nanoblock NAN14680

nanoblock Pokémon Gengar Building Kit Instruction Manual

Model: NAN14680

INTRODUCTION

This instruction manual provides detailed guidance for assembling your nanoblock Pokémon Gengar Building Kit. nanoblock offers a micro-sized building experience, allowing for intricate detail and realism in your creations. This kit is designed to develop logical thinking, problem-solving, and fine motor skills.

Safety Warning: This product contains small parts and is considered a choking hazard. Not suitable for children under 3 years. Manufacturer recommended age: 13 years and up.

WHAT'S IN THE BOX

Your nanoblock Pokémon Gengar Building Kit includes:

- All necessary nanoblock pieces to construct the Gengar model.
- Step-by-step assembly instructions.

SETUP AND PREPARATION

1. **Clear Workspace:** Choose a clean, flat, and well-lit surface for assembly. Due to the small size of the blocks, a stable environment is crucial to prevent loss of pieces.
2. **Unpack Components:** Carefully open the packaging and separate the bags of nanoblock pieces. It is recommended to keep pieces organized by color or type as you proceed with the instructions.
3. **Review Instructions:** Familiarize yourself with the provided step-by-step instruction sheet before beginning

assembly.

ASSEMBLY INSTRUCTIONS

Follow the numbered steps on the instruction sheet provided in your kit. Each step illustrates which blocks to use and where to place them. Pay close attention to the orientation of the blocks.

1. **Layer-by-Layer Construction:** nanoblock models are typically built layer by layer from the base upwards. Ensure each layer is securely connected before proceeding to the next.
2. **Block Placement:** Use gentle but firm pressure to snap blocks into place. Avoid forcing blocks, as this may damage them.
3. **Color and Shape Matching:** Refer to the instruction diagrams for correct color and shape of blocks required for each step.
4. **Detailing:** The smallest blocks are often used for intricate details like eyes, mouth, and other facial features. These require precision during placement.

CARE AND MAINTENANCE

- **Cleaning:** To clean your assembled nanoblock model, gently wipe it with a dry, soft cloth. For stubborn dust, a soft brush or compressed air can be used. Avoid using water or cleaning solutions, as these may damage the blocks or cause discoloration.
- **Storage:** Store the model in a stable location away from direct sunlight and extreme temperatures to prevent warping or fading of the blocks.
- **Disassembly:** If you need to disassemble the model, use a nanoblock block separator tool (sold separately) or a small, flat tool to carefully pry apart the blocks. Avoid using excessive force.

TROUBLESHOOTING

- **Missing Pieces:** While rare, if you find a piece missing, double-check your workspace and the packaging. Contact nanoblock customer support if a piece is genuinely missing from a new kit.
- **Difficulty Connecting Blocks:** Ensure blocks are correctly aligned before applying pressure. If blocks are difficult to connect, try rotating them or checking for any debris in the studs or holes.
- **Model Instability:** If your model feels unstable, review the previous steps in the instructions to ensure all blocks are correctly and securely attached. Incorrect placement of even a few blocks can affect overall stability.
