Tornado 97130 HEPA Lightweight Upright Vacuum Instruction Manual

Model: 97130 | Brand: Tornado

1. INTRODUCTION AND OVERVIEW

This manual provides essential instructions for the safe and efficient operation, setup, and maintenance of your Tornado 97130 HEPA Lightweight Upright Vacuum. Please read this manual thoroughly before first use and retain it for future reference.

Image 1: Tornado 97130 HEPA Lightweight Upright Vacuum. This image displays the full upright vacuum cleaner, featuring a yellow base and a black bag housing, with a long power cord wrapped around the handle.

The Tornado 97130 is a lightweight upright vacuum designed for effective cleaning. It features a 13-inch cleaning path, a HEPA cartridge vacuum filter, and uses bagged collection. With a 50 ft power cord, 120V voltage, and a net weight of 8 lb, it offers portability and reach. The unit operates at a sound level of 82 dBA and provides an air flow of 160 cfm. It also includes a light for improved visibility during operation.

2. SETUP

1. **Unpacking:** Carefully remove all components from the packaging. Ensure all parts are present and undamaged.
2. **Handle Assembly:** Attach the handle to the main body of the vacuum. Ensure it clicks securely into place.
3. **Bag Installation:** Open the bag compartment and insert a new vacuum bag. Ensure the bag is properly seated and sealed to prevent dust leakage.
4. **Power Cord:** Unwind the 50 ft power cord and plug it into a standard 120V electrical outlet.

3. OPERATING INSTRUCTIONS

1. **Power On/Off:** Locate the power switch on the vacuum handle or body. Press to turn the vacuum ON, and press again to turn it OFF.
2. **Operating Position:** Gently step on the vacuum base and pull the handle back to recline the unit into the operating position.
3. **Cleaning:** Guide the vacuum across the floor surface. The 13-inch cleaning path allows for efficient coverage. The integrated light illuminates the cleaning area for better visibility.
4. **Height Adjustment:** The vacuum is designed with a fixed height of 49 inches. No manual height adjustment for the brush roll is available on this model.
5. **Storage:** When finished, return the vacuum to its upright position and wrap the power cord securely around the cord hooks for neat storage.

4. MAINTENANCE

Regular maintenance ensures optimal performance and extends the life of your vacuum cleaner.

- **Vacuum Bag Replacement:** Check the vacuum bag regularly. Replace it when it is full or when suction power decreases significantly. Refer to the markings on the bag or the vacuum for proper installation.
- **HEPA Filter Maintenance:** The vacuum uses a HEPA cartridge filter. Consult the filter manufacturer's instructions for cleaning or replacement frequency. Typically, HEPA filters are not washable and should be replaced periodically.
- **Brush Roll Cleaning:** Periodically inspect the brush roll for tangled hair, strings, or debris. Turn off and unplug the vacuum before cleaning the brush roll. Use scissors to carefully cut away any obstructions.
- **Exterior Cleaning:** Wipe the exterior of the vacuum with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners.

5. TROUBLESHOOTING

If you encounter issues with your Tornado 97130 vacuum, please refer to the following common troubleshooting steps:

- **No Power:** Ensure the power cord is securely plugged into a working electrical outlet. Check the circuit breaker if necessary.
- **Loss of Suction:** Check if the vacuum bag is full and needs replacement. Inspect the hose and nozzles for any blockages. Ensure the HEPA filter is clean and properly installed.
- **Unusual Noise:** Turn off and unplug the vacuum. Inspect the brush roll for obstructions. Check for any loose parts.
- **Vacuum Not Picking Up Debris:** Verify that the brush roll is spinning freely. Check for blockages in the cleaning path or hose.

If the problem persists after performing these checks, please contact Tornado customer support.

6. SPECIFICATIONS

Feature	Specification
Model Number	97130

Feature	Specification
Brand	Tornado
Product Dimensions (L x W x H)	10 x 13.75 x 49 inches
Item Weight	8 lb (Net Weight), 15 lb (Shipping Weight)
Cleaning Path	13 inches
Filter Type	HEPA, Cartridge Vacuum Filter
Vacuum Bag Type	Bagged
Vacuum Capacity	1-3/4 gallons
Power Cord Length	50 ft
Voltage	120V
Sound Level	82 dBA
Air Flow	160 cfm
