure all components are present before beginning assembly. Due to the small size of the blocks, it is recommended to work on a clean, flat surface to prevent loss of pieces.

2. Parts Identification

Sort the blocks by color and shape if desired. Refer to the included instruction booklet for a detailed list and visual guide of all block types and quantities. Familiarize yourself with the different block sizes and connection points.

ASSEMBLY INSTRUCTIONS

Follow the step-by-step instructions provided in the full-color instruction booklet included with your kit. Each step illustrates the placement of blocks to gradually build the Tyrannosaurus model. Pay close attention to the orientation and connection of each piece.

- **Start from the Base:** Typically, models are built from the ground up. Identify the starting point as indicated in the instructions.
- **Secure Connections:** Ensure each block is firmly pressed into place to create a stable structure.

- **Review Each Step:** Before proceeding, verify that your current assembly matches the illustration in the instruction booklet.
- **Patience is Key:** Working with micro-sized blocks requires precision and patience. Take your time to ensure correct placement.

MAINTENANCE

1. Cleaning Your Model

To clean your assembled Nanoblock model, use a soft, dry brush or a can of compressed air to gently remove dust. For more stubborn dirt, a slightly damp cloth can be used, but avoid excessive moisture. Do not use harsh chemicals or abrasive cleaners.

2. Storage

Store your Nanoblock model in a stable location away from direct sunlight and extreme temperatures to prevent discoloration or material degradation. If disassembling for storage, keep all blocks in a sealed container to prevent loss.

TROUBLESHOOTING

- **Missing Pieces:** If you find that pieces are missing from your kit, first double-check your work area and packaging. If pieces are still missing, contact the manufacturer's customer support for assistance.

- **Difficulty with Assembly:** If a section is proving difficult, re-examine the instruction booklet carefully. Sometimes rotating the model or viewing the illustration from a different angle can help clarify the placement. Ensure blocks are fully connected.
- **Model Stability:** The Tyrannosaurus model may require careful positioning of its legs to achieve optimal balance. Adjust the stance of the legs slightly until the model stands securely. For long-term display, consider placing the model on a flat, stable surface or using a small amount of museum putty for added stability if needed.

SPECIFICATIONS

Product Name	Nanoblock Tyrannosaurus Building Kit
Model Number	NBC111
Brand	BANDAI (Designed by Kawada Ltd in Japan)
Number of Pieces	Over 110
Recommended Age	10 - 15 years
Product Dimensions	1.18 x 7.09 x 7.09 inches (packaged)
Item Weight	1.09 ounces
Country of Origin	China

WARRANTY AND SUPPORT

For any questions regarding missing parts, assembly issues not covered in this manual, or product defects, please contact the manufacturer, BANDAI, or the retailer where the product was purchased. Keep your proof of purchase for any warranty claims.
