CITIZEN MD02-204

CITIZEN Q&Q MD02-204 Solar Radio-Controlled Chronograph Watch User Manual

PRODUCT OVERVIEW

This manual provides comprehensive instructions for the CITIZEN Q&Q MD02-204 Solar Radio-Controlled Chronograph Watch. This timepiece combines solar power with radio-controlled accuracy, offering a range of functions including a chronograph, alarm, dual time display, and LED illumination. Please read this manual carefully to ensure proper use and maintenance of your watch.

SETUP

Initial Charging

Your watch is powered by solar energy. Before initial use, or if the watch has stopped, expose the dial to bright light (natural sunlight is ideal) for several hours to ensure it is sufficiently charged. Avoid covering the watch with clothing for extended periods.

Time Setting and Radio Reception

The watch automatically receives time signals to maintain accurate time. Ensure the watch is placed in an area with good radio signal reception, typically near a window, especially during nighttime hours when signals are strongest. The watch will attempt to receive a signal automatically. If manual adjustment is needed, refer to the detailed instructions for your specific module (Caliber No. UP08) on the official CITIZEN website.

Time Zone Adjustment

While radio-controlled, you may need to manually set your home city or time zone. Consult the full instruction manual for Caliber UP08 for specific steps on adjusting the time zone.

OPERATING THE WATCH

Time Display

The watch features both analog (three-hand: hour, minute, second) and digital displays. The digital display can show time (hour, minute, day of week) or date (month, day, day of week).

- **12/24 Hour Display:** The digital display supports switching between 12-hour and 24-hour formats.

Calendar

The digital display includes a full auto calendar, which automatically adjusts for different month lengths and leap years until 2099. The display shows Month, Day, and Day of Week.

Chronograph

The chronograph function allows for precise measurement of elapsed time. Refer to the detailed operating guide for Caliber UP08 for instructions on starting, stopping, and resetting the chronograph.

Alarm

The watch is equipped with one alarm, which sounds for approximately 15 seconds on the digital display. It includes an on/off switching function.

Hourly Chime

An hourly chime function is available, sounding every hour on the digital display. This feature also has an on/off switching function.

Dual Time

The dual time function allows you to display a second time zone, settable in 15-minute increments on the digital display.

LED Light

The watch features an LED light for illumination in low-light conditions. A single activation lasts approximately 2 seconds.

MAINTENANCE

Solar Charging Guidelines

To ensure continuous operation, regularly expose your watch to light. When fully charged, the watch can operate for approximately 12 months without further charging, or up to 18 months when stored in power-saving mode. Insufficient charging may lead to the watch stopping or functions not operating correctly.

Care and Cleaning

Clean the watch case and band regularly with a soft, dry cloth. For stainless steel parts, a slightly damp cloth can be used, followed by drying. Avoid using harsh chemicals or abrasive materials.

TROUBLESHOOTING

Inaccurate Time

If the time is inaccurate and radio wave reception has not been successful, the watch's accuracy defaults to an average monthly difference of ± 30 seconds. Ensure the watch is in a location conducive to signal reception. If issues persist, manual time adjustment may be necessary.

Watch Not Functioning

If the watch stops or functions are not working, it may be due to insufficient charge. Expose the watch to bright light for an extended period. If the problem continues, contact customer support.

SPECIFICATIONS

Feature	Detail
Model Number	MD02-204
Caliber No.	UP08
Case Diameter	Approx. 42mm
Weight	104.2g
Thickness	15.2mm
Case Material	Resin
Bezel Material	Stainless Steel
Band Material	Stainless Steel
Case Back Material	Stainless Steel
Windshield Material	Resin

Feature	Detail
Time Display	Analog (Hour, Minute, Second), Digital (Hour, Minute, Day of Week / Month, Day, Day of Week)
Calendar	Full Auto Calendar (until 2099)
Time Accuracy	Average monthly difference ± 30 seconds (when radio reception fails)
Alarm	1 alarm (approx. 15 seconds), On/Off function
Hourly Chime	Every hour, On/Off function
Dual Time	Settable in 15-minute increments
Chronograph	Yes
Power Source	Solar Power
Operating Duration (Full Charge)	Approx. 12 months (normal use), Approx. 18 months (power-saving mode)
LED Light Usage	1 time (2 seconds) per day (estimated)

WARRANTY AND SUPPORT

For warranty information and customer support, please refer to the warranty card included with your purchase or visit the official CITIZEN website. Keep your proof of purchase for warranty claims.
