Cylinder	KW1 standard, 5 pin (<i>Note: This is a privacy knob, not an entry knob with a key cylinder for external locking. The mention of KW1 standard 5 pin refers to the internal locking mechanism if applicable, or is a generic spec from the product family.</i>)
Chassis	Cylindrical
Faceplate	2 1/4" Round corner
Strikes	2 1/4" full rim standard
Bolt	1/2" Throw
UPC	039208996150

Image: A detailed table outlining the specifications for BRINKS knobs, including door preparation, backset, door thickness, cylinder type, chassis, faceplate, strikes, bolt throw, and ANSI grading.

SETUP AND INSTALLATION

Installation of the BRINKS Stafford Privacy Door Knob is designed to be straightforward and typically requires only a Phillips screwdriver. It fits all standard doors. Please follow these general steps:

- 1. Prepare the Door:** Ensure your door has the correct cross bore (2 1/8"), edge bore (1"), and latch mortise (1" x 2 1/4").
- 2. Install the Latch:** Insert the latch mechanism into the edge bore of the door. Secure it with screws, but do not fully tighten them yet.
- 3. Install the Exterior Knob:** Place the exterior knob assembly through the cross bore, ensuring the spindle aligns with the latch mechanism.
- 4. Install the Interior Knob:** Attach the interior knob assembly, aligning it with the exterior knob and latch.
- 5. Secure the Assembly:** Use the provided screws to connect the interior and exterior knob assemblies. Ensure the latch tail prongs are properly engaged.
- 6. Tighten Screws:** Once the main lock body is threaded through the latch tail prongs, fully tighten all screws, including those for the latch faceplate.
- 7. Test Operation:** Before closing the door, test the privacy lock function and the Push Pull Rotate mechanism to ensure smooth operation.

Important Note: The product features 3" diameter roses designed to hide blemishes from old hardware. Removable interior knobs facilitate scratch-free installation.

Interior Locking

OPERATING INSTRUCTIONS

The BRINKS Stafford Privacy Door Knob incorporates innovative Push Pull Rotate technology for convenient access. This privacy knob is designed for interior doors and can be locked from the inside.

Hands-Free Operation (Push Pull Rotate)

This door knob offers three methods for opening without grasping and turning the knob:

- **Push It:** Apply pressure to the knob with an elbow, hip, or other body part to push the door open. This is ideal when your hands are full.
- **Pull It:** Hook the knob with a finger or wrist and pull to open the door.
- **Rotate It:** For traditional operation, grasp and rotate the knob to open the door.

Interior Non-Locking

Push It

Pull It

Rotate It

Privacy Locking

To engage the privacy lock, locate the small button or turn-piece on the interior side of the knob. Press or turn this mechanism to lock the door. To unlock, simply turn the interior knob or use the emergency release tool (if provided) from the exterior side.

PUSH it.

PULL it.

ROTATE it.

MAINTENANCE

To ensure the longevity and smooth operation of your BRINKS Stafford Privacy Door Knob, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the knob and rose with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals, as these can damage the finish.
- **Lubrication:** If the mechanism feels stiff over time, apply a small amount of graphite lubricant or a silicone-based spray lubricant to the latch bolt and internal moving parts. Do not use oil-based lubricants as they can attract dust and grime.
- **Tightness Check:** Periodically check all mounting screws for tightness. Loose screws can affect the knob's performance and durability.

TROUBLESHOOTING

If you encounter issues with your BRINKS Stafford Privacy Door Knob, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Knob feels loose or wobbly.	Mounting screws are loose; incorrect knob distance selection during installation.	Tighten all visible mounting screws. Ensure the correct knob distance was selected during installation as per the original instructions. If not, re-install.
Door does not latch properly.	Strike plate misalignment; latch bolt sticking.	Check the alignment of the strike plate on the door frame. Adjust if necessary. Lubricate the latch bolt.
Privacy lock mechanism is stiff or not engaging.	Internal mechanism requires lubrication; debris in the lock.	Apply graphite or silicone lubricant to the privacy lock mechanism. Ensure no debris is obstructing the movement.
Push/Pull function is difficult or ineffective.	High friction from the closing latch; improper installation.	Ensure the latch operates smoothly and the strike plate is not causing excessive friction. Re-check installation steps, especially the alignment of the latch and knob.

WARRANTY INFORMATION

BRINKS provides a **Lifetime Warranty** for defects in material or workmanship for the Stafford Privacy Door Knob. For warranty claims or further details, please refer to the official BRINKS website or contact customer support.

CUSTOMER SUPPORT

For additional assistance, technical support, or to inquire about replacement parts, please visit the official BRINKS website or contact their customer service department. You can often find contact information on the product packaging or the manufacturer's website.
